Justice Chase: I think you can. I am quite concerned to have everybody satisfied with the entire record, that the entire record is there. I don't want it without the entire record. I don't know what the entire record is.

Now, lest there be any misunderstanding later, I would very much dislike having a question made by anybody later on the ground that the record was not complete. I would like to have everybody understand that this Court wants any party who feels this record is not complete to say so in a timely way so that can be made complete.

Mr. Miller: The petition for reopening and the answers are the only ones, and if Mr. McCollester will supply those, we will have no objection as to the completeness of the record.

Mr. McCollester: May I suggest that those documents in the possession of the Interstate Commerce Commission are not in our possession. We will do what we can to have them furnished. The Commission has the docket and we do not.

Justice Chase: I would make this suggestion that, out of court you two have a conference and then decide upon [fol. 1380] it. If you can't come to a conclusion, let us know.

Mr. Miller: I don't think we will have a bit of trouble.

• • • • • • •

[fol. 1381] adequate criterion to present conditions.

That was a different era.

Thank you.

May I just say this, if your Honor please; I have talked with Mr. Miller for the purpose of seeing that the record is made complete. Now, I want to say that of course, we are not the plaintiffs in the Western case. I am only concerned that there shall be before the Court the complete record here, what Government counsel will agree is the complete record upon which the Commission made the orders here. We propose to put before the Court the complete record and I want to have it that way. I have here the petition of the respondents for a reopening and reconsideration. Mr. Miller tells me if that is put with the contents of that box he will agree that the box contains the complete record before the Commission. Is that correct?

Mr. Miller: That is the only thing I believe, if the Court please, that is missing. The petition for reconsideration in this case and of the intervening New England States in this case. Their petitions, I think, are attached as exhibits to their petitions. I assume they are part of the record and in evidence. That menas that all the papers [fol. 1382] are in this record.

Mr. McCollester: May that be understood that the petitions as well as the Commission's orders and Commission's reports, which are included in our petition and are admitted by the answers of the defendants, are part of the record as if they were, or as if they were certified and offered here again separately?

I assume you don't want——

Justice Chase: Is that agreed to by everybody?

Mr. Norman: If the Court please: I am perfectly willing that they be made a part of the record as evidence of what they contain, but as evidence—but not as evidence to be considered in this case.

Justice Chase: Well, we are concerned now primarily with getting the record complete. It may be understood that it is complete in this case by everybody with the addition of those documents which Mr. McCollester offers.

Mr. Miller: This is agreed to by us.

Mr. McCollester: The copy I have is not certified.

Justice Chase: Apparently this would be a good time to stop.

Adjournment taken at 12:45 P. M. to 2:00 P. M. of the same date and at the same place.

• • • • • • •

[fol. 1383] Mr. McCollester: Before the Government begins, there is one point about the state of the record that I think ought to be cleared up. First of all I do not find that the exhibit marked number 4 for identification, which is the bundle of tariffs, has been marked in evidence. May it be marked in evidence?

Justice Chase: It may be.

(Bundle of tariffs previously marked for identification received in evidence as Exhibit Number 4 of this date.)

Mr. McCollester: In the second place, the large box, which is the record before the Commission, has not been given a number because its contents have not yet been completed. But it seems to me it might be appropriate to give it a number and we may have it received on the understanding that when the American Railway Express delivers the documents they will be put therein.

Justice Chase: That may be done, and we still give it the next number.

(Large box containing records before the Commission marked Exhibit Number 5 for identification of this date.)

Mr. McCollester: Then it is in evidence?

Justice Chase: It is.

(Large box containing records received in evidence as Exhibit Number 5 of this date.)

[fol. 1384] Justice Chase: Is there any objection to the proposed order? (No response) There being no objection, the order is granted.

[fol. 1385] Mr. McCollester: May it please the Court, before I begin my argument, I would like to mention once more, because this may be the last occasion, the matter of the box containing the record before the Commission. We [fol. 1386] are preparing a list of the contents of that box for convenience, if anybody so desires, but in so doing it has been discovered that for some reason in transit between the Commission's office in Washington and my office in New York, one set of five exhibits that were sent down to Washington, so far as we know because we checked them when we sent them down, were not certified and sent back. Those are exhibits number 71 to 76. I guess that is 6 exhibits, 71 to 76 inclusive.

I have here, and with the consent of other Counsel, will insert my own copies of those exhibits which are not certified, but I will say that they are copies of the exhibits as filed at that time, and that will in that may make the record complete on that point.

Mr. Miller: That is entirely agreeable to us, Your Honor.

[fol. 1387] IN UNITED STATES DISTRICT COURT

STATEMENT OF EVIDENCE

Justice Chase: I understand that the Counsel for the Western Railroads has some evidence to offer at this time.

Mr. Smith: Yes, Your Honor.

Justice Chase: It will save time to go ahead with that.

Mr. Smith: I will call Mr. L. R. Capron.

LAWRENCE R. CAPRON, called as a witness and being sworn testified as follows:

Direct examination.

By Mr. Smith:

Q. Please state your full name residence and occupation.

A. Lawrence R. Capron, Evanston, Illinois; Vice-President of the Burlington Lines.

Mr. Miller: May it please the Court; The Government is going to object to the introduction of any evidence at this time. We think under the cases it is clearly inappropriate and I would like to be heard on the subject.

I think the law is fairly well settled that new evidence cannot appropriately be offered in a proceeding of this kind to review the order of the Commission. I do not think it will be necessary for me to go into it at length, but in the Tagg case, 280 U. S. the Supreme Court said that a "Proceeding under Section 316 of the Packers and Stockyards Act is a judicial review, not a trial *de novo*. The validity of an order of the Secretary, like that of an order of the [fol. 1388] Interstate Commerce Commission, must be determined upon the record of the proceedings before him—his findings must be accepted by the Court as conclusive, if the evidence before him was legally sufficient to sustain them and there was no irregularity in the proceeding. To allow his findings to be attacked or supported in Court by new evidence would substitute the Court for the administrative tribunal as the rate making body.

In the L. and N. Case, 231 U. S. it was stated that the Commission would become a mere instrument for the purpose of taking testimony to be submitted to the Court for their adjudication.

I do not think there is much dispute about that being the general proposition of law. In the National Broadcasting case, as late as 319 U. S. the Court said "Trial *de novo* of the matter heard by the Commission and dealt with in its report would have been improper." That was stated in litigating the question as to whether it would be appropriate to allow other evidence to be introduced.

Now there is another question in this case which makes it particularly, I believe, clear that no evidence should be introduced by the Western Carriers who here are trying to introduce it. There were motions for re-opening and re-[fol. 1389] consideration filed before the Commission by the Western Carriers in this case. There was no offer at that time to introduce any new evidence before the Court to aid it in reaching its decision. In that petition filed by those Western Carriers now seeking to introduce evidence this statement is made: There is no necessity for rehearing in this proceeding as long as the issues are restricted to the territory originally involved.

In other words where evidence is withheld from the Commission which is deemed vital to the issues of confiscation or any other issue it cannot be re-presented to the Court in the first instance like this.

Then there is another point I think that is absolutely decisive in this matter and that is the question on the way the confiscation is claimed which I assume from advice of Counsel is the matter on which they are offering this evidence. If I am wrong, correct me on the subject. Confiscation allegations are made attacking the order of the Commission and are subject to very strict rules. It is true there is a better chance of getting in evidence in confiscation cases in this kind of proceeding than anything else. I think the waiver, or whatever you may call it, of the position taken by these carriers before the Commission has to be decisive in this case, but there is another doctrine [fol. 1390] which would take this out of this class on the basis of allegations made. That is, they have alleged confiscation collectively by this group of carriers. There are two cases that squarely hold that the Court cannot hear evidence on the subject of confiscation when the allegation is a collective allegation that it will cause the joint Plaintiffs to be in a position where it will be confiscatory, that it will cost this carrier so much, Furthermore, it hasn't alleged a direct confiscation.

Now the Aetna Insurance case, 275 U. S. is one of the cases I speak of on the subject of collective allegation. There the Supreme Court said: "It has never been and cannot reasonably be held that State-made rates violate the 14th Amendment merely because the aggregate collections are not sufficient to yield a reasonable profit or just compensation to all companies that happen to be engaged in the affected business."

To the same effect in the Beaumont, Sour Lake and Western Railway case, 282 U. S. where the Court again pointed out that it is the impact of rates on a particular company, a particular plaintiff involved and it cannot be any charge that all the railroads in the area or all the companies engaged in a particular business, that the rates [fol. 1391] would be consistatory; obviously they are not all in the same situation. The cases hold that in confiscation the basis for the introduction of evidence has to be followed and have to state the facts on which the confiscation allegation is premised. In this case there is no such statement. There is reference on the report of the Commission that it will cost the railroad a certain number of dollars and that is all there is in the way of such an allegation.

On the subject of confiscation we expect to present to the Court the merit in a confiscation argument which I do not think would be appropriate here at this time on the preliminary question. However, there is a serious practical question about introducing new evidence at this time on confiscation. This case is a rate case. I might way that the principal matters which are the subject of testimony before the Commission were rates and costs and revenues and rates of return, as are quite natural in the rate case. These L. C. L.,—less carload lots—on which evidence of confiscation was based represent only a small part of the traffic involved here. It is under two per cent of the traffic. A good deal of that traffic is not class rate. There is every reason I think for Counsel for the Government to file with this Court objections as to taking any new evidence at this time. It will require elaborate evi- [fol. 1392] dence on the whole subject of rates and spread of the rate burden and on the question of costs. There were dozens and dozens of witnesses and thousands of pages of testimony in this record on the subject of costs, rates and revenues, and all of these matters will have to be gone into I am afraid if the subject is opened up in this court.

We submit that the law is entirely clear that this should be a judicial review on narrow grounds, and not a trial *de novo.* If the whole question of rates is opened at this time this would be a matter that would take weeks or months. I am not suggesting that as a reason why the Plaintiffs shouldn't introduce the evidence, but I think they have to make an extremely clear showing that this matter should be gone into.

We submit that evidence should not be received at this time.

[fol. 1393] Mr. Knowlton: I just want to add that, I want to concur in everything that Mr. Miller said, but in addition I want to point out that it is a very general thing, complaints against the Commission's order through general allegations of confiscation. And the decisions held, the Aetna case, and various others that the allegations, not only the showing but the allegations of the complaint must be sufficiently specific to show and indicate what the proof is and what will be called for.

These allegations here are general. That Mr. Miller says. And are predicated largely on cost study of Dr. Edwards which showed that except this L.C.L. and except the South was carried at a loss. But as explained, the Commission's supplemental report, these were L.C.L. traffic figures for all and not just first class handled traffic, and I think they also include what they called these exception rates.

It is also true that the Commission allows and expects these carriers under this order to work out economics in many ways. All that has nothing to do with this showing of cost and it doesn't show just what Mr. Smith says in his complaint does show. But mainly I want to emphasize [fol. 1394] the allegations in order to warrant the Court in taking the evidence and exception to know that there will be some possibility of making specific showing.

Mr. Norman: If the Court please, counsel might better have all the points made before he replies. I would like to call to Your Honor's attention the allegations of the petition which reads as follows:

"The cost studies offered in evidence by the Commission and upon which the commission relied ordering reduction of plaintiff's rates, or that the rates prescribed by the

Commission, the cost study for the Commission show—" and then he concludes, saying, "It is thus established on the face of the reports that enforcement of the Commission's order will result in confiscation."

There is no allega[illegible]y place that the confiscation is a fact, only that [illegible] appears from the cost studies or appears from the Commission's award. There is no prayer that this Court find the rates confiscatory.

So counsel was not put on notice that there was going to be any claim here that in so far as it appears from what is already in the record that these rates are confiscatory or that any evidence was going to be offered to that effect.

[fol. 1395] Mr. Smith: If, as Mr. Norman says, they were not on notice, they have done very well on these arguments.

The report of the Interstate Commerce Commission is part of the record and before this Court. In this case there was one case—there was one cost study offered and it was offered by the Interstate Commerce Commission, or perhaps to be more technical I should say it was offered by the cost accountant of the Interstate Commerce Commission. That study was prepared by Dr. Edwards of the Interstate Commerce Commission, who is the Commissioner's chief cost alalyst. It was rather a lengthy study and the Commission deals with it at great length in its report in this case and relies upon it and says that it relies upon it. It says that it feels that that cost study has such elements of accuracy as to warrant the Commission in relying upon it.

Now they analyze it at considerable length——

Justice Chase: Let me interrupt you for a moment please.

Mr. Smith: Yes.

Justice Chase: I don't know what you propose to introduce yet. But do you agree with that part of the question of confiscatory effect of the order changing the rates, that that evidence would be admissible?

Mr. Smith: Your Honor, I don't agree with that, but my [fol. 1396] disagreement with it is purely an academic one. I am only proposing to offer evidence going to the question of confiscation.

I might explain that by saying, as I understand the rule it has been observed in the courts from the beginning. It is this: We say where it is proposed in court to offer evidence that was not placed before the administrative body, the question as to the admissibility of that evidence is offered and is for the sound discretion of the Court. But, however, where the evidence that is proposed to be offered because of the confiscation question, then it is the duty of the Court to hear it for the basis of its judicial determination which it must make apart from action taken by the Administrative body and by the Congress itself. The Court should hear that evidence in order to discharge its own duty on that point.

Now after analyzing it over considerable length these cost studies on less than carload traffic, and as the Court has in mind, that is the traffic that moves in quantities or weights which moves in less than a full carlo-d, and is commonly called in the railroad business less that carload [fol. 1397] traffic.

The Commission after referring to these cost studies and analyzing them says this:

[fol. 1398] "Such an analysis unmistakably reveals the fact that less than carload traffic generally of all of the parties is not bearing its proper share of the cost of transportation. In fact excluding wartime rating, it is not yielding on the average its out-of-pocket cost plus constant expense solely related to this traffic, plus the cost of collection and delivery in any territory except possibly in the South where the margin of difference between revenues in these expenses is slight".

After thus commenting on its own cost analysis and saying that in the East and the West the existing rates are not sufficient to cover the costs of handling the L.C.L. traffic, the Commission proceeding to establish the uniformity which it feels Congress required it to make, proceeds to increase the rates in the east and thus somewhat reduce the deficit there, and to reduce the rates in the West and thus to increase the deficit.

Now there is a case that Mr. Miller didn't refer to on the question of confiscation except rather tacitly he said he thought we had our better chance on the issue of confiscation to offer evidence. I take it he was referring to B. & O. vs. U. S. 298 U. S., beginning at page 349. In that case the Carriers moved before a three Judge Court to set [fol. 1399] aside an order of the Interstate Commerce Commission. They allege confiscation. The Government objected to the admission of that evidence and they were overruled in the District Court and the evidence was taken and the case went to the Supreme Court of the United States and they persisted in their objection so that the Supreme Court ruled on that point. The Supreme Court says this:

"A just compensation clause may not be evaded or impaired by any form of legislation against the objection of the owner or private property taken for public use, the Congress may not directly or through any legislative agency finally determine the amount that is safe-guarded to him by that clause. If as to the value of his property the owner accepts legislative or administrative determinations or challenges them merely upon the ground that they were not made in accordance with statutes governing a subordinate agency, no constitutional question arises."

Justice Chase: Please don't read at length.

Mr. Smith: I was not going to. I have four lines more.

(Continuing) "The due process clause assures a full hearing before the Court or other tribunal empowered to perform the judicial function involved. That includes the right to introduce evidence and have judicial findings based upon it."

[fol. 1400] Here is another sentence.

"No Act of Congress requires Carriers, in advance of suit to set aside divisions or other orders, to petition the Commission for re-hearing, repeal or modification" which is a very precise answer to one of the points raised by Mr. Miller.

And here are two sentences, if you please, and I shall be through with the case:

"Appellants appropriately invoked judicial power to obtain constitutional protection against the Commission's order. The District Court rightly held them entitled to introduce evidence in addition to that contained in the record before the Commission, and rightly proceeded, upon consideration of all the evidence, to make findings and, upon the bases of the facts that it found, to decide upon the Constitutional question".

Now the Government raises what it seems to me to be an extremely finespun point of pleading. They say that there is no individual allegation that refers to each of these petitioners. Now the intent of this petition, and if it is not clear, I ask leave to amend it. The intent of this petition obviously is that every petitioner is saying on his own behalf and his own account every work that is in this petition. It seems to me a little bit extraordinary that after the Commission [fol. 1401] had relied upon a cost study which deals with the carriers as a group and based upon that cost of study they find the evidence sufficient to reduce the rates to each and every one of these petitioners, that then when the petitioners come in and allege on that very showing that confiscation has been experienced, then the suggestion is made there ought to be a showing with reference to each.

Now that goes to the merits of the question of compensation and not with the point that we are dealing with on this conjecture. But I do want to deal with its specifically. I want to call the Court's attention to the two allegations in this petition on this subject, of which Mr. Norman read one. The first one appears on page 14. This is page 17. It says:

"The Commission's reports and orders, exhibits 3, 4 and 5 are unlawful, are beyond the statutory power of the Commission, and beyond the power which it could exercise in accordance with the Constitution of the United States."

Every petitioner in this case is saying that to this Court.

And then after the other petition which Mr. Norman, the other paragraph which Mr. Norman referred to, this is the cost study and the order based on it which are before this [fol. 1402] Court. They are part of the evidence and we say that that portion of the evidence before the Court establishes a taking of a property for private purposes without just compensation and a deprivation of due process. Every petitioner says that.

[fol. 1403] I don't think that it is necessary, under the rules and procedure which we are following here, to seek the Court's leave in the light of this objection instanter to amend this petition and to amend our intervening petition in the Northern States case by inserting therein at some point the statement that all these allegations in the petition of intervention and in the petition here generally and severally made, and that is made on behalf of each petitioner, May I have that?

Justice Chase: Any objections?

Mr. Miller: If the Court please, I don't think it is as simple, quite as simple as that. In this case each carrier alleges that ——

In the L. & M. case where an allegation of confiscation was held insufficient to permit the introduction of the Commission's testimony.

These allegations have to be specific. They can't be general allegations, and it doesn't make it much better to make it a collective one, although the collective was won in two Supreme Court cases on that very point alone.

Mr. Smith: We are discussing the admissibility of evidence and my friends are judging the merits of confiscation, [fol. 1404] They said that they had no objection and they haven't asked for a bill of particulars. As a matter of fact they said that they didn't want one, and they know perfectly well what is involved here.

Justice Chase: You better get the pleadings straightened out first. You may have leave to amend as suggested. The sufficiency of amendment cannot be passed on now. Now, having given that leave to amend, is there anything that demands further attention?

Mr. Miller: I don't think so, Your Honor.

Justice Chase: Then we will treat the pleadings as though they were now amended as proposed. Is there anything more to be said on the question of the admissibility of the evidence?

Mr. Miller: I have just this one further thing to say: I think the only viewpoint that has been interjected is the B. & O. Case, and as I understand it, as I understand the B. & O. case, the Commission refused to receive evidence bearing on the question of confiscation. That obviously was a clear case where the reviewing court had power to file it. I don't have the B. & O. here. It was 574. I think it has all been touched upon in the other portions, but this case is so [fol. 1405] distinguishable, so clearly distinguishable that there is no question about it. Not only was there no evidence to introduce, but the plaintiffs said there was no more evidence to introduce, the record was as complete as they could make it. It doesn't seem fair to start presenting more witnesses, introducing more evidence, in one of the most complicated cases. This is one of these, this is one of the most complicated cases.

Mr. Smith: May I make one statement which I think I was remiss in telling to the Court. I think Mr. Miller might be apprehensive that the Court may object. This evidence that the Western Lines will offer should take on direct about one hour or maybe a little longer. It is such, that if the

Government undertakes to oppose it, but I think that they will not after they have heard it, I don't think that they would take over a half hour in that connection, if the Court would agree to hear me.

I would like to say something on the B. & O. case or, in reference to comment on the B. & O. case. In the first place, the Court made it very clear, as the statement read shows, that it doesn't make a particle of difference where the fair compensation provisions of the Constitution are invoked, [fol. 1406] whether there has been any offer to the Interstate Commerce Commission or not.

Now, of course, we don't know whether the Commission was going to confiscate our property before it made the decision. We discovered that afterward. We did go back on application for rehearing, and we did call to the Commission's attention the fact that they had confiscated our property. That was before the Commission. It was not necessary to do that under the decision of the B. & O. case.

Mr. Smith: Now, Mr. Miller has said that there has been a change in the trend of Supreme Court decisions, and that this was a 5 to 4 decision. What the Court divided on was this, essentially: In that case the Commission had fixed joint through rates. The carriers did not take that order to court; they accepted it, they effectuated it. Thereafter, the Commission, by order, fixed the divisions of these joint through rates, that is to way, it determined how much of those joint rates should go, that is, how much of the revenue should go to the Sout[illegible] lines and how much to the Northern lines. It was after that second order, fixing the divisions that then the carriers came in and said that their property had been confiscated. Justice Brandeis took the [fol. 1407] position that they should have come in and made their application when the rates were fixed, because it was essentially the leveling of the rates which caused the contention. Now, that, I say, was essentially the bases for the application to the Court. It may be that Mr. Brandeis felt, under the circumstances that the evidence should not be received by the District Courts but the majority thought that it should have been.

Justice Chase: We are all agreed that the better way would be to take this evidence subject to a motion to strike, and we do that on your assurance that it won't take very long.

Mr. Smith: I have two witnesses. This is the shorter of the two. I don't think it would take over an hour or an hour and a half.

By Mr. Smith:

Q. Of what department——

Mr. Miller: Just one moment; excuse me. If the Court please, I don't know what this evidence is going to cover and I don't think we will be in a position to cross-examine the witness at this time, and I don't know whether we can [fol 1408] do it later, that is, if we can't cross-examine at the close of the direct examination.

Justice Chase: We will take care of that, Mr. Miller.

By Mr. Smith:

Q. Of what department of the Burlington are you head?

A. I have direct charge of the traffic department.

Q. What railroads comprise the so-called Burlington Lines?

A. The Chicago, Burlington, The Quincy Railroad, The Colorado and Southern Railway, The Fort Worth & Denver City Railway, and the Wichita Valley Railway.

Q. Are these lines operated as a system?

A. Yes.

Q. What is your railroad experience, what has been your railroad experience up to this time, briefly?

A. Why, I started with the Burlington Railroad in 1902, stayed with them one year, and then went to one of the parent lines of the Burlington, the Northern Pacific, in the traffic department of the Northern Pacific, for 34 years. In October of 1937, I came back to the Burlington as assistant vice-president, and I have been vice-president since November 1, 1938.

Q. What *was* your responsibilities or what are your responsibilities as chief traffic officer of the Burlington Lines?

A. I have charge of the freight and passenger traffic departments and the department of industry and agriculture.

[fol. 1409] Q. Now, in what states of the United States do the Burlington Lines operate?

A. Minnesota, Wisconsin, Illinois. Iowa, Missouri, South Dakota, Nebraska, Kansas, Montana, Wyoming, Colorado, New Mexico and Texas.

Q. Do the Burlington Lines operate in each of the three rate zones in Western territory affected here, the zones which are affected herein, namely Zones 1, 2 and 3?

A. It does.

Q. Does the Burlington handle class rate traffic, that is, both carload and less than carload freight?

A. Yes.

Q. What is less than carload traffic?

A. The less than carload traffic consists of individual packages or shipments of a quantity less than the required minimum weight for a full carload.

Q. Is that sometimes called merchandise traffic?

A. It is.

Q. And would you say that there are a few or many of these different kinds of items which are moved in the territory that you have referred to in less than carload quantities?

A. Yes.

Q. Can you characterize that for the benefit of the Court, as to whether many or few have moved in less than carload quantities?

[fol. 1410] A. Oh, a vast number of commodities, if I understand your question correctly, just myriads, just everything that is shipped, practically, moves at some time or other in less than carload quantities.

A. Does all less than carload traffic move on class rates?

A. No, some moves on classification exception, and then there are some less than carload commodity rates.

Q. Well now, state, if you know, whether, with reference to that portion of the less than carload traffic to which you have just referred, that doesn't move on the class rates, whether or not that character of traffic is handled in the same cars and receives exactly the same service as the less than carload which moves on the class rates?

A. It is handled in the same car and equipment, and it is given the same service. Sometimes it moves in the same cars.

Q. Are you familiar with the experience of your road, and, generally, with that of the group of railroad*ing* operating in the same territory in respect to the carloading of less than carload traffic?

A. Yes, in a general way.

Q. I call your attention to the fact that the record in this proceeding before the Commission, and now before the

Court, shows that the average loading per car of less than carload traffic in the Western District for the year 1939 was 4.3 tons per car. Now, state, if you know, whether the [fol. 1411] average loading of that traffic for the Burlington and for the lines operating in the territory in which the Burlington operates do operate or did operate at that level in the years prior to 1939?

A. Yes, it was close to that range.

Q. And by "close" do you mean, within a half ton or a ton, or what do you mean by that, Mr. Capron?

A. Well, I would say in the period, 4, 5, 6 years prior to 1939, the individual averages of the principal Western lines, individual average carloading of so-called merchandise traffic ranged from about two tons to 4.8 tons.

Q. Now, the average loading of this type of traffic has been higher in previous years?

A. Yes, it had. I don't know just how much, I haven't the figures as to all traffic, but I know the Burlington's merchandise loading of recent years, the average was a little higher than that of some of the others, and going back to the peak year, which was 1929, the peak traffic year, the Burlington merchandise loading in that year was 7.2 tons. That is, 1929.

Q. Do you know the reasons for the decline in the part carload loading of L. C. L. traffic over those years, around 1929, we will say, down to the level of 4.3 tons, which was the average that Dr. Edwards found to exist in the test [fol. 1412] year of 1939? Do you know the reasons that caused that decline?

A. Yes.

Q. What were they, in brief?

A. Well, the principal reason was the large amount of that class of traffic which, of course, pays the highest rate in cents per hundred pounds, that was taken from the railroad by the trucks. Truck companies took away a very substantial amount of that tonnage. Then, in addition to that, in our efforts to meet that competition, we endeavored to speed up the handling of merchandise, and that meant that we set up schedules for merchandise cars and, thus, we would run those cars every day and not hold them for a full load or approximately a full load.

If you had a merchandise car set up and you had a thousand points, only had a thousand pounds for it, you would let it go on that day: whereas, in the old days, if we only had a thousand pounds, we might hold it a day and wait until we got a little more tonnage, until we got more tonnage, before we let it go.

Then there is another matter that has had a very substantial effect on the merchandise loading, and that is the broadening of so-called carload mixture, broadening of mixtures of different items, that are permitted to move under the carload rate.

Additionally, we have, in recent years, established quite [fol. 1413] generally throughout the country, so-called commodity rates under which you could get a carload rate subject to a certain minimum and load everything and anything with a few exceptions, such as freight that would contaminate other freight, or explosives, things of that kind, with those few exceptions you could load almost anything into a carload and get the all-commodity rate that has been established.

Now, those rates, the proper mixtures and the all-commodity rates have been used by the so-called forwarding companies with the result that in recent years a very substantial source of what was formerly less than carload freight has been combined and shipped, combined by forwarders and large shippers and shipped as carloads, taken out of this less than carload classification. All of that has tended to reduce the average loading of our less than carload freight.

Mr. Smith: Now, Your Honors, I would like to make a statement to the Court at this juncture, before I ask the next question. I have called to the Court's attention the statement of the Commission with respect to its conclusion on L. C. L. traffic, that, excluding wartime loading, this traffic was not yielding its cost.

[fol. 1414] In 1942 the Director of the O. P. T., the Office of Defense Transportation, issued an order. It was his Order No. 1. It was issued, I think, in March. I have a copy in my hand, as reported by the Commerce Clearing House. I shall read, if I may, just one or two statements in that order.

"Section No. 500.2. Loading of cars," is this: "No carrier by railroad, on and after the effective date hereof, shall accept for shipment or forwarding, load or forward from the City or Town at which such car is originated, any railway closed car containing less than ten tons of merchandise except:"

And then there were certain exceptions, which have not, however, proved in the aggregate to very much effect the carloading.

[fol. 1415] Mr. Smith: Well apparently it was necessary somewhat to push you and there was a change in loading to 3.2 tons, so the Director of Defense Transportation, Joseph B. Eastman, made this order:

"Between May 1, 1942 and July 1, 1942, a minimum load of six tons per car may be observed in lieu of the load of 10 tons per car otherwise required by sections 500.2 and 500.2A.

Between July 1, 1942 and September 1, 1942, a minimum load of eight tons per car may be observed instead of a minimum load of ten tons per car required under the provisions of Sections 500.2 and 500.2A."

In effect there was a graduation up to 10 tons rather than a precipitous rise to 10 tons.

Then the Director issued a public release at that time in which he called attention to the fact that during the year 1942 the Intercity Cars on the average contained approximately 5.3 tons. And he said that the peddler cars contained about one and one-half tons.

I thought the Court ought to have this in mind, and perhaps I should say to the Court that under Dr. Edwards costs and Mr. Nolton I am sure will not question this, that it makes some difference in Dr. Edwards costs as to the amount loaded in a car. It costs more to handle 4.3 tons [fol. 1416] than 10 tons. In this public release the Director of the O. D. T. said:

"I am not unmindful that the effect of this order may in some instances cause inconvenience to the carriers involved, including the railroads, the motor carriers and water carriers, and possibly also to the shippers of L. C. L. I rely on the patriotism of carriers and shippers who will be affected by this order to cooperate in the highest possible degree in making it effective even though it may temporarily appear adversely to affect them."

Now it was a war order and of course it was observed and the railroad held the cars until they obtained a loading of 10 tons. Now that order is still in effect. I am unable to say to the Court and I do not profess to know when that order will be withdrawn. It is still an outstanding order of the O. D. T. Colonel Johnson, now the head of O. D. T., testified before the Appropriations Committee in connection with the deficiency appropriation Act of 1946 as late as February 6th, this month, and Colonel Johnson said: "You will recollect when I was here I not only told you that the O. D. T. would be through by the last of June, but by April, and perhaps by March. All of these railroad people would be through. I ask also that I be allowed to keep 40 Service Agents in the I. C. C. I am still hoping that [fol. 1417] we may be able to disband the railroad part of O. D. T. by the last of June. I want enough money so if necessary I can keep the railroad part of O. D. T. running to June 30th, and the 40 Service Agents of I. C. C. through June." My understanding is that some additional appropriation was allowed to the O. D. T., and that indicates to me, rightly or wrongly, that the railroad part of O. D. T. is over at the end of June, but it will have some further activities perhaps in connection with trucks or some other activities.

By Mr. Smith:

Q. Mr. Capron, the Commission refers in its report to the order of Defense Transportation, issued in 1942, prescribing a minimum per car loading of less than carload traffic. Are you familiar with that order to which the Commission refers?

A. Yes sir.

Q. What was the result of that order of the Office of Defense Transportation on the less than carload loading per car?

A. Well it was an order that had to be complied with and its terms showed the result. It more than doubled what was the average loading per car in the early part of the year.

Q. Have you given consideration to the handling of L. *D.* L. traffic in competition with the trucks and the railroad with which you compete in the Western territory after the expiration of that order?

A. Yes sir, we have given a great deal of consideration to that.

Q. What if any conclusion have you reached as to the [fol. 1418] action which your road must take with reference to the per car loading of L. *D.* L. traffic?

A. We have decided that we will not only fight to return to pre-war practices that have been described but will have to go even further in the way of putting on fast merchandise schedules and more so called through cars; that is, point to point cars of merchandise which do not stop at any place between the point of origin and the final destination to unload or pick up other merchandise. It is known in railroad parlance that it will mean a scheduling of additional through merchandise cars.

Q. What will be the effect of those operations that you say you will be obliged to use on the per car loading of merchandise traffic?

A. Well that will hold down the average load per car, necessarily.

Q. You have referred to the several factors which cause the drop in per car loading on the level which it attained in 1929 or thereabouts, to the 4.3 tons, which was the average loading in the days of say 1939. What would you say as to whether any of those factors would be absent or would operate with diminishing severity as soon as this O. D. T. order, or after the order had been revoked?

A. None. They will all be present in the period that is ahead of us after the expiration of the O. D. T. order, and it may well be that it will return with greater intensity than before.

Q. What is your judgment in the light of those factors as to how the loading after the withdrawal of this emergency [fol. 1419] order will compare with the 4.3 tons which represented the loading just prior to the war?

A. Well I don't believe; in fact I am sure we cannot count on anything very much in excess of that pre-war loading because if there should be a general pick-up in the volume, or put it another way, if the volume should be greater than that which we had in the prewar period, that is going to be offset to a considerable extent by these plans which we are making and which I know the Western lines are making, to speed up merchandise service and increase the number of through merchandise cars. It is admittedly possible that if we have prosperity that the average loading might overcome that factor which I have just mentioned and be slightly higher that that of the pre-war period, but certainly it would be not more than slightly higher.

Q. Well will you interpret that "slightly" as being a ton, or five tons, or one-half ton, or what is your best judgment about that?

A. Well I think five tons or maybe 5.1 or 5.2 would be about the best we would have any reason to hope for.

Q. Do you compete with some railroads in the Western District as well as with the trucks?

A. Yes sir.

Q. Can you state whether your rail competitors in the West will be in any different position in respect to this matter of operation of the Burlington, as you have stated?

A. They will not. They have the same competition to [fol. 1420] meet as the Burlington.

Mr. Smith: May I have an exhibibt identified please?

(List of commodities, etc. marked Exhibit Number 1 for identification of this date.)

By Mr. Smith:

Q. Handing you exhibit 1 of the Western lines, for identification, which purports to be an extensive list of commodities, I ask you whether it correctly shows the items in the presently effective consolidated freight classification number 16, and supplements thereto, rated fourth class, column 55, less carload quantities in Western classification territory?

A. Mr. Smith did you complete your question? This statement shows,—the statement I have before me—shows the items rated fourth class in less than carloads on which no commodity or exception ratings apply.

Q. Yes Mr. Capron.

A. As I understood your question to me you made it all inclusive and didn't refer to that.

Q. I thought I drafted that question from this heading. I will take a look at it.

Let me ask you Mr. Capron if exhibit 1 for identification of the Western roads correctly shows the items in consolidated freight classification number 16, and supplements thereto, rated fourth class, column 55, less than car load quantities in Western classification on which no commodity or exception ratings apply?

A. It does.

Justice Chase: If this will be a convenient time, suppose [fol. 1421] we take a recess for ten minutes.

Mr. McCollester: May I inquire what the Court's pleasure is as far as hours?

Justice Chase: Judge Knox and I were just talking about this and we thought we would adjourn about one o'clock until two o'clock and sit until four or four-thirty, four-thirty perhaps.

The Clerk of the Court: This Court is in recess for ten minutes.

(Recess taken. Case resumed after recess same date and same place.)

By Mr. Smith:

Q. Mr. Capron, the transcript has gone and I am not sure whether I asked you whether or not it is true as stated in the caption of exhibit number 1 for identification that none of the items enumerated therein move on commodity or exception ratings but all are subject to the class basis move when they do?

A. That is true, to the best of my knowledge and belief. The statement has been carefully prepared and carefully checked.

Q. State if you know whether there is a substantial movement of a great many of these commodities in less than carload quantities on the basis of 55% of first class in Western trunkline and Southwestern territories.

A. There is.

Mr. Smith (To the Reporter): Will you mark this as an exhibit for identification.

(Chart marked Exhibit Number 2 for identification of this date.)

[fol. 1422] By Mr. Smith:

Q. Handing you exhibit for identification of the Western roads, number 2, which purports to be an extensive list of commodities, I ask you whether it correctly shows the items in the presently effective consolidated consolidation which are rate 3 class, column 70, on the less than carload commodities, on which any commodity or exception rates apply?

A. It does to the best of my knowledge and belief.

Q. Is it true, as the caption of the exhibit indicates, that none of the commodities move on a commodity or exception ratings without moving in less than carload ratings?

A. It is also true, to the best of my knowledge and belief.

Q. State whether you know there is a substantial movement of a great many of these commodities and less than carload quantities at prices of 70% in Southwestern territories?

A. There is.

Q. Is there any major railroad other than the Burlington which rely, the Burlington relies for its revenues exclusively on its operations both in Western trunklines and Southwestern territory, which is not now and had not been in receivership or bankruptcy for the last five years?

A. I know of no other major railroad operating in both territories that have not been in some sort of a receivership or bankruptcy proceeding within the past five years.

Mr. Smith: That concludes Mr. Capron's direct testimony.

Justice Chase: Are you prepared to cross examine him?

Mr. Miller: I wonder if we could reserve until after the [fol. 1423] noon recess.

Justice Chase: Yes you may.

Mr. Smith: You may step down Mr. Capron.

Mr. Norman: If Your Honor please: I think I could probably cross examine this witness if I be permitted.

Mr. Smith: It is with the pleasure of the Court.

Cross-examination.

By Mr. Norman:

Q. Mr. Capron, what percentage of less than carload traffic in the Western District and between the Western District and the other Districts moves at rates other than the class rates here involved?

Mr. Smith: Just a minute if you please. If Your Honors please, quite apart from the time element involved, which is not particularly important to me, that is objected to as not proper cross examination. This witness has been on the st*na*d to testify, to three things: one to throw light on the question as to what this carloading is going to be in his opinion and as a result of his studies after this emergency order is withdrawn. That is one thing. He has testified also that there is a movement of traffic on these particular L. C. L. rates which we say are con*sis*t*atory. It is not just an academic question that there is movement of traffic on these rates.

The third point he made in response to my question was [fol. 1424] that the railroad, that is the Burlington Railroad and a great number of railroads operating in those two territories, that the Burlington is the only major railroad which has escaped bankruptcy. That is the only road which relies exclusively on the revenues it must make in this territory.

I suggest that this question goes outside of the scope of any direct examination.

Mr. Norman: If the Court please, the witness has testified as to certain traffic that does move on these L. C. L. class rates. But the allegation here is that it appears on the face of the Commission's report that these rates are consistatory. Now it is important to know from the witness what L. C. L. traffic included in that statement by the Commission does not move as to the rates here involved.

Justice Chase: We think it is proper cross examination, but we are not disposed to go into that in great detail.

Mr. Norman: No, I am not Your Honor.

By Mr. Norman:

Q. Will the witness answer?

A. I am not sure that I understand what you are talking about. If I caught it correctly you are talking about something, some statement in the Commission's report and you want to know percentage.

Q. I am asking you if you know what percentage of less than carload traffic in your territory moves on rates other than class rates?

A. No.

Q. You have no idea about this?

A. I say I do not know.

Q. The rates that are established on articles and com- [fol. 1425] modities that are taken out of the classification are generally lower than the class rates; are they not?

A. Yes.

Q. The condition in this report admonished you to give consideration to raising those rates on less than carload traffic other than the class traffic. Have you made any consideration, have you given any consideration to them?

Mr. Smith: That is objected to as incompetent.

Justice Chase: He may answer that.

The Witness: Yes.

By Mr. Norman:

Q. What have you done about it?

A. Well if I have to answer a question of that kind, the answer is that we didn't think we had a ghost of a show and the conditions that had existed up to now of getting any rates up. The O.P.A. and a few other people are opposed to such things.

Q. But that traffic is moving at rates less than those rates that you he*ar* claim are cons*is*t*a*tory; are they not, and moving in the same cars, and being handled in the same way?

Mr. Smith: Excuse me, but that is not what you asked of Mr. Capron. In order that the Court understand, I think Mr. Norman asked this: Whether or not those Commodities which move on exception and commodity rates take rates lower than the rates which are now in effect on the class traffic, and now he is suggesting that Mr. Capron has answered that those exception commodity rates are still lower than the rates, rates which the Commission has prescribed.

[fol. 1426] Mr. Norman: I will put it that way.

By Mr. Norman:

Q. Aren't those exception and commodity rates generally lower than present class rates reduced by ten per cent?

A. No.

Q. You think they are not?

A. I don't say that some of them are not, but certainly not generally.

Q. Have you given any consideration to how much your revenues on less than carload traffic would be increased if you brought all of your rates up to the level prescribed by the Commission?

A. Our revenues would be decreased.

Q. For what reason?

A. Loss of traffic under normal conditions, not today maybe, not the condition the trucks are in today. We made those rates to increase our tonnage.

Q. But you are voluntarily maintaining many rates on less than carload traffic which are lower than the rates you here claim are cons*is*t*a*tory.

A. If you want to call it voluntarily you may.

Mr. Norman: That is all.

Justice Knox: Does the Acheson and Southern Pacific run through this same territory that you are speaking about?

The Witness: The Acheson runs through both territories, Southern Pacific runs into Southwestern territory.

Justice Knox: The Acheson has not been in receivership has it?

The Witness: No, it certainly has not. It certainly hasn't. I stand corrected there. I overlooked the Acheson.

Mr. Smith: You didn't overlook it in answer to my question Mr. Capron because the question was put to the witness [fol. 1427] whether or not there is any major railroad that relies for its revenues exclusively on its operations on these two territories, as a great many of course do.

The Witness: I have.

Mr. Smith: Which have not been in bankruptcy or receivership for the last five or ten years.

The Witness: That is right.

Justice Chase: Have you another witness?

Mr. Smith: Yes Your Honor. You may stand aside, Mr. Capron for the present.

Mr. Vivian.

Glenn F. Vivian, called as a witness and being duly sworn testified as follows:

Mr. Smith: The Western lines offer exhibits for identification 1 and 2, if you please, into evidence.

Mr. Miller: We object of course.

Justice Chase: Yes.

Mr. Miller: I don't suppose it is necessary to make an objection each time.

Justice Chase: That is the same objection. They are received.

(Documents previously marked for identification received in evidence as Exhibit Numbers 1 and 2 of this date.)

Mr. Smith: May I ask the Court what the practice is as to who has custody of the exhibits when they are admitted?

Justice Chase: I will inquire.

[fol. 1428] Justice Knox: The Clerk takes charge.

Direct examination.

By Mr. Smith:

Q. Please state your name and address.

A. Glenn F. Vivian, 516 N. Jackson Blvd., Chicago, Illinois.

Mr. Norman: What is the name?

Mr. McCollester: Vivian.

By Mr. Smith:

Q. What is your occupation?

A. I am Manager of the Statistical Bureau of the Western Lines, Chicago, Illinois.

Q. How long have you held that position?

A. Since 1937.

Q. Were you engaged in statistical work prior to that time?

A. I was. I was with the Milwaukee Railroad for 22 years.

Q. Engaged in that work?

A. Engaged in that work.

Q. What does the statistical bureau for Western lines—and what are your duties as manager?

A. The Bureau was organized in 1916 by the Western Railroads to prepare analytical statements of various kinds. My duty as manager is to prepare those statements.

Mr. Smith: Will you mark this for identification?

(Chart marked Exhibit Number 3 for identification of this date.)

Mr. Smith: May I place a copy of these, of this exhibit before the members of the Court.

Justice Chase: Yes.

By Mr. Smith:

Q. I believe you have in your hand, Mr. Vivian, the Plaintiff's exhibit 3 for identification. I will ask you if you prepared that exhibit?

A. I did.

[fol. 1429] Q. Who is Mr. Edwards who is referred to in the title of exhibit 1?

A. Dr. Ford K. Edwards, Head Cost analyst of the Interstate Commerce Commission.

Q. What is meant by the phrase "less than carload costs" in the title or caption of that exhibit?

A. The cost of moving less than carload quantities as determined by Dr. Edwards.

Q. Have you on this chart undertaken to picture a comparison between certain rates and certain costs bases?

A. I have.

Q. Will you look at the exhibit which you have in your hand, Mr. Vivian, and tell me whether the first un-numbered page refers to 55% in the caption?

A. It does.

Q. And does the second page which I shall refer to as page 2 refer to 70% in the caption in the same relative location?

A. It does.

Q. And does the third page refer in the second line of the caption to 10 tons per cost?

A. It does.

Q. Now turning to page 1 of exhibit 3 for identification, what does the solid black line on the exhibit represent?

A. The solid black line on the first page of the exhibit represents the fourth class scale of rates prescribed by the Interstate Commerce Commission with the interim order for zone 1 of Western trunkline territory.

Q. Referring to the form of that chart or economic set-up, will you explain what the horizontal and vertical distances mean?

A. Vertical distance- are cents per hundred weight and the horizontal is short line mileage.

Q. What does the broken line represent?

A. The broken black line represents 55% of the appendix 10 scale which has been prescribed by the Interstate [fol. 1430] Commerce Commission as just and reasonable for application to the territory from the Atlantic to the Rocky Mountains as embraced in the case, or a permanent basis.

Q. Do I correctly understand that the solid black line then represents the rate prescribed by the Commission in the interim order for application in zone 1 alone, but that the broken black line is a permanent rate found just unreasonable for this entire territory, west, east and south.

A. That is correct.

Q. Were you present at each of the hearings before the Commission in the class rate investigation of 1939 at which Dr. Edwards testified?

A. I was.

Q. Have you examined the exhibits in this record which were prepared by Dr. Edwards purporting to show the cost of transporting less than carload traffic in the Western territory?

A. I have.

Q. Referring to the solid red line, have you used Dr. Edwards' method of after figures in showing his cost basis for various points or distances?

A. I have.

Q. I call your attention to the Commission's statement at page 583 of its report, that the actual average rate of less than carload traffic in Western territory in the test year of 1939 was 4.3 tons, and ask you if on this exhibit you have depicted Dr. Edwards' cost basis for the average loading of 4.3 tons of less than carload traffic?

A. I have.

Q. What is the number of the Edwards' exhibit from which this information is derived?

A. Exhibit 13.

Q. What does the solid line represent?

A. The solid line represents Dr. Edwards' out-of-pocket [fol. 1431] cost based on 4.3 tons of L.C.L. freight moving in the Western territory with an allowance of 10% for security and 10% for pick-up and delivery service.

Q. Please explain the adjustment that you have made for the 10% security.

A. That Edwards recognizes in his study the security through the development of his costs because they are based on the operating movement which is usually longer than the short line mileage.

Q. Can you conveniently refer to the statement that Dr. Edwards made on that subject?

A. I can.

Mr. Smith: I wish you would read that answer back to Mr. Vivian, Mr. Reporter.

(The Reporter repeated the Answer.)

The Witness: As a consequence it is necessary to make an allowance for security.

By Mr. Smith:

Q. Now will you please refer to Mr. Edwards' statement on that subject?

A. At page 93 of exhibit number 12 of Dr. Edwards, he makes the following statement:

"The costs developed by the Bureau are based on the actual distance over which the traffic was handled. On the other hand mileage rate scales prescribed by the Interstate Commerce Commission are usually based on the short line mileage. This is the shortest distance over which the traffic can be moved without transfer of lading. If the actual distance exceeds the rate moving distance by 10%, the rate for any given freight line distance should be compared with the cost for a 10% greater margin. That is the rate for 100 miles should be compared with the cost computed for 110 miles."

[fol. 1432] Q. And that is what you have done in this solid red line?

A. That is correct.

Q. Now I will ask you if this is a statement in the report of the Commission that you referred to, on page 584: "Class rate traffic moves over routes which are probably 10% or more longer than the short line on which the class rate scales are based."

A. Yes, that is a quotation from the report that I had in mind.

Q. Now please explain the allowance which is reflected in the chart for pick-up and delivery service?

A. The pick-up and delivery expense of the Western territory, as found by Dr. Edwards, was divided by the tons of L.C.L. freight originating and terminating in the Western territory. This produced slightly more than five cents per hundred weight for either pick-up or delivery service. For the two services combined it was ten cents.

Q. Do you mean by your statement that Dr. Edwards did ascertain the total expense of the Western roads in the performance of pick-up and delivery service for the test year of 1939?

A. Yes.

Q. And that is the figure that you have used as you have indicated; is that so?

A. That is correct.

Q. Now referring further to these solid red lines, does that include any of the constant or fixed costs in the transporting of less than carload freight?

A. No.

Q. Does the Commission so state in its report?

A. Yes.

Q. Do you have in mind for the year 1939 the total expenses of the Western roads of that character; namely, constant or fixed costs of transporting of traffic?

A. No, I haven't right at the moment.

[fol. 1433] Q. Do you know what are the figures approximately. I will come back to that question.

A. All right.

Q. If I ask you if approximately it is three hundred and fifty million dollars would it refresh your recollection?

A. It sounds familiar, but I wouldn't say positively.

Q. Well I will withdraw that question. Do you know whether the cost of railroad labor, the cost of materials, supplies, and the cost of Federal taxes of the Western lines have increased since 1939?

A. Yes they have increased substantially.

Q. Are Doctor Edwards' cost studies presented in such form that you have been able to adjust his 1939 costs of handling less than carload traffic to increased costs which you just referred to?

A. They are, and I have done so.

Justice Chase: We might just as well take our recess now. We will take it for an hour and a quarter.

Mr. McCollester: May I inquire of the Court, just to facilitate things? The record before the Commission that we have has arrived, except one part that is still coming by express, but the main part of the record is here. We have it all in a box and the Commission certified it. They have certified it in bundles of exhibits. I think there may be ten or fifteen bundles. Would you want the whole thing marked as one exhibit, in which case we will leave them in the box, or should each bundle be marked, in which case we will take them out of the box? The box will be a convenient way to get them around.

Justice Chase: I think if you will leave it all in the box, that will be the better way to handle it.

Recess taken at 12:45 P.M. until 2:00 P.M. of the same date and at the same place.

[fol. 1434]

Afternoon Session
New York City, New York,
Monday, February 18, 1946, 2:00 P.M.

Presiding: Justice Harrie B. Chase, Justice Stephen W. Brennan, Justice John C. Knox, United States Judges.

Appearances: (Same as before.)

[fol. 1435] Mr. Smith: May it please your Honoes, Mr. Capron would be glad to be dismissed at the convenience of the Court and parties. He is here and if his cross-examination could be concluded that would be very satisfactory to us.

Justice Chase: Are you now ready to proceed with the cross-examination?

Mr. Miller: I am ready, Your Honor, yes.

Lawrence R. Capron resumed the stand and testified as follows:

Cross-examination.

By Mr. Miller:

Q. Mr. Capron, your Exhibits I and 2 which deal with items in the classification which you say do not move under commodity or exception rates, to what territory does that statement apply?

A. Western Trunk Line and Southwestern territory.

Q. Do you mean throughout those two territories none of these commodities move on exception or commodity rates for any hauls?

A. That is right.

Q. Who prepared those exhibits?

A. They were first prepared by the staff of the Western Trunk Line Committee. Then I had my own rate department make a spot check of the exhibits and they told me [fol. 1436] that they could find nothing wrong with it.

Q. The people working under you didn't attempt to go over all the items on that?

—. I think it was impossible for my staff to go over each and every item.

Q. Those exhibits then——

A. (Interrupting): I might inform you that I was informed that the Western Traffic Lines staff who undertook the initial work of preparing this for me did a pretty thorough job of checking.

Q. You don't know of your own knowledge whether those items moved on one kind of rate or another, and you are not stating that your own organization knows? What you did was to make a spot check of what some other organization made, is that correct?

A. Well, the Western Trunk Line organization is our organization, you know, as far as that is concerned, and the fact of the matter is that I know of my own knowledge that this exhibit is substantially correct. I cannot say of my own knowledge that some few things may not have been overlooked.

Mr. Miller: If, the Court please, I move to strike those *ex* two exhibits on the ground they weren't prepared under this witness' supervision and there is no one here whom I may cross-examine.

Mr. Smith: If your Honor please, if I may say a word, we have a record before this Court——

Justice Chase (interrupting): The motion is denied.

[fol. 1437] By Mr. Miller:

Q. You were testifying about the lots of less carloads and other matters on the Burlington, I believe. Were you purporting to testify about conditions on other roads also? That is, was your testimony confined when you are speaking of loads, of what your loads were, and your loadings in the future, was that testimony confined to the Burlington?

A. No.

Q. You are sufficiently familiar with conditions of the other roads so that you can testify about each one, is that correct; and what their policy is?

A. I didn't say each one individually; the major lines, yes.

Q. You said a substantial amount of the traffic moved on class rates in the Western territory. What did you mean by "substantial"?

A. Well, I mean just what the word implies. It is substantial. It isn't just a scattering movement. It is steady and fairly substantial movement.

Q. What percentage of total traffic?

A. Well, I cannot answer you in percentage definitely because no such interpretation has been made, but in my judgment it will be at least 50 per cent, and probably much more.

Q. That is an estimate, of course?

A. Yes, sir.

Q. Now you said that a good many commodities moving on L.C.L. had been lost to the railroads to cut competition [fol. 1438] and that a good deal of it also had been combined into carload movement by the making of all commodity rates and tariffs and other things, is that true?

A. That is true.

Q. Is the shift of that traffic away from less than carload rates because of the amount charged on class rate movements, in other words, have those rates been put in effect because higher class rate scales won't move the traffic?

A. That has been their—I will put it this way: that was their purpose when they were established.

Q. You mean the taking of them out of the classification and putting them in this other category, in these other categories is because the class rates were too high to move the traffic?

A. In competition with the trucks.

Q. Is the answer to that question yes or no? Were they taken out because the class rates were too high to move the traffic?

A. In competition with the trucks; I insist upon that qualification being in the record. It was because of the competition with the trucks.

Mr. Miller: I wonder if I can get a yes or no answer to that question?

Justice Chase: I think we understand what he says. It is too high to get the business.

By Justice Chase:

Q. Is that what you mean?

A. Yes, sir.

[fol. 1439] By Mr. Miller:

Q. Now, your figure, I believe, on the average loading taken from the Edwards' testimony for the year 1939 was 4.3 tons per car. Was I correct in understanding that?

A. That was read by Mr. Douglass Smith and I understood that is where he got it.

Q. Are you familiar, Mr. Capron, with the organization of the Pennsylvania Railroad set-up to attempt to improve its rate of return from less carload traffic?

Mr. Smith: That is objected to, as to whether the witness is acquainted with the Pennsylvania Railroad's procedure, what the Pennsylvania Railroad is doing.

Mr. Miller: The witness says, or has said that he knows what other railroads are doing and I think it is pertinent on whether he knows what the railroads are doing.

Justice Chase: Your question is whether he knows enough about it. I think you are going pretty far afield on that.

The Witness: Your Honor.

Justice Chase: You just answer whether you are or whether you are not. You can answer that question.

The Witness: There is another—I didn't intend to testify that I was familiar with the Eastern Railroads. I am talking about the Western Railroads.

[fol. 1440] Mr. Miller: Yes, I understand that, your Honor, but I thought he might know about it because my next question was to bear and follow up on it. That refers to his own road.

Justice Chase: If you have a question that amounts to anything you may.

Mr. Smith: I think so, your Honor.

Justice Chase: All right.

The Witness: I am only familiar with the fact that the Pennsylvania Railroad did set up such an organization. I don't know any of the details.

By Mr. Miller:

Q. Well, hasn't your own railroad, the Burlington, undertaken, on a rather extensive basis, to substitute auxiliar- truck service railroad service on way freight so as to cut—so as to eliminate this low less carload carloading?

A. The Burlington Railroad owns what is known as the Burlington Transportation Company that operates buses and trucks to a limited extent. Some of the so-called or some of the rail L. C. L. is distributed from distributing points under a substitution arrangement that is recognized by the Interstate Commerce Commission. That is quite limited because of the requirements of the diffdrent cer-

tificates of necessity. This Burlington trucking organi-
[fol. 1441] zation is made up of a large number of smaller operations that were acquired at different times. We can't substitute this service as extensively as we would like to, to give the shipper the benefit of a quicker distribution from a division point than he would like on a way freight that would run maybe three days a week, but where we can't we have substituted this truck service so that towards the end of the shipment's journey to get it on there a lot quicker or to get it to destination a little quicker from a division.
[fol. 1442] Q. And the purpose of that is to eliminate the high cost of loading the cars?

A. The purpose of that is to give better service.

Q. And that cost element doesn't come into it at all?

A. No.

Q. Have you made any analysis, Mr. Capron, of the effect of the raising of the minimum charge for less than carload shipments from 55 to 75 cents under the Commission's order?

A. I have not.

Q. You don't know how much increased revenue that would bring your road or those other roads?

A. I do not.

Mr. Miller: I think that is all.

Mr. Smith: I have no further questions. Mr. Capron you are excused.

Mr. Vivian.

Glenn F. Vivian resumed the stand as a witness and testified as follows:

Direct examination (Continued):

By Mr. Smith:

Q. Just before the recess, Mr. Vivian, I believe you testified that you had determined from an examination since 1939 the costs of labor, materials, and supplies used by the railroads and the cost of payroll taxes for the Western lines has increased since 1939. Will you please refer to Western lines' exhibit 3 for identification and to sheet 1 of that exhibit, and explain what the broken red line represents?

A. The broken red line represents Dr. Edwards' out-of-pocket costs for moving 4.3 tons of L. C. L. freight in the western territory adjusted to the January 1946 levels of wages, materials and supplies and payroll taxes.

Q. Well it also reflects the same allowance for the 10% [fol. 1443] security of the pick-up and delivery expense which was reflected in the solid red line?

A. The same amounts of security but an increase in the pick-up and delivery.

Q. Now I want you to explain that increase in pick-up and delivery, but first I wish you would explain how you determined the increase in the prices of the materials and supplies of January 1946 from the test year of 1939?

A. Eight of the larger of the Western railroads provided semi-annually a statement showing unit price of the principal materials which they purchased other than fuel, and we have compiled the December 1938 and the June 1939 reports on the one hand and June and December 1945 on the other. From these two we have prepared the increase in the material prices.

Q. Will you indicate to the Court approximately what percentage of the entire revenue and expense of the Western territory is represented by the revenues and expenses of these eight large lines that you have used?

A. In the neighborhood of 63%. In other words very nearly ⅔rds of the Western district is represented by these eight railroads.

Q. How did you determine the increase in the price of fuel?

A. The Interstate Commerce Commission published a monthly report known as M.-230 and using the same number which I have just described for the materials other than fuel we developed for the Western railroads the increase in the price of fuel.

Q. Now how did you apply these respective increases to Dr. Edwards' study in order to reflect in these lines that are shown on the chart and the lines which portray those increases, those advances in prices?

A. We had available the purchases of these eight rail- [fol. 1444] roads for the year 1940 and we weighted the increase in fuel and increase in other materials we purchased in that year, reaching a composite increase for all material and supplies, including fuel.

Q. What is the result of the figure which represents the difference in prices of materials and supplies between 1939 and 1946, as you computed them?

A. Thirty-two per cent increase.

Q. How did you compute the increase in wage rates paid by the Western railroads since 1939?

A. The Interstate Commerce Commission prepare monthly a tabulation showing employees and their compensation. We have available in our files the figures for the year 1939 for straight time actually worked and straight time paid for. We also have the same information for the months of 1945 which are available. In this instance we employed the first nine months of 1945, as that was all that was issued up to that time, and obtained from those tabulations the cost per hour for wages, straight time. By comparing these units costs we obtained the percentage of increase.

Q. Is an arbitration presently being conducted, or is it about to begin between the Railroad Brotherhood and the railroads of the United States in respect to wage levels?

A. Yes.

Q. Am I correct in understanding that the increases that you have undertaken to compute, to depict, here are of course the wage increases and only those which occurred between 1939 and 1946?

A. That is correct.

Q. What percentage of difference in wage rates per hour did you find in those two periods based on the figures of the Commission?

A. An increase of 27%.

[fol. 1445] Q. Is this adjustment with you made in the payroll figures for January 1946 levels the wages and prices of material and supplies reflected in the broken red line on the chart?

A. Yes.

Q. Does the Interstate Commerce Commission,—and I am referring to the Interstate Commerce Commission Mr. Vivian whenever I speak of the Commission here—does the Interstate Commerce Commission publish reports showing comparative levels of prices and materials and supplies?

A. They do.

Q. Have you examined those reports?

A. I have.

Q. What is the title of the most recent of those reports published by the Commission that you referred to?

A. Railroad construction indices compiled by the Engineering Section of the Bureau of Valuation, Interstate Commerce Commission. This report that I have is dated August 1st, 1945.

Q. Does that publication by the Commission show, or purport to show, all of the commodities and the price trends of all of the commodities used by the railroads?

A. All of the principal commodities, exclusive of the fuel.

Q. Officially does the index of increases of trends in prices of all materials which are used by the railroad in construction work, is that not so?

A. Construction and maintenance, yes.

Q. Does that include fuel then?

A. Only in a very minor degree.

Mr. Smith: I have that document here, if the Court please, and I will be glad to offer it if it is desired. In the absence of request for that I will ask this witness to state the difference in the cost levels revealed by those reports of the Commission with reference to the commodi-[fol. 1446] ties you have been discussing.

The Witness: The Western District reflects the increases in cost of 36% for these materials between 1939 and 1944, the last year that is given in this particular report.

By Mr. Smith:

Q. So that it reflects no increase since 1944?

A. No sir.

Q. Now what is the comparative figues that we can put alongside of that 36% which you have used as a result of your own computation?

A. 32%.

Q. Does the United States Department of Labor, Bureau of Statistics, publish any report on the average levels of wholesale prices?

A. Yes.

Q. What is the title of the most recent of such reports?

A. Average Wholesale Prices and Index Numbers, with Appendices, October 1945.

Q. Have you examined that report?

A. I have.

Q. How does the average level of prices shown in that exhibit for October 1945 compare with the average level of prices shown in that report for 1939?

A. It shows a 37% increase for all commodities.

Q. That compares with the 32% that you have employed here?

A. That is correct.

Q. Does that price index reflect the experiences on all commodities sold at wholesale?

A. That is correct.

Q. Do Dr. Edwards' studies show out-of—strike that please. Do the Edwards' out-of-pocket costs include Federal payroll tax as they existed in 1939?

A. Yes.

[fol. 1447] Q. I call your attention to the explanation on the exhibit 3, page 1, beside the broken line on the exhibit, and ask you what adjustment you made on account of payroll tax to reflect any increase in those taxes for the present time from 1939?

A. The payroll tax rate of 1939 was 5¾%. Effective January 1, 1946 this rate became 6½%. We have adjusted for the difference in the two rates for payroll tax.

Q. Calling your attention again to the explanation beside the broken red line on the exhibit, I will ask you how you computed the adjustment of 14 cents per one hundred pounds for average pick-up and delivery expense?

A. We used the same method for pick-up and delivery of the Western District for the year 1944, which was the last available year, divided that by the tons of L. C. L. freight originating and terminating in the Western territory, producing the cost of seven cents for each service, or fourteen cents for pick-up and delivery.

Q. Do the two lines on this chart, the solid red line and the broken red line, show what Dr. Edwards refers to as his out-of-pocket costs?

A. Yes.

Q. Do those costs as developed by Dr. Edwards and as shown on the chart purport to show the constant expense, constant costs solely related to less than carload costs?

A. No.

Q. Please explain what the solid green line on the exhibit represents?

A. The solid green line represents Dr. Edwards out-of-pocket plus the constant costs that are solely related to

L. C. L. freight for a movement of L. C. L. of 4.3 tons in the Western territory.

[fol. 1448] Q. Is it true or not that Dr. Edwards undertook to develop what might be called the two categories of costs, one out-of-pocket and two fully related costs, so called?

A. The constant cost?

Q. Yes?

A. That is correct.

Q. Have you undertaken to reflect both of these categories of costs in the aggregate in your solid green line?

A? I have.

Q. I call your attention to the statement on page 583 of the Commission's report referring to the Edwards costs, that I am now quoting:

"The less than carload costs do not include any of the constant or fixed costs common to all traffic" And I ask you do any of these lines on Western railroads exhibit 1 include any of those constant or fixed costs common to all traffic, that Dr. Edwards omitted?

A. No, they do not include either.

Q. Can you tell me for the year 1939, the test year, when the aggregate expense of the Western lines amounted to for that type of costs, namely the constant or fixed costs common to all traffic.

A. 351,760,000.

Q. Is there as much as a dollar of that figure reflected in the Dr. Edwards studies in the class rate case or in these lines which you show on the chart?

A. You refer to the L. C. L. portion.

Q. Exactly?

A. No, none of that expense is in L. C. L.

Q. I ask you to turn to page 2 of exhibit 3 entitled "Comparison of Edwards less carload cost in Western district with freight class 70% rate prescribed by Commission based on average rating of 4.3 tons per car." Did you compare that exhibit?

[fol. 1449] A. I did.

Q. Did you prepare it?

A. I did.

Q. What does the solid black line on exhibit, page 2 of exhibit 3 represent?

A. Freight class scale of rates as prescribed by the Interstate Commerce Commission in their interim order for zone 1.

Q. And what would you say as to the broken black line?

A. The broken black line is 70% of the appendix 10 scale, is a permanent basis which applies over the entire territory.

[fol. 1450] Q. And what was it as to the broken black line?

A. The broken black line is 70 per cent of the appendix 10 scale as a permanent basis. It applies over the entire territory.

Q. And by "applies over the entire territory," do you mean that that is the permanent rate found just unreasonable by the Interstate Commerce Commission for application throughout these three classification territories, the so-called Official, Southern and Western?

A. Yes.

Q. And that is in so far as those territories were involved in this proceeding?

A. That is correct.

Q. Now, you have on this exhibit certain lines which represent Dr. Edwards' costs which you have adjusted in certain ways, is that so?

A. That is correct.

Q. And, referring to those lines, namely the solid red line, and the broken red line, and the solid green line, and the broken green line, are those the same lines placed in the same position on the chart as the lines which you have already described with reference to page 1?

A. They are.

Q. And does the explanation which you made with reference to those lines on page 1 apply in every detail and respect with those lines on page 2?

A. Yes, they do.

[fol. 1451] Q. I ask you to turn to page 3 of this Exhibit 3, the comparison of Edwards' less carload costs in the Western District with 4th Class 55 per cent rate described by the Commission based on assumed average loading of ten tons per car and I will ask you if you prepared that chart?

A. I did.

Q. Is the mechanical set-up of the chart the same as those that you explained?

A. Yes.

Q. What does the solid black line represent?

A. The solid black line is the same as the line on page 1 of the exhibit, namely 55 per cent or 4th class rates prescribed in the Commission's interim order for Zone 1.

Q. And will you explain the broken black line?

A. The broken line is likewise similar to the broken black line on page 1, being 55 per cent of the appendix 10 scale as a permanent basis.

Q. Are the lines picturing Dr. Edwards' costs on this page different from those on pages 1 and 2?

A. They are different to the extent that they are for a ten ton load. Otherwise the preparation has been as previously explained for the other pages.

Q. Do the Edwards studies show the cost on the basis of handling L. C. L. traffic for average loading of ten tons?

A. Yes.

Q. State whether or not the cost lines on Exhibit 3 [fol. 1452] represent the same cost bases as those depicted on exhibit pages 1 and 2, except that the lines on Exhibit 3 represent Dr. Edwards cost for loading ten tons adjusted in the manner which you have just explained?

A. That is correct.

Mr. Smith: Your Honors, Mr. Knowlton inquired this morning and—I should not say he inquired—he offered as an exhibit here as a part of the record, the so-called merchandise report that is referred to in the report of the Commission. You have no objection to that being in the record.

Justice Chase: Very well, put it in.

Q. Now, Mr. Vivian, referring to this merchandise report that was in the record by reference and has now been made a part of the record physically, I will ask you whether that discloses the test period covered by that study of average weight per consignment of L. C. L. traffic in the West?

A. Yes.

Q. And what is that average weight per consignment of L. C. L. traffic in the West?

A. 384.2 pounds.

Q. Did the carloadings of the Western roads recede on or about V-J Day of last August?

A. Yes.

Q. What week of the year was that?

A. The 32nd week of the year.

[fol. 1453] Q. Did the carloadings of the Western lines following V-J Day drop under the carloadings of those lines for 1941?

A. They did after a period of about three to four weeks, and remained under 1941 for the remainder of the year.

Q. Referring to the carloadings of these Western Lines for the early part of 1946 and for that period concerning which you have information on the subject, have the carloadings of the Western lines dropped below or are they in excess of the 1945 loadings for the same period?

A. They are below the 1945 loadings.

Mr. Smith: The Western lines offer Exhibit C.

Justice Chase: Is there any objection?

Mr. Miller: The same objection.

Mr. Smith: And that concludes Mr. Vivian's direct.

Mr. McCollester: May I ask a question?

Justice Chase: Yes. Just before you do, this supplemental record which Mr. Knowlton has offered and has been admitted, I don't know whether that ought to be designated in some way or whether it designates itself?

Mr. Smith: I think it is for all intents and purposes in the record, your Honor, and my suggestion would be that it be put in Mr. McCollester's box of records.

[fol. 1454] Justice Chase: All right, that will take care of it.

Direct examination.

By Mr. McCollester:

Q. Mr. Vivian, that there may be no confusion upon the record, I have just a couple of questions I should like to ask you. Is it not correct that Dr. Edwards, in making his computations, divided the railroads of the country into different groups and made his computations on the basis of statistics by groups of railroads?

A. That is correct.

Q. All of the statistics of Dr. Edwards that you have used are statistics relating to the Western group of railroads, is that correct?

A. The Western territory which Dr. Edwards embraced, not only Western District Railroads but parts of other carriers that operated in both East or South.

Q. But those figures that you have used were presented by Dr. Edwards as representing his computations regarding costs of transportation in Western territory and not costs of transportation in Official territory, is that not correct?

A. That [illegible] correct.

Q. And none of the figures or testimony that you have given relate to cost of transportation or less carload or any other kind of freight in Official territory?

[fol. 1455] A. That is correct.

Mr. McCollester: I think that is all.

Mr. Miller: If the Court please, I wonder if it would be possible for us to see the documents on which this testimony was based? I think we could prepare for cross-examination and have our cross-examination deferred. I have refrained from making any objection based on lack of foundation for this testimony, which I think would have been well taken. I thought if arrangements could be made to see the documents to see how the figures have been weighted, which I assume the witness has, it would be helpful.

Justice Chase: Do you mean a short time now or have them this evening?

Mr. Miller: If we could have them overnight and have the witness recalled for cross-examination if we want to have cross-examination; I am not sure that we do.

Justice Chase: Have you any other witnesses?

Mr. Smith: No, that concludes this.

Justice Chase: Have you any witnesses, Mr. Miller?

Mr. Miller: Not at this time, your Honor. I assumed we wouldn't be putting in any testimony anyway until our case started. I assumed that the case for the plaintiffs in [fol. 1456] the two suits would be put in first. I don't expect we will have very much testimony, but if we do it will be short.

Justice Chase: I realize for this sort of thing you need some preparation. We will do that. If we can go along on something else, we don't want to stop now if we can help it and wait for that.

[fol. 1457] Mr. McCollester: On the other hand I don't like to start our argument until all of the examination of the witnesses has been concluded.

Justice Chase: It is rather embarrassing both ways.

Mr. Miller: If we put in any testimony, I may say this to the Court, it would only be I am sure in some sort of rebuttal of these particular things that have gone in here.

Justice Chase: Suppose we give you a little time now. Can you get ready and conduct your cross examination?

Mr. Miller: If I have to do it without having an analysis made of these papers, I would rather not cross examine this witness. I have no reason to believe that his weighting and——

Justice Chase (Interrupting): Of course we come to this aspect—you need not take this.

(Discussion outside the record which the Court Reporter was directed not to take.)

Justice Chase: We will take a recess of fifteen minutes or even a half hour to give you time to look over the papers.

(Recess taken. Case resumed after recess same date and same place.)

Mr. Miller: The fifteen minutes were very productive. Subject to the Court's approval we made this arrangement. [fol. 1458] Mr. Smith is going to make available to us all the papers that we are interested in. We will waive any cross examination of this witness with the understanding that we would put in our reply brief any criticism we might have of this testimony based on our study of it.

Mr. Smith: Your Honor, Mr. Miller suggested that to me and I told him I entirely agreed with it. I think on reflection that we ought to bring to the Court's attention this matter of brief, and I refer to it now for this reason. We are delighted to turn over to the Government all our working sheets on these exhibits. I wouldn't like to have Mr. Miller on behalf of the Government file the last brief in this case and make some comments on these exhibits which we think we can very quickly and fully explain. We are the moving parties here. We have the burden. I want to file with the Court's permission the last brief with reference to the issues of the Western case, and I think it is only fair to mention that now because Mr. Miller talks about a reply, and I was to reply to his reply.

Justice Chase: We will see about that when the time comes and try to be fair with everybody.

Mr. Miller: We will try to make our examination very quickly, and if we have anything to say, we will say it quickly. Perhaps we can do it separately before any reply brief is filed. Perhaps we can work something of that sort out.

[fol. 1459] Mr. Smith: I believe that I offered Exhibit 3, Your Honor, but the transcript is gone. May it be understood that it is submitted?

Justice Chase: It may be understood that it has been received.

(Chart previously marked for identification received in evidence as Exhibit Number 3 of this date.)

[fol. 1460] Mr. Miller: I might say further to the Court that the Government is not proposing to offer any more evidence and I move to strike all the evidence received on the grounds previously stated and also all the affidavits filed at the time of the hearing of the interlocutory injunction by counsel for the plaintiff and the plaintiff's intervenors.

Justice Chase: I understand that the evidence is closed so far as the introduction of evidence is concerned.

Mr. Smith: Yes, of course. The Western lines are relying also on the evidence that is being offered physically by Mr. McCollester, but we have no further witnesses.

Mr. Miller: As to that evidence, Mr. McCollester, it is my understanding, that he didn't make an actual offer, and we want to be sure it covers the whole record, what the record is made up of.

Justice Chase: Well, we will take that up and decide that later.

Mr. Norman: If Your Honors please——

Justice Chase: I want to dispose of one motion at a time. I reserve decision as to Mr. Miller's motion.

EXHIBIT No. 1

Items in Consolidated Freight Classification No. 16 and Supplements Thereto Rated Fourth Class (Column 55) Less Carload in Western Classification on Which No Commodity or Exception Ratings Apply

Item No.	Commodity
20	Abrasives, crude or lump
25	Abrasives, flour or grain
30	Abrasives, refuse
100	Acid, chlorosulfonic, in bulk in barrels
115	Acid, electrolyte, in lined barrels or rubber drums
205	Acid, sulphuric, in metal barrels
425	Heads, fork, hoe, manure hook, potato hook or rake, in barrels, boxes or crates
630	Binder twine
800	Hay carrier track
1025	Agricultural implement beams, iron or steel
1030	Agricultural implement beams, wooden
1100	Handles, agricultural implement, iron, in packages
1105	Handles, agricultural implement, wooden:
	In the rough
	In the white
1155	Poles, agricultural implement, wooden, in the white, ironed or not ironed
1175	Runners or shoes, harrow, iron
1185-A Sup. 21	Seats, agricultural implement, iron, without seat springs or brackets
1275	Air preheater elements, steel
1425	Aluminum-manganese-silicon
1430	Briquettes, manganese or iron ore and coal or lime or sand combined

[fol. 1462]

Item No.	Commodity
1435	Calcium-aluminum-silicon
1445	Chromium-silicon-manganese
1450	Ferro-alloys, noibn

4236	Battery cylinders, frames or plates, copper, steel or zinc, burnt out
4245	Battery mix, ground manganese ore and ground graphite combined, dry
4260	Batting or filling, cotton or kapok, old, used, not further reworded than mixed, in machine pressed bales

[fol. 1465]

Item No.	Commodity
4265	Bauxite (beauxite), causticized
4270	Bauxite (beauxite), flue dust
4290-C 4291-C Sup. 37	Beans, castor
4320	Bee hives, wooden, KD
4348	Beet slops (beet sugar final molasses residuum)
4365	Berries, palmetto
4395	Bird gravel or sand
4450	Blacks, dry, mineral earth or peat char, other than dry earth paint, in barrels or boxes
4460	Fertilizer blacks
4515-A Sup. 21	Bleach assistant compounds, noibn, dry
4520	Blocks, butchers', including butchers' cutting or chopping tables, or butchers' cutting or chopping table tops, without legs or bases or with legs or bases detached
4545	Blood, liquid, in barrels, or in metal cans in barrels or boxes
4652	Fenders, boat or dock, wood, steel and rope combined
4665	Knees, boat, in the rough
4670	Knees, boat, noibn
4820	Boiler arches or sidewall or arch blocks, iron and fire brick combined
4830	Boiler arch bars or arches
4840	Braces, boiler; flanges; nozzles; or handhole or manhole dollars, covers, crabs or lugs
4860	Boiler doors, with or without frames
4885	Boiler heads (ends), unfinished

[fol. 1466]

Item No.	Commodity
4900	Boiler parts, cast, noibn
4905	Boiler plates
4910	Boiler sections, cast iron

Exhibit No. 1—Continued

Item No.	Commodity
4920	Boilers, heating or power, cast iron, KD, or taken apart, with equipment of burners, sprayers, vaporizers or mechanical stokers
4920	Boilers, heating or power, cast iron, KD, or taken apart, without equipment of boilers, sprayers, vaporizers or mechanical stokers
5035	Furnace coils, pipe, U bent, iron
5037	Furnace doors, house heating, with or without frames, iron
Sup. 21 5090	Gas stove manifolds, without valves, not enameled nor plated
5098 Sup. 21	Heads (ends), water heater or range boiler, with nipples attached, iron, unfinished
5300-A Sup. 21	Stove or range castings, iron, other than enameled or plated, LCL, in barrels, boxes or crates
5480	Bone, charred filtering (animal charcoal), other than spent
5485	Bone, charred filtering (animal charcoal), spent
5490	Bone ash
5505	Bones, noibn, ground or not ground
5675	String nailes, steel, coiled, or tack strips (tacks attached to paper strips)
5750	Box or crate material, wood and wire combined, noibn, interwoven
5755	Box or crate material, wood and wire combined, noibn, not interwoven

[fol. 1467]

Item No.	Commodity
5755	Box or crate material, wood and wire combined, noibn, not interwoven
5765	Boxes, roadway, stop cock or valve, cast iron
5770	Boxes, water meter, clay or earthen, in boxes or crates
5775	Boxes, water meter, concrete
5780	Boxes, water meter, iron
5925	Boxes, ~~fruit~~ shipping refrigerator, wooden, old
5975	Boxes, meat shipping refrigerator, old
6050	Boxes, solidified carbon dioxide shipping, steel, insulated, with or without covers, set up, old
6060	Boxes, steel, noibn, KD flat or folded flat, old
6090	Boxes, wooden, folded flat
6110	Boxes, wooden, noibn, old, nested or not nested
6155	Boxes or crates, KD, wood and wire combined, noibn, interwoven or not interwoven
6185	Crates, iron, KD flat
6190	Crates, wooden, noibn, new, folded flat or in flat sections
6195	Crates, wooden, noibn, old (used), SU, nested or not nested
6195	Crates, wooden, noibn, old (used), folded flat or in flat sections
6202	Bracing or blocking, carloading, noibn, KD
6240	Ashes, brass, bronze or copper, LCL, in barrels or boxes
6305	Copper scale
6335	Grindings, brass, bronze or copper, LCL, in barrels or boxes

[fol. 1468]

Exhibit No. 1—Continued

Item No.	Commodity
6460	Skimmings, brass, bronze or copper, LCL
6470	Sweepings, brass, bronze or copper, LCL, in barrels or boxes
6490	Washings, brass, bronze or copper, LCL, in barrels or boxes
6515	Brick, bath (scouring brick)
6525	Beams or joists, structural, reinforced concrete or tile
6530-A Sup. 35	Blocks, building, hollow, or briquettes, slag or cinders and Portland cement combined
6535	Blocks or tubes, segment sewer, aluminum oxide or vitrified clay, LCL, in barrels, boxes or crates
6540	Brick, building, common, or pressed, fire, including fire brick shapes, or paving, noibn, weighing each 15 lbs. or over, loose
6540	Brick, building, common, or pressed, fire, including fire brick shapes, or paving, noibn, loose, subject to minimum charge as for 10,000 lbs., owners to load and unload
6540	Brick, building, common, or pressed, fire, including fire brick shapes, or paving, noibn, LCL, in barrels, boxes or crates, with or without tops, or in fibreboard wrapped bundles, metal strapped
6555	Brick, crushed or ground
6560	Brick, enameled or glazed, other than salt glazed
6565-B Sup. 37	Brick, glass, glass faced concrete or glass blocks
6570	Brick, insulating, infusorial earth, diatomaceous earth and clay combined
6580	Brick, lining, porcelain
6585	Brick, pouring (mold hot tops), clay, or clay and graphite combined or magnesia base

[fol. 1469]

Item No.	Commodity
6590	Brick, salt glazed
6595	Brick, stove (stove lining shapes)
6600	Brick, vermiculite
6605	Cribbing, concrete
6610	Fire clay, ground fire brick and water combined (plastic fire brick)
6615	Furnace or kiln lining or high temperature bonding mortar or cement, noibn
6625	Guard rails, highway, reinforced concrete, consisting of anchor block, posts and rails
6628	Heat radiating balls, fire clay
6630	Lot markers, cement or earthen
6635	Piling, cement or concrete
6640	Poles, electric wire, cement or concrete
6645	Posts, fence, cement or concrete
6650	Posts, highway marker, cement or concrete
6655	Posts, noibn, cement or concrete

EXHIBIT No. 1—Continued

Item No.	Commodity
6660-A Sup. 21	Quarries, flooring, paving or promenade
6665	Rings, hot top, clay
6670	Stones, shade, glass factory
6675	Stove lining composition, noibn, powdered
6680	Supports or props, mine, concrete
6685	Terra cotta, building, in barrels, boxes or crates
6695	Ties, railroad, cement or concrete, reinforced
6700	Tile, building, hollow, enameled or glazed, other than salt glazed
6715	Tile, building, hollow, salt glazed or plain
[fol. 1470]	
6725	Tile, building or roofing, reinforced concrete (building or roofing slabs), with corkboard or fibreboard insulation
6725	Tile, building or roofing, reinforced concrete (building or roofing slabs), without glass insertions or corkboard or fibreboard insulation
6733	Well tops, reinforced concrete
6780	Broom splints, wooden, noibn
6850	Brucite and dolomite combined, calcined or dead burned
6882	Asphalt, clay and Portland cement, unmixed
6885	Asphalt composition paving or flooring planks, ½" or more in thickness
6890	Asphalt flooring compound, noibn, solid (mastic blocks)
6895	Asphalt flooring compound, noibn, liquid or paste, in bulk in barrels
6900	Asphalt paving blocks, weighing each less than 15 lbs., in packages
6910	Asphalt paving blocks, weighing each 15 lbs. or over
6915	Asphaltic sewer pipe joints
6935	Cement, concrete or masonry waterproofing compound, liquid or paste, in bulk in barrels
6940	Cement, floor tile, liquid, having asphalt and coal tar base
6941	Cement mixing compound
6950	Concrete surface curing compound
6955	Concrete surface hardener, powdered, iron
6970	Concrete or masonry plasticizer and water reducing compound
[fol. 1471]	
6985	Culverts, iron or steel, cast
6995	Culverts, iron or steel, plate or sheet, KD
7085	Elevator guide clips, iron
7100	Elevator Guides, wooden
7205	Lathing, bituminized or sanded paper, metal reinforced
7235	Lightning rods, rod fasteners or fixtures, noibn, iron or steel, coppered, galvanized, painted or plain
7245	Mantels, cast stone; noibn, KD, LCL, in boxes or crates

Exhibit No. 1—Continued

Item No.	Commodity
7267	Panels, siding, wood shingles backed with paper and insulation board
7275	Paving blocks or slabs, rubber composition
7280	Paving blocks or tiles, cast iron
7285	Paving composition, sand, slag or stone and asphalt, pitch or tar combined
7290	Paving composition, stone, granulated cork and asphalt combined
7295	Paving joints, roadway, asphalt or asphalt base
7305	Paving joints, roadway, rubber composition
7340	Road binding or road sprinkling compound, noibn
7345	Road surfacing material adhesion preventive
7390	Wood, built-up or combined, covered with iron or steel
7730	Guards, window or skylight, iron or steel, other than wire (window grating)
7805	Moldings, noibn, iron or steel, or wood covered with iron or steel or tin plate, galvanized, plain or primed
7850	Prison work, steel, noibn
7960	Spandrels, cast iron or steel

[fol. 1472]

Item No.	Commodity
7980	Stair treads or risers, iron, noibn
7990	Stairs, iron, noibn, KD or in sections
8180	Door sills, wooden
8260	Frames, hot bed, wooden, KD flat
8310	Moldings, wood
8340	Sash, wooden, not glazed, KD
8355	Stair risers, stringers or treads, wood
8480	Towers, noibn, steel or wood, separate or combined, KD
8487	Buoy heads, steel
8595	Casket or coffin material, wooden, in the white, KD
8615	Grave vaults, asphalt composition, cement or concrete, KD
8625	Grave vaults, slate or stone, natural, KD
8810	Calcite, roasted, granular form, treated or coated, clinkered and burned to a dead state
8815	Calcium lineolate pulp or calcium salt of fatty acids
9125	Carbon briquettes, noibn
9145	Carbon clinker, from gas retorts
9170	Carbon flour, ground petroleum coke
9180	Molten metal bath carbon
9185	Petroleum carbon (petroleum coke), not ground
9200-A Sup. 21	Carbon scrap
9212 Sup. 35	Carbon mixture, unbaked

[fol. 1473]

Exhibit No. 1—Continued

Item No.	Commodity
9285	Blocking bolsters or cradles, shipping, old, used
9290	Blocks, braces or skids, sheet metal shipping, steel, or steel and wood combined
9300	Bottle carriers, (bottle carrying boxes or crates, with permanently fixed partitions), new, wooden, or wood and metal combined, KD flat or folded flat
9305	Bottle carriers (bottle carrying boxes or crates, with permanently fixed partitions), old, iron, steel, wood, or wood and metal combined, set up
9325	Cans, oyster shipping, iron (inside containers used with refrigerator oyster carriers), old
9340	Carboys, lead, old
9365	Coops or crates, animal or poultry, shipping, new, wood, KD flat or folded flat
9390	Cylinders, acetylene gas, steel, new
9410	Cylinders, steel, for shipping air, gases or liquids under pressure, noibn, new, coppered or nickeled
9415	Cylinders, steel, for shipping air, gases or liquids under pressure, noibn, new, other than coppered or nickeled
9450	Egg cases or carriers, wooden, KD
9475	Frames, paper packing, wooden, old
9520	Reel cores or drums, wooden or wooden with steel drums, KD
9545	Reels, cordage; electric cable, with or without lags; lead pipe; wire; wire braid or wire rope, wooden or wooden with steel drums, KD
9575	Transformer shipping containers, plate steel
9587 Sup. 37	Carriers or conveyors (overhead runways)
9600	Casein (milk curd), crude, not edible, ground or powdered

[fol. 1474]

Item No.	Commodity
9605	Casein (milk curd), crude, not edible, not ground nor powdered
9633	Caster bolts (caster shanks), caster forks or caster sockets, iron
9638	Casters, furniture
9640	Casters, truck
9705	Cement, automobile body sealer or sound deadener
9710	Cement, bonding, sealing or embedding, noibn
9715	Cement, furnace or stove
9720	Cement, linoleum
9760	Cement clinker grinding compound, dry, treated or untreated
9775	Cement, acid proof (building)
9780	Cement, hydraulic, masonry, natural or Portland
9785	Cement compound, building or floor, dry
9795	Cement flue dust

Exhibit No. 1—Continued

Item No.	Commodity
9800	Common lime, including magnesium lime, hydrated or hydraulic, quick or slaked
9805	Lime sludge or waste, dried
9815	Mortar, building, noibn, dry
9820	Plaster, calcined, patching, plaster of Paris, stucco or wall
9830	Plaster, land
9840	Cereal, noibn
9855	Bran; bran and wheat combined, flaked; or bran or bran and wheat combined with dried fruit, flaked or shredded
9870	Corn, roasted

[fol. 1475]

Item No.	Commodity
9880	Cereal food preparations, cooked, flaked or shredded, noibn, compressed and then crumbled
9890	Cereal food preparations, cooked, flaked wheat and ground flaxseed combined
9895	Cereal food preparations, cooked, granulated
10020	Alum, noibn
10025	Alum, sodium (sodium aluminum sulphate)
10085-A Sup. 37	Aluminum sulphate, or paper makers' alum
10087 Sup. 21	Aluminum sulphate containing not more than 5% of activated carbon
10090	Ammoniacal liquor or aqua ammonia, noibn, in bulk in barrels
10100	Ammonium, bicarbonate, in bulk in barrels
10110	Ammonium, carbonate, in bulk in barrels or steel pails
10115	Ammonium, chloride (muriate of ammonia or sal-ammoniac)
10150	Ammonium, sulphate nitrate (leunasal-peter), in bulk in bags, barrels or boxes
10163	Ammonium, thiocyanate (ammonium sulphocyanate) liquor
10230	Barium, aluminate
10240	Barium, carbonate
10250	Barium, chloride
10305	Barium, sulphide
10330	Borax (sodium borate)
10383	Calcium, acetate, dry
10385	Calcium, bisulphite
10400	Calcium, carbonate, noibn

[fol. 1476]

Item No.	Commodity
10405	Calcium, carbonate; recarbonated waste (whiting substitute)
10410	Calcium, chloride, liquid
10415-A Sup. 40	Calcium, chloride, other than liquid
10435	Calcium, nitrate
10440	Calcium, phosphate

Exhibit No. 1—Continued

Item No.	Commodity
10455	Calcium, sulphate
10460	Calcium, sulphite
10490	Carbon tetrachloride, in bulk in steel barrels
10505	Chalk, crude
10620	Copper sulphate (blue vitriol)
10635	Cryolite
10815	Glycerine, crude (spent lye), concentrated, or crude glycerine, other than spent lye
10820	Glycerine, crude (spent lye), not concentrated
10870	Iron, nitrate, in bulk in barrels
10875	Iron, oxide, noibn
10880	Iron, sulphate (ferric sulphate), dry
10885	Iron, sulphate (ferric sulphate), other than dry (ferric sulphate solution), in bulk in barrels
10890	Iron, sulphate (ferrous sulphate) (copperas)
10895	Iron, sulphide
10913	Lead, acetate (sugar of lead), in bulk in barrels, boxes or steel pails
10940	Lead, silicate
10950	Lime, chlorinated (chloride of lime, bleach, noibn, or bleaching powder, noibn), dry

[fol. 1477]

Item No.	Commodity
10960	Lime, chlorinated (chloride of lime, bleach, noibn, or bleaching powder, noibn), liquid, (aqueous solution), in bulk in barrels
10965-A Sup. 21	Lime, nitrogen
10970	Lime water, in bulk in barrels
10978	Magnesium, carbonate
10980	Magnesium, chloride, in bulk in barrels or steel pails
10990	Magnesium, hydroxide, in water
11010	Magnesium, oxide, heavy calcined
11015	Magnesium, phosphate
11020	Magnesium, sulphate, crude, or dieserite
11025	Magnesium, sulphate, refined, or Epsom salts
11045	Manganese sulphate, fertilizer grade
11095	Naphthalene, crude
11240	Alkali salts, crude, dry
11245	Beet or cane residuum, potash
11265	Potassium, carbonate (pearlash), in bulk in barrels, or steel pails
11295	Hartsalz, sylvinit
11315	Potassium, nitrate (saltpetre)
11330	Potash, crude, wood
11345-A Sup. 21	Potassium, silicate
11355	Potassium, sulphide (sulphuret of potash), in bulk in barrels

Exhibit No. 1—Continued

Item No.	Commodity
11360	Tobacco crystals (tobacco potash salts)
11407	Soda (alkali) residue, other than liquid

[fol. 1478]

Item No.	Commodity
11435	Sodium, arsenite solution
11440	Sodium, bicarbonate (saleratus)
11455	Sodium, bisulphite, dry, in bulk in barrels or boxes, or in steel pails
11460	Sodium, bisulphite, liquid, in bulk in barrels
11475	Sodium, carbonate; soda ash, including modified soda ash; monohydrate or sesquicarbonate
11485	Sodium, caustic (sodium hydroxide)
11495	Sodium, chloride (common salt)
11530	Sodium, disodium phosphate or trisodium phosphate
11545	Sodium, hydrosulphide (sodium hydrosulphate or sodium sulphydrate)
11560	Sodium, hyposulphite
11585	Sodium, nitre cake (crude bisulphate of soda)
11615	Sodium, phosphate, noibn
11635	Sodium, sal-soda
11640	Sodium, salt cake (crude sulphate of soda)
11650	Sodium, silicate, dry
11655-A Sup. 21	Sodium, silicate, other than dry (silicate solution), including mechanical mixtures
11660	Sodium, silico aluminate
11680-A Sup. 37	Sodium, sulphate (Glauber's salts)
11690	Sodium, sulphite
11695	Sodium, washing soda (washing crystals), noibn
11978-A Sup. 21	Zinc, ammonium chloride
12065	Flower pots, or flower pot saucers, pottery

[fol. 1479]

Item No.	Commodity
12070	Knob tops, door or drawer, pottery, without metal fittings
12075	Potters' pins, stilts or spurs
12080-A Sup. 21	Pottery, earthenware or stoneware common brown or gray jugware, consisting of bowls, churn bodies, crocks, jars, jugs, pans, pitchers or pots
12095	Saggers, pottery
12105	Turpentine cups, earthenware or stoneware, with or without aprons or hangers
12195	Bleachers or grand stands, steel or wood, KD, telescoped or collapsed, noibn
12200	Circus seats, without backs
12207	Grand stand platforms, in flat sections
12225	Actinolite ore, ground
12230	Actinolite ore, other than ground

Exhibit No. 1—Continued

Item No.	Commodity
12235	Antimony sulphide, concentrated ore (needle antimony), lump
12245	Antimony sulphide, crude (crude antimony ore)
12255	Bauxite (beauxite) ore
12260	Beryllium ore, ground
12265	Beryllium ore, not ground
12267	Celestite concentrates
12270	Celestite ore, crude
12275	Chrome ore
12280	Clay, ball, or china (kaolin)
12285	Clay, fire, crude or ground
12290	Clay, noibn, crude
12295	Clay, noibn, crushed, ground or pulverized
12300	Clay, plastic or modeling
[fol. 1480]	
12305	Clay, tamping
12310	Clay or sand, processed for decolorizing, filtering or water softening
12315	Copper concentrates
12320	Copper ore
12330	Earth (soil), noibn
12335	Earths, infusorial (fossil flour, fossil meal or kieselguhr) or diatomaceous (diatomite)
12340	Fuller's earth
12345	Graphite ore
12350	Humus
12355	Ilmenite ore
12360	Iron ore, hydrated (bog ore, red ore, or yellow ore) not ground
12365	Iron ore, noibn, crude, not ground
12370	Kyanite or sillimanite ore
12375	Lead concentrates
12380	Lead ore
12385	Manganese ore, ground (black oxide of manganese)
12390	Manganese ore, other than ground
12395	Ores, noibn, if value does not exceed 5 cents per pound
12405	Pyrites, iron
12410	Pyrites cinder, refuse or dross, copper (purple ore) or iron
12417	Rutile ore
12420	Shale, crude
[fol. 1481]	
12425	Shale, ground, burnt or retorted
12432	Topaz rock, crude, crushed, ground or pulverized
12435	Tripoli
12445	Vermiculite, crude (vermiculite ore)
12455	Zinc concentrates
12460	Zinc ore

EXHIBIT No. 1—Continued

Item No.	Commodity
12465	Zirconium ore, crude
12560	Bagging, grass or fibre, old (tea chest or tobacco matting, old), in machine pressed bales
12905	Cloth winding boards, wooden, solid
13010-A Sup. 21	Cloths or rags, wiping (cloths or rags, cleaned, sterilized, or otherwise made sanitary for wiping), in machine pressed bales or machine pressed in boxes
13015	Coal, ground
13020	Coal briquette binder
13025	Coal or coal briquettes, anthracite, bituminous, blacksmith, cannel or lignite, noibn
13030	Coal saving compounds, dry
13038	Cocoa bean shells, ground, in bulk in bags
13039	Cocoa bean shells, not ground, in bulk in bags, barrels or boxes
13040	Cocoa press cake, containing not to exceed 15% butter fat, having value only for live stock feed mixtures or for fertilizer purposes
13045	Cocoa press cake, containing not to exceed 15% butter fat, having value other than for live stock feed mixtures or other than for fertilizer purposes
13047	Cocoa press cake meal, containing not to exceed 10% butter fat and having value only for fertilizer purposes

[fol. 1482]

Item No.	Commodity
13060	Coke, creosote, pitch or tar, not activated carbon
13065	Coke, dust or breeze
13070	Coke, gas house
13075	Coke, noibn
13100	Chimney bonnets, caps, tops or top bases, clay
13105	Chimney flues or pipe, or chimney or flue linings, clay
13110	Conduits or conduit connections, for underground work, cement or concrete
13115	Conduits or conduit connections, for underground work, clay or terra cotta
13120	coping, wall, clay
13125	Drain tile heads, concrete
13130	Pipe, concrete, reinforced
13135-B Sup. 21	Pipe, sewer, or sewer pipe fittings, clay, concrete or earthen
13155-A Sup. 35	Tanks, septic, clay
13160-A Sup. 35	Tanks, septic, reinforced concrete
13165	Thimbles, stove pipe, clay
13175	Tile, drain, or drain tile fittings, clay or earthen
13180	Tile, drain, or drain tile fittings, concrete
13185	Tile, drain, or drain tile fittings, clay, concrete or earthen

[fol. 1483]

EXHIBIT No. 1—Continued

Item No.	Commodity
13257	Cocks or valves, including gate valves, noibn, or parts, noibn, iron or steel body, lead lined, not plated
13270	Conduits or pipe, cement, containing asbestos fibre
13295	Conduits or conduit connections, flexible, steel, for other than underground work
13300	Conduits or conduit connections, wooden, lined or not lined (bored timber, inside diameter 4 inches or less), for underground work
13310	Couplings, conduit or pipe, cement, containing asbestos fibre
13350	Hydrants or fire plugs
13375	Pipe, iron or steel, cast, noibn
13380	Pipe, iron or steel, cast, wood lined
13385	Pipe, iron or steel, covered or lined with cement mortar
13390	Pipe, iron or steel, lead covered or lined
13420	Pipe, noibn, wrought iron, enameled, outside diameter 8 inches or over
13425	Pipe, stove, sheet iron, steel or tin plate, side seams not closed, nested
13435-A Sup. 21	Pipe, wrought iron, insulated, fibreboard or iron jacketed
13450	Pipe coils, noibn, iron or steel
13500	Pipe fittings, noibn, iron or steel, wood lined
13550	Pipe or elbows, heating furnace (air or smoke flues), sheet iron, steel or tin plate, including angles, collars, offsets, shoes and stackheads, single, side seams not closed, nested
13560	Pipe or pipe casing, wooden, bored or built-up, lined or not lined, inside diameter 6 inches or less
13600	Pipe or tubing, iron or steel, plate or sheet, noibn, 7 gauge or thicker, inside diameter 3 inches or less

Item No.	Commodity
25090	Dowel pins, noibn, iron or steel
25095	Drippings, spillings or spittings, iron or steel
*25105	Fence post fixtures, wire fence, consisting of brace collars, brace plates
*25115	Fencing, expanded metal
25120	Fencing, in panels
25125	Fencing, wire and iron or steel combined, KD
25140	Flooring, structural, iron or steel
25145	Flue dust, iron or steel
25150	Flumes, iron or steel, KD
25160	Furnace salamanders or ladle skulls
25170	Galvanizing or tinning pans or pots

EXHIBIT No. 1—Continued

Item No.	Commodity
25175	Girders, noibn, lattice, iron or steel
25205	Inserts, structural, iron or steel
25207-A Sup. 21	Landing mats, or runways, airfield, iron or steel
25225	Machine bed plates, housings or frames made from welded forged plates, in the rough and requiring further machine work to make complete machine part
25240	Mill cinder or mill scale
25245	Molds, ingot, ingot mold stools or bottom plates (sprue plates)
25250	Molds, pig iron
25255	Nails, crate fastener
25260	Nails, horse shoe
25275	Nitre pots, cast iron

[fol. 1501]

Item No.	Commodity
25280	Nut locks, noibn
25295	Pig iron
25310	Pins, bridge or drift
25315	Pipe balls, pipe manufacturers'
25320	Pipe billet tubing (rough pipe for seamless tube manufacture)
25335	Plate, sheet or strip, brass, bronze, copper, chromium or nickel coated by electrolytic or hot dipped process, or copped clad
25357 Sup. 37	Plate or sheet, noibn, iron or steel, pitch coated
25360-A Sup. 35	Plate or sheet, iron or steel, noibn, planished, hammer-polished or Russia
25380	Posts, noibn, iron
25390	Props, (supports), mine, iron or steel
25395	Rails, noibn, iron or steel
25400	Retaining wall spacers, stringers or stringer stiffeners, iron or steel
25410	Rings, rolled steel, noibn
25450	Scrap, iron or steel, copper clad
25455	Scrap, iron or steel, not copper clad
25460	Scrap, tin plate or terne plate
25485	Sheet, iron or steel, aluminum coated
25510	Sign bases, iron or steel, with or without threaded holes, but not otherwise tooled or machined
25515	Skelp, iron or steel
25520	Sills, noibn, iron or steel
25540	Staples, noibn, brass, bronze, cadmium or copper coated, or japanned or tinned
25550	Staples, ingot mold
25565	Studding sockets, iron or steel

[fol. 1502]

Exhibit No. 1—Continued

Item No.	Commodity
25625	Tunnel segments, cast iron
25630	Tuyeres, iron or steel
25655	Wheel guards, iron or steel, for protecting corners of buildings
25670	Wire rods, iron or steel, rolled, or chain iron or steel, rolled, not drawn through a die, not in straight lengths, not less than No. 8 gauge nor over 1¼ inches in diameter, which may be transported on open cars without damage from weather, in coils
25680	Iron or steel cleaning compound, noibn, dry
25690	Iron sand; iron, granulated, ground or powdered, noibn; or chilled shot, iron or steel, not ammunition
25710	Ivory, nut or vegetable, meal, scrap or shavings
25733	Kindling, fire, composition
26020	Acid chamber residuum, dry
26025	Acid chamber residuum, liquid or paste
26047	Ashes, lead
26065	Lead, blown or granulated
26080	Lead dross or skimmings
26085	Flue dust, lead
26105	Scrap, lead
26125	Weights, counterbalance, noibn, lead
26130	Weights, sash, lead
26180	Leather, artificial or imitation, scrap, actual value not exceeding 3½ cents per lb.
26205	Leather ash
26210	Leather scrap, not exceeding 3½ cents per lb.
26225	Leatherboard scrap, not exceeding 3½ cents per lb.
26281	Lacithin, oil concentrate, crude
26315	Lignin liquor
26370	Litharge, wet with water

[fol. 1503]

Item No.	Commodity
26720	Agricultural implement parts, hand, wooden, noibn, in the rough
26725	Agricultural implement parts, other than hand, noibn, wooden, in the rough
26730	Bark, black oak (stick)
26735	Bark, tan, lead (stick)
26750	Blocks, bobbin (bobbin blanks), wooden
26755	Blocks, boot or shoe last, wooden, unfinished
26760	Blocks, bowling pin, wooden, unfinished
26765	Blocks, brush or eraser, wooden
26770	Blocks, die, wooden
26775	Blocks, mangle roller, wooden, unfinished
26780	Blocks, paving, wooden
26790	Blocks, shuttle, wooden, in the rough
26795	Blocks, spool (spool blanks), wooden, rough trimmed

Exhibit No. 1—Continued

Item No.	Commodity
26800	Blocks or braces, shipping, automobile, automobile engine or cable reel, wooden
26805	Bolts, wooden, excelsior, handle, heading, hoop, shingle, spoke or stave
26810	Box, crate or shipping drum material, wooden, or wooden, fibreboard covered, in shooks or panels, noibn
26815	Cradles, pipe or flume, wooden
26820	Culverts, wooden, KD flat
26825	Doubletrees, eveners, neckyokes or single trees, wooden, in the rough
26827	Dowels, wooden, in the rough or rough turned
26830	Eave troughs or gutters, roof, wooden
26835	Felloes, wooden, in the rough
26840	Fence pickets, wooden
26845	Flooring squares, wooden, with or without paper backing or metal splines, not wood carpeting nor parquet flooring

[fol. 1504]

Item No.	Commodity
26850	Fuel wood or pulpwood
26855	Furniture stock, wooden, noibn, in the rough
26865	Hame sticks, in the rough, wooden
26870	Handles, wooden, noibn, in the rough or rough turned
26875	Heading, head linings, hoop poles, hoops, not coiled, or staves, cooperage, wooden
26880	Hoops, coiled, wooden
26885	Hounds, wooden, in the rough
26890	Hub blocks, wooden, in the rough
26900	Kindling, fire, wood
26905	Lath, wooden
26910	Logs, foreign wood, noibn
26915	Logs, native wood, Canadian wood or Mexican pine
26935	Lumber or veneer, noibn, native wood, Canadian wood or Mexican pine, exceeding 1/16 inch, but not exceeding 1/8 inch thick; and exceeding 1/8 inch thick
26940	Match blocks
26950	Mine props or timbers, wooden
26955	Piling, wooden
26960	Plugs, tie, wooden
26965	Poles, bird house
26970	Poles, vehicle, wooden, in the rough
26975	Poles, wooden, noibn
26980	Poles or stakes, plant, wooden, plain
26985	Posts, noibn, wooden
26990	Rafters, roof, wooden, laminated
26995	Reelheads, wooden
27002-B Sub. 37	Sawdust, wood dust, sanding machine
27005	Shafts, wooden, in the rough

[fol. 1505]

Exhibit No. 1—Continued

Item No.	Commodity
27010	Shingle tow (shingle shavings)
27015	Shingles, wooden
27020	Silo Staves, wooden
27035	Stakes, surveyors', wooden, not painted nor lettered
27040	Staves, cooperage, wooden, with metal hoops attached
27045	Staves, pipe or flume, wooden
27050	Sucker rod poles, wooden, in the rough
27055	Tank staves or bottoms, wooden
27060	Ties, railroad, wooden
27065	Tongues, vehicle, wooden, in the rough
27070	Vehicle or gear woods, in the rough, noibn
27075	Veneer, native wood, paper covered, exceeding 1/8 inch but not exceeding 3/4 inch thick
27080	Wheel rims, wooden, in the rough
27085	Whip handle material, wooden, in the rough
27090	Willow wood
27105	Wood, built-up or combines, noibn, native wood, Canadian wood or Mexican pine
27110	Wood, spent, ground or not ground
27115	Wood, dust, sanding machine
27125	Wood sawdust, noibn
27130	Wood sawdust or shavings, cedarwood
27205	Anvil blocks, power hammer
27315	Balls, crushing or grinding, porcelain
27325	Balls, polishing, steel
27405	Bed plates, iron, noibn, weighing each 500 lbs. or over, not machined
27420	Bits or paints, coal cutting machine, steel, finished or unfinished
27780	Carriers or conveyors (overhaul runways)

[fol. 1506]

Item No.	Commodity
28405	Crusher, breaker or grinder parts, coal, ore or stone, noibn
28455	Derrick bases, booms, legs, masts or sills, iron or steel
28480	Dies or molds, cast iron or steel, for stamping metal ceiling, cornice or siding
28590	Elevator buckets, iron or steel
28622	Flights, belt conveyor, steel
28655-A Sup. 21	Box linings (trough linings), spiral screw conveyor, steel
28840	Formers, cast iron, for pressed steel car shapes
28900	Furnace parts, blast or open hearth, iron or steel
29030	Discs, road grader
29080	Scarifier teeth
29175	Hammers, pulverizing mill, steel
29195	Head gates or sluice gates, canal or reservoir, iron, without or with not exceeding 24 inches of pipe or flume attached
29500	Kilns, iron, noibn, KD

Exhibit No. 1—Continued

Item No.	Commodity
29650	Lubricators or grease cups, noibn, other than automatic, iron or steel
29720	Millstones
29880	Stamp mill cams, dies, mortar blocks, mortars, shoes, stems or tappets
30010	Beater bed plates, paper mill
30035	Roller bars, iron or steel, paper mill
30075	Pile driver hammers, drop type
30110	Pile driving caps, wooden
30135	Base plates, floor stands, hangers, journal boxes, wall box frames or wall brackets, power transmission machinery
30310	Tubing, pump, wooden
30535	Roll pinions, rolling mill, iron or steel

[fol. 1507]

30590	Rolling mill housings or tables
30677	Rolls, rolling mill, iron or steel
30765	Foundation frames, scale, steel, KD
30770	Rail stands or rail blocks, scale, iron
31005	Dipper fronts, lips, nose plates, tooth bases or points; or dipper or bucket parts, cast or forged, not machine finished, noibn, A-frame legs, eye bars or truck arch bars, iron or steel, power shovel
31055	Slag pots, not mounted
31065	Soap frames, KD
31365	Loom harness shafts
31385	Picker sticks, wooden
31440	Warp beams, without heads or with heads, old
31445	Warp beams, noibn, including beams with cast iron heads, old
31480	Tractor axle housings, iron, unfinished
31505	Tractor brake drums, without attachments, unfinished
31555	Tractor hubs, without bearings
31560	Tractor lugs, steel
31575-B Sup. 40	Tractor seats, iron or steel, without seat springs or brackets or hydraulic shock absorbers
31585	Tractor tread shoes or street plates
31600	Tractor wheel bands, flanges, rims, rim clamps or wedges
31635	Trench excavating machine buckets or bucket plows, steel
31810	Weights, wheel, iron, weighing each 25 lbs. or over
31845	Wheels, traveling crane, cast iron, single piece, double flange, weighing each 25 lbs. or over
31925	Magnesia refractory, not dead burned
31927	Magnesite, calcined or dead burned
31930	Magnesite, crude

[fol. 1508]

Exhibit No. 1—Continued

Item No.	Commodity
31982 Sup. 21	Magnesium metal fluxing or purifying compounds
32000	Manure, dog or bird, noibn
32005	Manure, domestic fowl
32010	Manure, guano
32013	Marbles, clay or glass
32014	Marbles, clay, glass or porcelain, noibn
32016 Sup. 35	Markers, talc, sawed or chipped
32017	Marl
32040	Meal, hoof or horn
32045	Meal, kapok seed
32050	Meal, rape seed
32065	Cocoanut oleine
32070	Cracklings, edible
32080-A Sup. 21	Lard, noibn
32115	Meats, cured, noibn, dried, dry salted or smoked
32120	Meats, cured, noibn, pickled
32150	Sausage, cooked, cured or preserved, noibn
32155	Sausage, cooked, cured or preserved, pickled or in brine
32350	Dross or skimmings, babbitt metal
32355	Dross or skimmings, solder
32360	Dross or skimmings, type metal
32370	Electrotype base metal
32460	Residue, zinc lead
32520	Speiss (smelter by-product, containing cobalt-nickel)
32635	Mica, book or rough cobbed
32640	Mica, ground or pulverized
32642 Sup. 35	Mica, scrap, having value only for grinding or pulverizing
32680	Mineral pulp, papermakers'
32717 Sup. 21	Mold developer (liquid corn solubles)

[fol. 1509]

Item No.	Commodity
32888	Motor fuel, noibn
32897-A Sup. 21	Mud or compounds, gas or oil well drilling
33110	Mussel meat, not edible, dry
33185	Dross, nickel
33465	Nozzles, sleeves or stopper heads, clay
33610	Oakum
33715	Oil well drilling mud treating compounds
33740	Arms, cants, handles or pins, band, bull or calf wheel, wooden
33765	Blocks, pull rod, wooden
33770	Blocks, underreamer dressing

Exhibit No. 1—Continued

Item No.	Commodity
33785	Caps, sand line
33790-A Sup. 35	Casing assemblies, well
*33860	Guides, wire line, wooden
33870	Heads, casing, noibn, well
33970	Post, stroke, iron, well
33980	Protectors, box and pin, well
33985	Rams, bit, well
34230	Creosote (dead oil of coal tar of wood tar)
34240	Fatty acids of vegetable, fish or sea animal oils, noibn, inedible
34255	Fish or sea animal oil, noibn, solidified
34300	Oil foots or sediment, noibn, other than petroleum products
34405	Tall oil (product of acidification of skimmings of soda, or sulphate black liquor), crude
34410	Tall oil (product of acidification of skimmings of soda, or sulphate black liquor), other than crude
34657	Shell packing stops, steel
34682	Osmunda fibre (orchid peat)
*33820	Clamps or grips, casing, pipe, polished rod or pullrod, well
[fol. 1510]	
35005	Packing, vegetable fibre, noibn
35020-A Sup. 21	Packing cushions or packing pads, excelsior, grass, hay, straw, or shredded or macerated paper, in machine pressed bales
35200	Blue, ultramarine, lumps or powdered
35320	Mortar color, noibn, dry
35325	Mortar color, noibn, paste or pulp
35330	Ochre, dry
35370	Rust preventive pipe line coating, asphaltum, coal tar or pitch base, other than asphaltum or coal tar paint or varnish
35375	Smalts, painters
35385	Whitewash, dry
35470	Paper, building, roofing or sheathing, including felt paper, saturated or not sturated
35550	Government pulp (macerated paper currency pulp)
35655-B Sup. 21	Paper, scrap or waste, not sensitized
35695	Paper, wall, unfinished
35782	Paper, coated with bird gravel or bird sand
35830	Box straps or strapping, fibreboard
35845	Bungs or plugs, noibn, pulpboard
35930	Cores or tubes, paper or paperboard or compressed pulp, with or without metal ends, noibn, walls .225 inch or more in thickness
36310	Paper filler, noibn

EXHIBIT No. 1—Continued

Item No.	Commodity
36335	Paste, adhesive, noibn, in bulk in barrels
36340	Paste, casein, dry, noibn
36345	Paste, casein, noibn, other than dry
36350	Paste, flour (dry paste flour), with or without chemical ingredients
36355	Paste, starch or dextrine (dry starch or dextrine paste), with chemical ingredients

[fol. 1511]

Item No.	Commodity
36375	Peat, noibn, ground or not ground
36380	Peat briquettes
36466 Sup. 21	Petroleum cumene
36470	Petroleum treating compounds, noibn, crude, for separating water from crude oil
36475	Phosphate, basic
36480	Phosphate rock, crude, ground or pulverized
36546^{1} Sup. 35	Bar grounds, magnesite, sand and saw dust combined
36546^{5} Sup. 35	Spot grounds, steel, with wooden blocks attached
36546^{6} Sup. 35	Spot grounds, steel, without wooden blocks
36550	Plugs, paper roll, asphalt composition or pressed wax paper
36845	Sinks, cast iron, without legs or with legs detached
37085	Cross arm braces, wooden, metal parts attached if not exceeding 5% of entire weight
37095	Cross arms, wooden, with braces, brackets or insulator pins attached
37100	Cross arms or cross arm braces, wooden
37130	Insulat[illegible]rackets or pins, wooden
37152	Pole st[illegible] wooden
37155	Protectors, cable, ground or guy wire, wooden, with or without metal wires attached
37195	Polishing wheel cement or glue, or polishing wheel cement thinner
37325	Posts, bumping
37335	Posts, lamp, cement or concrete, without metal trimmings
37340	Posts, lamp, iron, without electric fixtures
37355-B Sup. 37	Poultry litter or horticultural mulch, noibn
37360	Poultry or pigeon grit

[fol. 1512]

Item No.	Commodity

37636	Type, metal, old, worn out
37670	Pumice stone, crude or ground
37700	Pyrophyllite, crude, ground or not ground

EXHIBIT No. 1—Continued

Item No.	Commodity
37730-D	Soldiers' rations
Sup. 35	
37745	Quicksilver flasks, iron
37760	Racks, automobile car decking, iron, KD, or wooden, KD or flat
37965	Angle bars or plates, railway track, iron or steel
37070	Anti-creepers or stays, railway track, iron or steel
37975	Arch bars, railway car or locomotive
38010	Base plates, railway track, iron or steel
38020	Battery storage boxes, chutes, vaults or wells, concrete
38025	Bearings, car bolster plate, with or without rollers
38050	Body or truck bolsters or buffers, railway car or locomotive
38065	Boxes, journal, without bearings, railway car or locomotive
38080	Brake beams, railway car or locomotive
38095	Brake shoes or brake shoe parts, railway car or locomotive
38100	Brakes, steel, noibn, railway car or locomotive
38105	Bumpers, railway track, iron or steel
38130	Car roofs, KD, or roof parts, noibn, steel
38140	Carlines, single, railway car or locomotive
38370	Coupler knuckles, railway car or locomotive
38375	Couplers, railway car or locomotive
38380	Coupling pins, railway car or locomotive
38385	Cross ovens, railway track, iron or steel
38390	Cross tie fastenings, railway track, iron or steel
38395	Cross ties, railway track, iron or steel

[fol. 1513]

Item No.	Commodity
38405	Crossing foundations, railway track, iron or steel
38410	Crossings, railway track, iron or steel
38425	Cylinders, locomotive, in the rough
38450	Derailers, railway track, with or without flags or targets, iron or steel
38460	Draft gear or rigging, railway car or locomotive
38465	Draft or coupler yokes, railway car or locomotive
38470	Draw bridge guides, railway track, iron or steel
38505	Ends, car, steel or steel and wood combined
38530	Floors or sills, car, steel
38535	Foot guards, railway track, iron or steel
38545	Frames, locomotive, in the rough
38550	Frog filler or filler blocks, railway track, iron or steel
38555	Frogs, railway track, iron or steel
38570	Grain door, railway car
38575	Guard rail clamps, railway track, iron or steel
38580	Guard rails, railway track, iron or steel
38585	Guards, cattle, clay or concrete
38610	Journal box pedestal liners, steel, railway car or locomotive
38675	Log bunks, flat car
38705	Plates, center or spring, railway car or locomotive
38720	Rail anchors, railway car, iron or steel

Exhibit No. 1—Continued

Item No.	Commodity
38727	Rail bond socket terminals, iron or steel
38740	Rail braces, chairs, guards, joints or yokes, railway track, iron or steel
38745	Rail filler blocks, wooden
38750	Rail joints, insulated, iron, wood and insulating material combined
38755	Rail shims, wooden

[fol. 1514]

Item No.	Commodity
38760	Rails, railway track, iron or steel
38790	Railway tie anti-checking irons
38800	Refrigerator car bunker grate bars or bunker bulkhead sections, plate iron or steel
38802	Refrigerator car bunker grates, plate iron or steel
38805	Reinforcing or splice bars, railway track, iron or steel
38810	Replacers, railway car or locomotive, steel
38870	Smoke box fronts, locomotive
38915	Springs, railway car or locomotive, steel
38920	Stakes or stake pockets, car, steel
38925	Stand pipes or water cranes, railway
38935	Steppers, car, iron or steel, corrugated
38945	Switch points or stands, railway track, iron or steel
38950	Switch targets, railway track, iron or steel
38955	Switches, railway track, iron or steel
38965	Tie bolts, railway track, iron or steel
38970	Tie plates or tie rods, railway track, iron or steel
38980	Tires, railway velocipede, steel, in bundles
38985	Track bolts, nut locks, nuts or washers, railway track, iron or steel
38990	Track spikes, railway track, iron or steel
38995	Track wedges or turnouts, railway track, iron or steel
39030	Trolley poles, without attachments
39040	Truck frames or sides, railway car or locomotive, steel
39045	Trucks, without motors, railway car or locomotive, KD
39060	Underframes, car, steel
39065	Underframes, car, steel with composition, steel or wooden floors, or steel with hopper bottoms attached
39070	Underframes, locomotive or locomotive tender, steel
39115	Wheels, railway car or locomotive, wooden center or spokes, steel tired

[fol. 1515]

Item No.	Commodity
39230	Rennets, calf (calf stomachs), green or green salted
39245	Retarder, plaster or stucco
39252	Retorts, iron or steel, noibn

Exhibit No. 1—Continued

Item No.	Commodity
40115	Sorgo seed (sweet sorghum)
40120	Suday grass seed
40180-A Sup. 21	Sewer pipe joint compounds, noibn, asphalt
40385	Pail or tub ear blanks, sheet steel
40505	Shells, clam, mussel or oyster, not crushed nor ground
40510	Shells, cocoanut
40520-A Sup. 21	Shells, coquina, broken, crushed or ground
40522 Sup. 35	Shells, crab, ground (crab shell meal)

[fol. 1517]

Item No.	Commodity
40530	Shells, fruit pit, not ground
40535	Nut hulls or nut shells, noibn
40545	Shells, scallop
40555	Shells, shrimp, ground (shrimp meal)
~~40770~~ Sup. 21	~~Silica gel, spent~~
40775	Silica, noibn, or silex, noibn
40776	Silicon carbide, briquettes
40777	Silicon carbide, crude
40778	Silicon Carbide, noibn (not flour nor grain abrasive)
40805	Sizing, casein
40810	Sizing, noibn
40815	Sizing, rosin
40830	Skins or rinds, smoked bacon or ham, other than glue stock
40845	Smoke flue cleaning compounds, dry
40880	Soapstone or talc linings, fire box or furnace
40885	Sod, chopped or not chopped
40910-A Sup. 21	Softener, cotton, rayon, silk or wool, noibn
41085	Springs, noibn, steel, other than wire, coiled, made of steel 5/16 inch or over in thickness
41090-A Sup. 35	Springs, noibn, steel, other than wire, elliptic or semi-elliptic, horse drawn or motor vehicle or tractor
41197	Starch, liquid
41198	Starch, noibn
41199	Starch substitutes, inedible
41201	Starting cranks, internal combustion engine
41300	Stearic acid
41305	Stearine, animal, noibn
41370	Stoppers, carboy, clay

[fol. 1518]

Item No.	Commodity
41385	Straw pulp
41437	Sulphate black liquor skimmings (not acidified or otherwise processed)
41440	Sulphur (brimstone)

EXHIBIT No. 1—Continued

Item No.	Commodity
41482	Talc, pigmented
Sup. 37	
41535	Tallow, animal
41545	Tankage, garbage, dry
41550	Tankage, noibn
41620	Cisterns, tanks or vats, wooden, noibn, KD
41695	Tanks, iron or steel, lined with lead, KD
41740	Tanks, metal pickling, wooden, KD
41915	Tile, asphalt composition
41925	Tile, brick or stone facing, mounted on pulpboard
41925	Tile, brick or stone facing, mounted on pulpboard
41935	Tile, clay or earthenware, glazed or not glazed, noibn, with or without backing
~~41945~~	~~Tile, concrete~~
41967-A	Tile, quarries, flooring, paving or promenade
Sup. 40	
41975	Tile, slag, granular
42000	Tin, dross, skimmings or sweepings
42025	Tire fabric, rubber impregnated, used (pieces of fabric stripped from worn-out pneumatic rubber tires, have value other than for reclamation of raw materials), not skived
42045	Tobacco, cuttings or scraps
42045	Tobacco, leaf
42055	Tobacco, siftings
42060	Tobacco stems, ground
42065	Tobacco stems, not ground
42070	Tobacco sweepings
42135	Anvils
42165	Bars, claw, crow or wrecking

[fol. 1619]

Item No.	Commodity
42170	Bars, tamping, noibn, iron or steel
42270	Car movers or pushers, hand
42340	Cotton stowing screws, steel
42390	Excavation braces, extension, iron
42425	Foundry skimmer bars, iron
42470	Grindstone frames, KD
42475	Grindstones, natural stone
42505	Holystones
42510	Hooks, grab, hoist, sling chain or slip, iron
42530	Jack bases, traversing
42532	Jack or jack screw parts, noibn
Sup. 35	
42535	Jacks or jack screws, noibn, not wheeled
42555	Last forms or stands
42565	Lasts, iron, finished
42595	Mandrels, blacksmiths' (blacksmiths' cones), iron or steel
42615-A	Mattocks, without handles

Exhibit No. 1—Continued

Item No.	Commodity
42615-A Sup. 40	Mattock, without handles
42625	Mauls, picks or sledges, without handles
42685-A Sup. 21	Pallets, brick or cement, or concrete block or concrete sewer pipe, iron
42690-A Sup. 21	Pallets, brick or cement, or concrete block or concrete sewer pipe, wooden
42800	Saws, foundry core, not further finished than stamped, hand
42845	Sheep sets
42890	Sprags, wooden
42915	Stokers, hand, KD
42925	Stones, rubbing, noibn, sandstone
42930	Stones, rubbing, noibn, other ~~than sandstone~~
42935	Stones, scythe

[fol. 1520]

Item No.	Commodity
43050	Vises, iron or steel
43060	Wedges, noibn, iron
43065	Wedges, noibn, wooden
43070	Whetstones, noibn, sandstone
43100	Wrenches, noibn, without attachments
43220	Tree or weed killing compounds, noibn
43320	Tuyeres, clay
43382	Vegetable fibre pulp, noibn
43625	Stone boats, horse-drawn or trailer, not wheeled
43840	Axle boxes or skeins, iron
43845	Axle or spring clips, couplings or staples, noibn
44050	Carriage or wagon castings, forgings or stampings, noibn, for horsedrawn vehicles
44055	Carriage or wagon irons, noibn, for horse-drawn vehicles
44100	Felloes or wheel rims, wooden, noibn, sawed, not bent, in the white
44105	Fifth wheels or gear sets for horse-drawn vehicles
44165	Hounds, wooden, in the white, ironed or not ironed
44170	House movers' truck bolsters, iron
44175	Hubs for horse-drawn vehicles, iron
44185	Knees, sled or sleigh, iron or steel
44260	Poles or tongues, farm wagons, wooden, in the white, ironed or not ironed
44270	Poles or tongues, noibn, wooden, in the white, ironed or not ironed
44285	Poles or tongues, wooden, for passenger vehicles, in the white, ironed or not ironed, KD
44300	Reaches, wooden, in the white, ironed or not ironed
44360	Shafts, wooden, in the white, ironed or not ironed, KD
44370	Shoes, sled or sleigh, steel
44380	Spokes, wooden, in the white
44630	Wall cleaning compounds

[fol. 1521]

EXHIBIT No. 1—Continued

Item No.	Commodity
44640	Wall paper pulp coloring, noibn
44740-A Sup. 35	Apple cores, pomace, skins or waste, or apple chops (chopped apples), not frozen
44750	Batteries, electric, dry cell, old, spent, having value only for reclamation of materials
44755	Batteries, electric, storage, assembled, old, spent, without chemicals, having value only for reclamation of materials
44757	Barks, tan, ground, spent
44760	Beeswax refuse
44765	Boots or shoes, old, worn out, leather or leather and cloth combined, having value only for reclamation of raw materials
44772	Burlap, old, used, ink stained
44775	Buttons, scrap, used (broken or refuse buttons taken from old clothes or rags)
44790	Carbide of calcium residue
44795	Carpet mill flyings or shearings, in machine pressed bales
44810	Carpets or rugs, old, worn out, having value only for conversion into fibre or for reweaving purposes
44815	Castor bean hulls or stems, ground or not ground
44820	Castor pomace
44835	Cellulose film scrap or waste, in machine pressed bales
44845	Chemically hardened fibre scrap, flexible or hard, such as fibreoid, leatheroid or vulcanized fibre
44855	Cloths or mats or cloth or matting, filter press, hair or wool, old, worn out, other than shredded, in machine pressed bales
44860	Coffee hulls
44870	Cotton motes, gin flue cleanings or cotton sweepings (cotton refuse from gin flues, spinning factories, knitting mills or cotton seed oil mills), in bales compressed to 15 lbs. or more per cubic foot
44875	Crucibles, muffles or scorifiers, clay or silicon carbide, broken but not pulverized
44880	Electrotype plates or electrotype shells, scrap (old worn out or scrapped, having value for remelting purposes only)
44890	Feather refuse or quill clippings, in machine pressed bales

[fol. 1522]

Item No.	Commodity
44895	Felt clippings or felt scrap, in machine pressed bales
44905	Fertilizer synthetic gum or resin scrap, with filler, having value only for fertilizer purposes or for its nitrogen content
44910	Fertilizer wool refuse, having value only for fertilizer purposes or for its nitrogen content
44930	Glasshouse pots or tank blocks, broken
44935	Grape pomace, dry

EXHIBIT NO. 1—Continued

Item No.	Commodity
44940	Grape pomace, wet
44945-A Sup. 21	Graphite scrap
44970	Hops, spent, in machine pressed bales
44975	Hose, fabric and rubber combined, worn out, unfit for further use as hose but having value other than for reclamation or raw materials
44980	Hulls, velvet bean, ground
44990	Insulators, electric wire, noibn, pottery, broken
44995	Iron mass or sponge, gas purifying, spent
45000	Lac refuse
45010	Loom harness, twine or yarn, old, worn out
45015	Magnesium carbonate, spent, having value only for reconditioning purposes
45020	Meat refuse, non-edible
45035	Oilcloth scrap, trimmings or waste, having value only for reclamation of rags
45065	Pottery, broken or broken saggers (shard)
45070	Printers' roller composition, old, refuse or scrap
45085	Rag or shoddy dust, noibn, in machine pressed bales
45090-A Sup. 21	Rags, noibn, in machine pressed bales
45110	Roots, licorice, ground or powdered, spent
45115	Rope or twine, scrap, consisting of old worn-out rope or twine having value for remanufacturing purposes only
45120	Rubber matting trimmings (waste)

[fol. 1523]

Item No.	Commodity
45125	Rubber reclamation residue
45130	Sal-ammoniac skimmings
45135	Saws, band, worn out, cut into short lengths
45155	Stereotype plates, old, worn out, broken or not broken, shipped with type faces unprotected, or scrap, having value for remelting purposes only
45160	Stone stencil compound scrap
45165	Sugar cake mud (refuse from sugar filter presses)
45170	Sweepings, felt mill, in machine pressed bales
45180	Tanning liquor, spent
45205	Tobacco dust, refuse, sand or waste
45220	Waste, alpaca hair, camels' hair, mohair (angora goat hair), or wool waste, noibn, including clips, tags or sweepings, with or without other fibres, actual value not exceeding 6½ cents per pound, in machine pressed bales
45235	Waste, cordage mill, other than cotton, consisting of cordage clippings, fibre bands, dust or sweepings, or old bale wrappers (old Manila matting), in machine pressed bales
45240	Waste, cotton, noibn, in bales compressed to 15 lbs. or more per cubic foot

Exhibit No. 1—Continued

Item No.	Commodity
45245	Waste, cotton and flax combined, consisting of card strippings, slasher waste sweepings or threads (refuse of crash mills), in machine pressed bales
45247	Waste, cotton and rayon combined (refuse or sweepings), in machine pressed bales
45250	Waste, flax mill, consisting of combings, scrapings or sweepings, in machine pressed bales
45265	Waste, insulating material, flax fibre or hair, torn in pieces, having value only for reconversion into fibre or hair, in machine pressed bales
45270	Waste, jute, in machine pressed bales, or in rolls
45272	Waste, lubricating grease, asphalt base, containing not less than 85% asphalt, spent
45275	Waste, rayon and silk combined, having value other than for respinning purposes, in machine pressed bales
45280	Waste, rayon (refuse or sweepings), in machine pressed bales
45285	Wine lees, in barrels

[fol. 1524]

Item No.	Commodity
45290	Wool rag dust, wool shoddy dust, woolen mill dust, wool duster waste or shoddy duster waste (not including wool fibres not staples), in machine pressed bales
45300	Wood residuum (crude lignin), dry
45315-A Sup. 21	Waste, packing or wiping, manufactured, oiled
45320-A Sup. 21	Waste, packing or wiping, manufactured, cotton, not oiled, in machine pressed bales
45357 Sup. 21	Water, corn steep, liquid
45360	Water, evaporated tank
45375	Water clarifying, hardening, purifying or softening compounds, noibn, dry
45485	Weights, sash, composition, iron or steel jacketed
45490	Welding bars, rods or wire, iron or steel, chromium-manganese coated
45500	Welding compound
45540	Wheel blanks, cog, gear, pinion or sprocket, iron, cast or forged, not further finished than rough machined
45555	Wheel blanks, iron or steel, noibn, cast or forged, not further finished than rough machined
45685	Wire cloth, iron or steel, ½ inch mesh or over
45750	Wood preservatives, noibn, liquid or paste, in bulk in barrels
45767	Wood sawdust or shavings, partly carbonized, wet
45770	Wood splitting preventive compound
45870	Bungs or plugs, noibn, wooden
45890	Capstan bars, wooden
45975	Gambrel sticks, wooden

Exhibit No. 1—Continued

Item No.	Commodity
45985	Hame sticks, in the white, wooden
45995	Ice can covers or ice tank frames, wooden
46020	Ladder parts, wooden, in the white
46045	Platforms, noibn, wooden, flat or KD flat
46065	Pulley block shells, wooden

[fol. 1525]

Item No.	Commodity
46070	Rims, riddle or sieve, wooden, coiled
46080	Roll protectors: Discs (circular heads), wooden
46085	Rollers, house movers', wooden
46125	Slats, ash can, garbage can or trunk, wooden
46150	Sucker rods or pull rods, wooden, ironed
46185	Trunk box material, in shucks or panels, noibn, wooden
46235	Yard stick or gauge stick blanks, wooden, in the white
46255	Woodpulp, not powdered, noibn
46337	Zinc ashes
46350	Blanks or stampings, noibn, zinc, flat
46365	Zinc dross
46420	Zinc, plate, sheet or strip, noibn
46430	Zinc residue
46435	Zinc Scrap (scraps or pieces of zinc having value for remelting purposes only)
46445	Zinc skimmings

[fol. 1526]

EXHIBIT No. 2

Statement Showing Items in C. F. C. No. 16 and Supplement Thereto Rated 3rd Class (Col. 70) in Western Classification Territory on Which No Commodity or Exception Ratings Apply

Item No.	Commodity
55	Acid, abietic
60	Acid, acetic, glacial or liquid, in bulk in barrels
75	Acids, noibn, liquid, in bulk in barrels
85	Acid, arsenic, other than fused, in barrels
87	Acid, azelaic, from animal or vegetable fats
90	Acid, boracic
95	Acid, carbolic (phenol)
105	Acid, chromic, in bulk in steel barrels
110	Acid, cresylic (cresol), in bulk in barrels
120	Acid, formic, in bulk in barrels
130	Acid, hydrofluoric
135	Acid, hydrofluosilicic
137 Sup. 21	Hydroxy acetic acid
140	Acid, lactic, in bulk in barrels
150	Acid, monochloroacetic, in bulk in barrels
155	Acid, muriatic (hydrochloric), in bulk in barrels or rubber drums
160	Acid, nitrating (mixed nitric and sulphuric), in metal barrels
170	Acid, oxalic
172	Acid, pelargonic, from animal or vegetable fats
175	Acid, phospho—Cresylic, in steel drums
180	Acid, phosphoric, in bulk in barrels
185	Acid, phthalic anhydride
190	Acid, propionic, in bulk in barrels
195-A Sup. 35	Acid, pyroligneous, in bulk in barrels.
300	Displays, brick or tile facings or tile mounted on panels

[fol. 1527]

Item No.	Commodity
355	Agricultural implement parts, hand, noibn, wooden, in the white
365	Cultivators, not wheeled
370	Cultivators, wheeled, KD
375	Cutters, feed, K. D.
390	Distributors, fertilizer, wheeled, KD
395	Drills, hand, agricultural, wheeled, KD
400	Fingers, grain cradle
405	Forks, hand, agricultural, metal lined
415	Grain cradle bodies (cradles without scythes or snaths)
420	Grain cradles
425	Heads, fork, hoe, manure hook, potato hook or rake
430	Hoes, hand, not wheeled
435	Hoes, hand, wheeled, KD

Exhibit No. 2—Continued

Item No.	Commodity
445	Hooks, manure or potato
455	Mulchers, wheeled, KD
485	Plows, wheeled, hand, KD
495	Rakes, wheeled, hand, KD
500	Rakes, not wheeled with iron or steel heads
510	Rollers, garden or lawn
525	Seeders, wheeled, hand, KD
530	Shellers, corn, with legs or stands, detachable parts removed
535	Shellers, corn, without legs or stands
545	Snaths, grain cradle or scythe
550	Sod lifters
555	Sorters, onion or potato, KD
565	Trowels, garden
570	Turf edgers
575	Weeders, hand, not wheeled

[fol. 1528]

Item No.	Commodity
580	Weeders, hand, wheeled, KD
610	Bean harvesters, KD
615	Beet harvesters, KD
620	Beet lifters, KD
622	Beet loaders, KD
Sup. 21	
625	Beet pullers, KD
628	Beet thinners, KD
Sup. 21	
635	Binders or harvesters, noibn
640	Blue grass strippers, KD
645	Broom corn dumps, KD, or folded flat
650	Clod crushers or pulverizers
660	Corn binders, harvesters or shockers, KD, separate or combined
685	Cotton choppers, KD
705	Coulter harrows, KD
710	Cultivators, other than hand, KD
720	Disc harrows, with or without sower attachments, KD
725	Ditchers or terracers, farm, KD
730	Drills or planters, grain, peanut or seed, KD
765	Fertilizer distributors, noibn, with handles, KD
770	Fertilizer distributors, noibn, without handles, poles detached, wheels off
775	Field rollers
780	Harrow attachments for riding plows, KD
785	Harrow carts, KD
790	Harrows, spring tooth or peg tooth
805	Hay carriers
810	Hay curing trucks, two-wheeled

[fol. 1529]

Exhibit No. 2—Continued

Item No.	Commodity
820	Hay loaders, stackers (rickers), tedders or shock loaders, KD
835	Horse powers, tread, KD, gear wheels on or off
840	Manure loaders or spreaders, KD
845	Markers, furrow or row, KD
860	Planters, cultivators and fertilizer distributors combined, KD
870	Plows, agricultural, other than hand, KD
880	Potato diggers, KD, wheels on or off, or without wheels
885	Potato loaders, KD
890	Potato planters
895	Rakes, agricultural, other than hand, KD, teeth detached
905	Seed potato cutters, KD
915-A Sup. 21	Sowers, grain or seed, broadcast, KD
930	Stalk cutters, field, taken apart
950	Trucks, tongue or transport, one or two wheeled, noibn, KD
955	Wagon dumps, farm
960	Weeders, KD, teeth detached
965	Windrow pickups, KD
970	Windrowers, KD
990-A Sup. 21	Agricultural implement parts, other than hand, noibn, iron
1005	Agricultural implement parts, other than hand, noibn, wooden, in the white
1030	Beams, agricultural implement, wooden, finished
1035	Binding attachments for harvesters or reapers
1040	Blades or points, grain or seed drill
1045	Boxes or spools for harrow balls
1050	Bunchers or windrowers for mowers, KD
1055	Bundle carriers, KD or folded

[fol. 1530]

Item No.	Commodity
1060	Chain, elevator, potato digger, iron
1070	Damming attachments, KD
1075	Discs, agricultural implement
1080	Discs and drag bars combined
1085	Guards, knife, with or without guard plates attached
1090	Guards or plates, grain lifter
1095	Guides or poles, separator steering
1100	Handles, agricultural implement, iron
1105	Handles, agricultural implement, wooden, finished
1110	Harrow frames, KD
1125	Knives for ensilage, feed or stalk cutters
1130	Knives or knife sections, agricultural implement, noibn
1135	Pitmans, agricultural implement
1140	Plow bottoms
1150	Poles, steel, agricultural implement
1155	Poles, wooden, agricultural implement, finished

Exhibit No. 2—Continued

Item No.	Commodity
1160	Potato digger parts, iron, noibn
1165	Rasps or spikes (teeth) for clover hullers or threshers
1170	Rolling coulters, or rolling coulter blades
1180	Screens (sieves) for threshers
1185-A Sup. 21	Seats, agricultural implement, iron, with seat springs or brackets
1190	Shoes, grain drill
1200	Sulky attachments, KD
1205	Sweeps, levers or tread blocks for horse powers
1210	Teeth, hay stacker or rake
1215	Traction engine plowing guides
1220	Tractor hitches

[fol. 1531]

Item No.	Commodity
1225	Trays, tool or harrow weight, iron
1235	Tubes, grain drill, steel, flexible
1240	Wheels, agricultural implement, iron, other than master wheels (bull wheels), finished or not finished, with or without lubricators or bearing races, not including machine finished gear or sprocket wheels, without rubber tires
1255	Wheels, agricultural implement, wooden or iron and wood combined, noibn
1260	Wire, check rower
1400	Albums or scrap books, paper or pulpboard
1405	Algarrobilla
1415	Alginates, ammonium or sodium, paste
1440	Calcium-manganese-silicon
1467	Ferro-molybdenum
1525	Silicon-zirconium
1595	Borings, aluminum
1600	Buffings, aluminum
1680	Grindings, aluminum
1730	Sawings, aluminum
1735	Scrap, aluminum
1780	Turnings, aluminum
1792-A Sup. 37	Aluminum flux, noibn
1890	Bullets or bullet cores
1902	Cartridge shells (cartridge cases), small arm, empty, old, used
1905	Dummy charges (dummy cartridges)
1980	Argols
2000	Brake blocks, asbestos, non-flexible
2015	Asbestos, crude
2025	Doors, asbestos, glazed

[fol. 1532]

Exhibit No. 2—Continued

Item No.	Commodity
2030	Doors, asbestos, not glazed
2055	Asbestos lumber, including flat or hard sheathing, not ornamented, polished nor shaped, with or without asbestos air cell board or asbestos fibrous pulp center, or with fibreboard center or back
2062	Asbestos millboard
2110	Asbestos wallboard, with not more than two coats of paint, enamel or lacquer, or not painted, enameled nor lacquered
2115	Asbestos wallboard, with more than two coats of paint, enamel or lacquer
2235	Tar, coal or petroleum, in metal cans in boxes or crates, or in kits or steel pails
2245	Tar, noibn, in metal cans in barrels, boxes or crates
2285	Bats, baseball or cricket

10035	Aluminum acetate, liquid, in bulk in barrels
10040	Aluminum bisulphite
10045	Aluminum chloride, dry
10050-A Sup. 37	Aluminum chloride, liquid, in bulk in barrels
10060	Aluminum formate, liquid, in barrels
10065 Sup. 35	Aluminum phos[illegible]ate
10070	Aluminum resinate, in barrels
10080	Aluminum stearate
10080	Aluminum stearate
10090	Ammoniacal liquor or aqua ammonia, noibn
10102 Sup. 35	Ammonium borate or biborate
10125	Ammonium nitrate
10127	Ammonium nitrate, magnesia and pulp mixture
10128	Ammonium nitrate, sodium nitrate mixture
10130	Ammonium perchlorate
10135	Ammonium phosphate

[fol. 1548]

Item No.	Commodity
10140	Ammonium silicofluoride

EXHIBIT NO. 2—Continued

Item No.	Commodity
10150	Ammonium sulphate nitrate (leunasalpeter)
10155	Ammonium sulphide, dry
10160	Ammonium sulphide solution, in bulk in barrels
10162 Sup. 21	Ammonium thiocyanate crystals (ammonium sulphcyanate crystals)
10164-A Sup. 35	Ammonium thiosulphate solution, in aluminum drums
10165	Amyl acetate, in bulk in barrels or steel cylinders
10175	Aniline hydrochloride (aniline salt), in barrels
10180	Antimony crocus
10190	Antimony oxide
10220	Arsenic disulphide (red arsenic)
10235	Barium binoxide, in steel barrels
10245	Barium chlorate
10255	Barium dioxide, in steel barrels
10260	Barium fluoride
10270	Barium nitrate
10280	Barium peroxide, in steel barrels
10327	Blasting chlorate, noibn, in bulk in barrels
10355	Butyl acetate, in bulk in barrels
10370	Butyraldehyde, in bulk in barrels or steel cylinders
10395	Calcium carbide
10415-A Sup. 40	Calcium chloride, other than liquid
10420	Calcium citrate
10425	Calcium lactate
10440	Calcium phosphate
10450	Calcium resinate
10475	Carbo-nitrate

[fol. 1549]

Item No.	Commodity
10480	Carbon bisulphide (carbon disulphide)
10492	Carbon trichloride (Hexachlorethane)
10535-A Sup. 37	Chloroform, in bulk in steel barrels
10540	Chloropentanes (dichloropentanes, Trichloropentanes or Tetrachloropentanes)
10550	Chrome chloride solution
10560	Chromium acetate
10555	Chrome sulphate solution
10565	Chromium acetate waste
10570	Chromium resinate
10580	Cobalt resinate
10595	Copper acetate (verdigris)
10600	Copper carbonate
10610	Copper oxide, noibn
10615	Copper resinate
10630	Crotonaldehyde

Exhibit No. 2—Continued

Item No.	Commodity
10645-A Sup. 21	Cyanides, crude, noibn, (crude cyanogen salts, noibn)
10655	Diacetone, in bulk in barrels or in steel cylinders
10685	Dicyandiamide
10697	Dimethylol urea
10720	Dyes or colors, coal tar, other than indigo, liquid or paste, in bulk in barrels
10740-A Sup. 21	Ether, ethyl (sulphuric ether), other than anesthesia ether, in bulk in steel barrels or cylinders
10745-A Sup. 21	Ether, isopropyl
10750	Ethyl acetate, in bulk in barrels or in steel cylinders
10762 Sup. 21	Ethyl benzene, ethyl benzine, polethylbenzene or polyethylbenzine
10765	Ethylene chlorhydrin, in steel barrels

[fol. 1550]

Item No.	Commodity
10770	Ethylene dichloride
10773	Ethylene oxide
10780	Formaldehyde, dry
10785	Formaldehyde, liquid
10790	Formaldehyde, paste
10805	Furfural
10810	Guanidine nitrate
10825	Glycerine, other than crude, in bulk in barrels
10830	Hydrogen dioxide or hydrogen peroxide, in bulk in barrels
10840	Indigo, liquid or paste
10848	Iron acetate (iron liquor), in bulk in barrels
10860	Iron chloride (iron muriate), dry
10865	Iron chloride (iron muriate), liquid, in bulk in barrels
10867-A Sup. 40	Ferris chloride, dihydrate
10895	Iron sulphide
10900	Isobutyl acetate, in bulk in barrels
10902	Isobutyl aldehyde
10905	Isopropyl acetate
10915	Lead nitrate
10920	Lead oleate
10925	Lead peroxide, ground, dry
10935	Lead resinate
10960	Lime, chlorinated (chloride of lime, bleach, noibn, or bleaching powder, noibn), liquid (aqueous solution)
10970	Lime water
10980	Magnesium chloride
10985	Magnesium fluosilicate (magnesium silicofluoride)
11005	Magnesium oxide, light calcined
11028 Sup. 21	Manganese acetate, liquid

[fol. 1551]

EXHIBIT No. 2—Continued

Item No.	Commodity
11029 Sup. 35	Manganese borate

[fol. 1552]

11030	Manganese chloride (manganese muriate)
11035	Manganese phosphate
11040	Manganese resinate
11055	Manganese sulphate, noibn
11057-A Sup. 37	Methallyl chloride, in barrels
11060	Methyl acetate
11065	Methyl acetone
11075	Methyl isobutyl ketone or methyl propyl ketone
11100	Naphthalene, other than crude
11105	Nickel ammonium sulphate
11125-A Sup. 37	Nickel sulphate or single nickel salts
11145	Nitro-carbo-nitrate
11160-A Sup. 37	Paraldehyde, in bulk in barrels
11170	Pentachlorethane
11175	Perchlorethylene
11190	Phosphoric catalyst (silica and phosphoric acid combined)
11210	Phosphorus chloride (phosphorus trichloride)
11215	Phosphorus oxychloride (phosphoryl chloride)
11220	Phosphorus pentachloride (phosphoric chloride or phosphoric perchloride)
11250	Potassium bicarbonate
11255	Potassium bichromate
11257 Sup. 35	Potassium borate
11265	Potassium carbonate (pearlash)
11275	Potassium chlorate
11305	Potassium metabisulphite
11320-A Sup. 21	Potassium perchlorate
11325	Potassium permanganate
11335	Potassium (potash) salts, noibn
11340	Potassium prussiate
11345-A Sup. 21	Potassium silicate
11365	Potassium xanthate
11380	Propyl acetate
11385	Propyl aldehyde
11390	Propylene dichloride
11392	Propylene glycol
11402	Silica gel or silica gel catalyst
11415	Sodium acetate

EXHIBIT NO. 2—Continued

Item No.	Commodity
11420	Sodium aluminate
11425	Sodium antimoniate
11430	Sodium arsenate
11445	Sodium bichromate
11450	Sodium bifluoride
11455	Sodium bisulphite, dry
11460	Sodium bisulphite, liquid
11470	Sodium butyrate solution
11485	Sodium caustic (sodium hydroxide)
11490	Sodium chlorate
[fol. 1553]	
11505	Sodium Chromate, dry
11510	Sodium Chromate, other than dry (chromate solution)
11535	Sodium Fluoride
11540	Sodium formate
11550-A Sup. 21	Sodium hydrosulphite
11560	Sodium hyposulphite
11565-A Sup. 36	Sodium lactate
11575	Sodium nitrate (chili saltpeter)
11582	Sodium nitrate-sulphur mixture, paraffined
11585	Sodium nitre cake (crude bisulphate of soda)
11590	Sodium nitrite
11595	Sodium oxalate
11600	Sodium perborate
11605	Sodium permanganate
11625	Sodium prussiate
11630	Sodium resinate
11665	Sodium silico-fluoride
11670	Soda or sodium salts, noibn
11692 Sup. 21	Sodium thiocyanate crystals (sodium sulphocyanate crystals)
11700	Sodium xanthate
11715	Strontium nitrate
11717-A Sup. 21	Styrene, liquid
11735	Anthracene, crude
11745	Benzol (benzene)
11750	Chlorobenzol (monochlorobenzol)
[fol. 1554]	
11755	Coal tar naphtha solvent
11760	Coal tar resin
11762 Sup. 37	Cumene
11765	Dinitrobenzol
11770	Dinitrochlorobenzol

EXHIBIT No. 2—Continued

Item No.	Commodity
11780	Dinitrotoluol, dry
11785	Dinitrotoluol, other than dry
11800	Mononitrotoluol, dry
11805	Mononitrotoluol, other than dry
11810	Nitrobenzol (oil mirbane)
11815	Nitroxylol (nitroxylene)
11820	Orthodichlorobenzol
11825	Orthonitrotoluol
11830	Paradichlorobenzol
11840	Toluol (toluene)
11845	Trichlorbenzene
11855	Xylol
11875	Tetrachlorethane
11880	Tetrachlornaphthalene
11935	Trichlorethylene
11940	Triethylene glycol
11955	Urea
11965	Vinyl acetate
11979	Zinc borate, dry
11980	Zinc chloride, chromated
11985	Zinc chloride, dry
11990	Zinc chloride, liquid

[fol. 1555]

Item No.	Commodity
11992	Zinc fluosilicate
11995	Zinc hydrosulphite
12000	Zinc laurate
12025	Zirconium oxide
12030	Zirconium silicate
12035	Chicory mass
12045	Chinaware, earthenware, porcelainware or stoneware, noibn, released to value not exceeding $20.00 per 100 lbs.
12095	Saggers, pottery
12110	Chips or shavings, brewers' or vinegar
12115	Chutes, coal delivery, wagon, iron
12120	Chutes, concrete distributing, iron
12130	Chutes or spouts, iron, noibn, plate, 7 gauge or thicker
12135	Cigar or cigarette lighting liquids or pastes
12185	Circus seat backs, wooden, or wood and metal combined
12200	Circus seats, with back, backs folded flat
12210	Seats, grand stand or stadium, iron or steel and wood combined, KD, or parts thereof
12240	Antimony sulphide, concentrated ore (needle antimony), pulverized or powdered (black sulphide, not purified)
12430	Thorium ore (monazite sand)
12450	Vermiculite, other than crude
12545	Closets or toilets, sanitary, noibn, with cast iron body
12565	Bagging, woven paper fabric

Exhibit No. 2—Continued

Item No.	Commodity
12575	Bagging or cloth, burlap, gunny, ixtle (istle), jute or sisal, bituminized
12585	Bagging or cloth, burlap, gunny, ixtle (istle), jute or sisal, stiffened or sized
12590	Bagging or cloth, burlap, gunny, ixtle (istle), jute or sisal, noibn, with or without paper lining

[fol. 1556-1557]

Item No.	Commodity
12610	Brattice cloth, burlap or cotton, fibreproofed
12625	Buckram, other than cotton
12688 Sup. 21	Cloth or paper and cellulose film, laminated and waxed
12710	Cotton bale covering, hemp or jute, new or old
12725	Cotton piece goods
12805	Oilcloth, including remnants, trimmings or waste having value other than for reclamation or rags
12840	Tobacco bale covers, burlap or cotton cloth, old
12845	Webbing, burlap or jute
12895	Cloth winding boards, corrugated fibreboard, paper covered, or solid fibreboard with built-up ends
12900	Cloth winding boards, solid fibreboard, noibn
13035	Coal saving compounds, liquid
13037	Cocoa bean refuse (dust)
13038	Cocoa bean shells, ground
13039	Cocoa bean shells, not ground
13078	Color, cheese
13105	Chimney flues or pipe, or chimney or flue linings, clay
13120	Coping, wall, clay
13155-A Sup. 35	Tanks, septic, clay
13160-A Sup. 35	Tanks, septic, reinforced concrete, SU
13220	Blow pipe or blow pipe fittings, sheet steel, side seams not closed
13260	Cocks or valves, including gate valves, noibn, or parts, noibn, lead composition body
13275	Conduits or conduit connections, fibre, bituminized or indurated (fibre or paper and asphalt or pitch combined), for underground work
13285	Conduits or conduit connections, flexible, other than steel, for other than underground work

[fol. 1558]

Item No.	Commodity
13305	Connections, pipe, lead and brass combined, without stopcock
13325	Expansion joints, iron or steel, or with iron or steel body

EXHIBIT No. 2—Continued

Item No.	Commodity
13330	Fill caps and pipes combined, oil tank
13335	Floor stands, stopcock or valve, iron
13395	Pipe, iron or steel, nickel plated
13400	Pipe, iron or steel, plate or sheet, wood lined
13405	Pipe, iron or steel, rubber or synthetic rubber lined
13430	Pipe, sub-irrigation, iron or steel, not exceeding 7/8 inch in diameter
13432	Pipe, surface irrigation, steel, 24 gauge or heavier, not over 12 inches in diameter
13452	Pipe coils, noibn, lead
Sup. 40	
13495	Pipe fittings, noibn, iron or steel, tin lined, not plated
13510	Pipe fittings, noibn, nickel-plated
13560	Pipe or pipe casing, wooden, bored or built-up, lined or not lined, inside diameter over 6 inches
13580	Pipe or tubing, brass, bronze or copper, covered or lined with iron or steel
13585	Pipe or tubing, brass, bronze or copper, noibn
13618	Pipe or tubing, iron or steel, plate or sheet, noibn, 23 gauge or thinner, inside diameter 1½ inch or less, side seams closed
13645	Pipe or tubing, nickel silver
13650	Pipe or tubing, steel, coated or lined with brass, copper or tin, outside diameter not exceeding 1½ inches, in straight lengths
13665	Smokestack collars (smokestack bases), iron or steel
13680	Smokestacks, plate or sheet iron or steel, noibn, 16 gauge or thicker, side seams not closed, in sections, sections nested
13695	Spouts, grain, iron, flexible or rigid, 17 or 18 gauge, telescoped
13700	Spouts, grain, iron, flexible or rigid, 16 gauge or thicker, telescoped
13715	Strainers, pipe line, iron or steel body
[fol. 1559]	
13740	Traps, refrigerator floor drain, iron
13750	Tubing, pier, steel, 7 gauge or thicker, taken apart lengthwise
13765	Cones, fir or pine, other than green
13795	Containers, sheet iron or steel, set up (with or without their equipment of bails, handles, covers, bungs or nozzles), liquid capacity not exceeding 1 gill
13800	Containers, sheet iron or steel, set up (with or without their equipment of bails, handles, covers, bungs or nozzles), liquid capacity exceeding 1 gill but not exceeding 1 gallon, nested
13925	Cooling rooms, KD

EXHIBIT No. 2—Continued

Item No.	Commodity
13940	Refrigerators, noibn, KD
13975	Water coolers or water filters, separate or combined, earthenware or stoneware
14030-A Sup. 37	Cork bars, rods, sheets or slabs, molded (chips, granulated, ground, shavings or waste cork, machine pressed), with added binder; or asphalt coated without binder
14060	Cork chips, shavings; virgin bark or waste, noibn, in machine pressed bales
14075-A Sup. 37	Cork, granulated or ground, in machine pressed bales
14090	Cork shoe bottom filler, plastic
14115	Corn cobs
14140	Cotton, carded, dyed or not dyed, in machine pressed bales
14175	Cotton, unginned (cotton in the seed)
14190	Cotton linters, bleached or dyed, in machine pressed bales
14200	Cotton linters pulp or cottonseed hull shavings pulp
14205	Cottonseed hull fibre or shavings, bleached or dyed, in machine pressed bales
14210	Cottonseed hull fibre or shavings, other than bleached or dyed
14215	Cottonseed hulls, not ground
14220	Cottonseed hulls, ground (cottonseed hull bran)
14230	Covers, barrel, burlap
14240	Covers, barrel, wooden, with cast iron rims

[fol. 1560]

Item No.	Commodity
14260	Covers, basket or hamper, noibn, without rim
14317	Crosses, religious, wooden, in the white
14320	Crucibles, noibn
14325-A Sup. 21	Crucibles or mufflers, abrasive material
14350	Plate or sheet, cupro-nickel
14355	Cupro-nickel rod
14360	Cupro-nickel scrap
14367 Sup. 37	Cups, cartridge case or bullet jacket, metal
14385	Curtain poles or rods, metal or metal covered, with or without fixtures; or wooden, finished or stucco covered, with fixtures
14390	Curtain poles or rods, wooden, stucco covered, without fixtures
14395	Curtain poles or rods, wooden, noibn, finished, without fixtures
14400	Curtain poles or rods, wooden, noibn, in the rough or in the white
14405	Curtains, steel and artificial leather combined
14415	Cuspidors, iron or steel, not nickel plated, cast
14430	Cutch, catechu, japonica or terra japonica, liquid extract

EXHIBIT NO. 2—Continued

Item No.	Commodity
14435	Cutch, catechu, japonica or terra japonica, solid
14505	Buttermilk, noibn, in milk shipping cans
14645	Artificial snow, mica
14760	Degumming compounds, fabric or fibre
14825-A Sup. 35	Dental investment compound
14830	Dental plaster, suitable for making dental casts or molds
14875	Tongue depressing blades or throat swab applicators, wooden
14900	Deodorants or disinfectants, other than medicinal, noibn
14935	Dip, animal or poultry, noibn, liquid
14940	Dip, animal or poultry, noibn, other than liquid
14960	Divi-divi pods
[fol. 1561]	
14972 Sup. 21	Doubletrees, eveners, neck yokes or singletrees, steel; or wooden, in the white, ironed or not ironed
15165	Belt dressing
15190	Bay rum, in bulk in barrels
15225	Citrate of magnesia solution
15240-A Sup. 35	Condition powders, regulators or tonics, animal or poultry; including condimental or medicinal feeding compounds or preparations for animals or poultry, noibn
15300	Gall, animal
15305	Hog bile, crude, liquid
15350	Meal, fenugreek seed
15430	Sassafras roots, not ground nor powdered
15465	Sea grass, sea moss or seaweed, noibn
15470	Sugar of milk, crude
15490	Water, mineral, concentrated or fortified
15495	Witch hazel extract
15500	Wormseed (Jerusalem oak seed), ground or powdered
15550	Dust laying compound, coal, dry
15555	Dust laying compound, coal, liquid, other than petroleum
15570	Dyewoods, fustic or logwood, or dyewoods, noibn, chips or ground
15575	Dyewoods, fustic or logwood, or dyewoods, noibn, log or stick
15595	Electric cable, conduit or wire saturating or finishing compound, asphalt base or pitch base
15600	Electric cable, conduit or wire saturating or finishing compound, paraffine wax base
15620	Backboards, telephone, noibn, steel or wood
15630	Bases, generator or motor, iron
15710	Battery plates, copper or zinc
15720	Battery plates, steel
15735	Battery zincs

[fol. 1562]

EXHIBIT No. 2—Continued

Item No.	Commodity
15752	Bus bar system, consisting of housings containing bus bars, insulators, with or without tapping connectors
15760	Bus bars, copper
15790	Cable, racks, steel, noibn, KD
15845	Conduit fittings, noibn, iron and porcelain combined, with or without attachments, or iron, with attachments
15865	Distribution boxes, marine cable strand, iron, without interior fittings
15906	Electrolytic chlorination cells, KD
15915	Eye bolts, insulated, or insulator pins, porcelain, steel and wood combined
16050	Overhead trolley wire installation fixtures, noibn, iron or iron and brass, bronze, insulating composition or wood combined
16152	Switch boxes or outlet plates, conduit outlet boxes, or junction boxes or cabinets, with or without fittings or covers but without switches, porcelain, or porcelain and steel combined
16155	Switch boxes or outlet plates, conduit outlet boxes, or junction boxes or cabinets, with or without fittings or covers but without switches, steel
16220	Transformer cooling coils, iron or steel
16240	Electrode joint compounds
16245	Embalming fluid
16280	Christmas trees, noibn
16285	Evergreens, decorative, cut, noibn, in machine pressed bales
16305-A Sup. 21	Excelsior, cellulose film, in machine pressed bales
16405	Powder, smokeless, deteriorated or obsolete, immersed in water
16455	Extract, chestnut or quebracho, dry
16465	Extract, fustic or logwood, dry
16470	Extract, fustic or logwood, liquid or paste
16475	Extract, hypernic, osage orange, quercitron or redwood, dry
16480	Extract, hypernic, osage orange, quercitron or redwood, liquid or paste

[fol. 1563]

Item No.	Commodity
16490	Tanning extract, noibn, dry
16495	Tanning extract, noibn, liquid or paste
16505	Eyelets or eyelet hooks, noibn
16545	Battery brooders or feeding or laying batteries, steel, or steel and wire combined, KD or folded flat
16565	Bins or cribs, grain storage, steel, KD, or wire and steel combined, KD in sections
16580	Brooders, poultry, canopy, or brooder stove canopies or hovers, KD flat or folded flat

EXHIBIT No. 2—Continued

Item No.	Commodity
16590	Brooders, poultry, noibn, KD flat or folded flat
16610	Caps or covers, stack, grain or hay, iron or steel, flat or nested
16625	Churns, hand, earthenware or stoneware, without frames
16665	Chutes, cattle dehorning, KD
16675	Coops or crates, animal or poultry, other than shipping, steel or steel and wire combined, KD or folded flat
16685	Coops or crates, animal or poultry, other than shipping, wooden, KD flat or folded flat
16715	Eggs, nest
16735	Feeders, salt brick (salt brick holders)
16745	Fruit picking platforms, elevating, KD
16750	Heaters or smudge pots, garden or orchard, cast iron
16755	Heaters or smudge pots, garden or orchard, sheet steel, KD
16760	Heaters, tank, iron, noibn
16775	Hens' nests, KD
16780-A Sup. 21	Hog oilers or greasers, iron, or iron and wood combined
16792	Mangers (feed boxes), feeding, fibreboard, wallboard or wood and fibreboard wallboard combined, KD
16820	Mangers (feed boxes) or troughs, feeding or watering, without automatic water check attachments, cast iron, with legs attached or without legs
[fol. 1564]	
16825-A Sup. 35	Mangers (feed boxes) or troughs, feeding or watering, without automatic water check attachments, plate or sheet, noibn, 13 gauge or thinner, SU, nested, or 13 gauge or thinner, KD, other than flat
16840	Mangers (feed boxes) or troughs, feeding or watering, cement, earthenware, stoneware or stone
16845	Mangers (feed boxes) or troughs, feeding or watering, wooden or wood with sheet iron covers, KD
16870	Pens, live stock, wooden, KD
16872 Sup. 21	Pokes, animal, iron or steel
16875	Racks, feed, steel, SU
16890	Roosts, chicken, completely KD
16895	Seed corn driers, steel, KD or flat
16905	Silo doors or silo door frames, steel or wood
16910	Silo roofs, steel, KD
16915	Silos, steel, KD
16940	Stall guards, iron or steel
16950	Stall pans, cast iron
16955	Stalls, KD, livestock
16965	Stanchion frames, KD, livestock
16970	Stanchions, livestock,
16975	Stands, poultry, feeder or waterer, steel, wood or steel and wood combined, KD flat or folded flat

Exhibit No. 2—Continued

Item No.	Commodity
16985	Traps, hens' nest, steel, KD flat
16990	Traps, hog, KD flat
16992	Troughs, chicken feeding, fibreboard, KD flat
16995	Troughs, chicken feeding, wooden
17005	Water bowls or cups, livestock, iron, with or without automatic water check attachments
17025-A Sup. 35	Bag fasteners, steel and paper combined

[fol. 1565]

Item No.	Commodity
17072 Sup. 21	Animal livers, dyed and frozen
17125	Capsicum (red pepper) residue, having value only for animal or poultry feed mixture
17130	Charcoal, ground or crushed
17185	Fish food, ground cooked fish
17190	Fish food, noibn
17195	Fish meal, fish roe meal or fish scrap, ground, pulverized or screened
17205	Fodder, bean, cane, corn or pea, in machine pressed bales
17215	Ginger root residue, having value only for animal or poultry feed mixtures
17220	Hay, in machine pressed bales

25060	Columns, spiral, noibn, or column hoops, concrete or plaster reinforcement
25075	Concrete piling reinforcement
25125	Fencing, wire and iron or steel combined, SU, in panels
25210	Lathing or ribbing, concrete or plaster reinforcement, wire
25340	Plate or sheet, iron or steel, nickel-clad
25345	Plate or sheet, iron or steel, noibn, crystalized, decorated, embossed, enameled, japanned, lacquered, lithographed, marbleized, nickel poated or printed
26492	Sheets, iron or steel, reinforced with expanded steel
25685	Iron or steel cleaning compound, noibn, liquid
25690	Iron or steel rust preventing or removing compounds, other than petroleum, noibn, in bulk in barrels
25705	Ivory, animal, scrap or shavings
25715	Ivory, nut or vegetable, other than meal, scrap or shavings
25745	Knobs or pulls, door or drawer, noibn
25765	Ladders, noibn, steel
25830	Lamp shades or reflectors, iron, steel or tin, with or without equipment of sockets
25995	Street lamp reflectors and insulators combined, earthenware
26030	Anodes, lead
26055	Base bullion, lead, pig or slab
26060	Blanks or discs (unfinished shapes), lead, tin coated
26075	Dress weights, lead
26115	Tags, lead
26160	Blue chrome splits, partially tanned and having moisture content not less than 30%

[fol. 1582]

Item No.	Commodity
26190	Leather, grained
26200	Leather, pancake
26210	Leather scrap, value exceeding 3½ cents per lb.
26220	Leatherboard
26225	Leatherboard scrap, value exceeding 3½ cents per lb.
26245	Leather tie strings (rawhide leather strips of irregular width and length)
26255	Leather finishing, softening, sponging or stuffing compounds, noibn, in barrels
26290	Licorice (licorice extract) mass
26295	Licorice (licorice extract) powdered
26320	Lignite char, not activated
26350	Liquors, malt; ale, beer, beer tonic, porter, stout or non intoxicating cereal beverage

Exhibit No. 2—Continued

Item No.	Commodity
26690	Lockers, cold storage, steel, KD flat
26700	Locking rings, barrel or drum head, steel
26705	Loofas, in machine pressed bales
26710	Lubricant, grease-binder (lubricating grease, other than petroleum lubricating grease), combined with fibre, not oiled waste)
26712	Lubricators, railway track, iron or steel
26740	Bark, tan, ground, other than spent
26920	Lumber, cigar box, cedar or foreign woods
26925	Lumber, cigar box, domestic woods, stained or veneered
26930	Lumber or veneer, noibn, foreign wood, other than Canadian wood or Mexican pine
26935	Lumber or veneer, noibn, native wood, Canadian wood or Mexican pine
26945	Match splints (match sticks)
27000	Roof trusses, wooden, KD
27075	Veneer, native wood, paper covered, 1/8 inch or less in thickness
27100	Wood, built-up or combined, noibn, foreign wood, other than Canadian wood or Mexican pine
[fol. 1583]	
27120	Wood sawdust, colored
27135	Wood shavings, noibn
27210	Ash conveyors, steam jet
27225	Baffles, absorber tower, steel, other than wire
27330	Balls or rolls, bearing, anti-friction, iron or steel
27370	Bearings, noibn, ball or roller
27405	Bed plates, iron, noibn
27460	Bobbin rings, wire
27485	Bobbins, iron, steel or wood, separate or combined
27545	Bulldozers, metal working
27575	Bushings, ball or roller
27580	Bushings, noibn, iron or steel
28045	Cider mills or presses, KD
28050	Clay gatherers, wheels and poles detached, body taken apart
28065	Brick making machine augers, knives or propellers
28115-A Sup. 21	Pug mill hubs or knives
28125	Revolving dump tables, KD
28140	Clay crusher, disintegrator or granulator parts, cast iron or steel, in the rough as from the mold
28175	Cogs, gear wheel (mill cogs), wooden
28195	Connecting rods, internal combustion engine, worn out
28200	Conveying, dredging, dumping or hoisting buckets, dippers or skips, iron or steel
28205	Conveyor flights, wooden
28230	Cotton compresses, KD, or parts, iron or steel
28240	Cotton cleaners, or cotton cleaner parts, noibn

Exhibit No. 2—Continued

Item No.	Commodity
28260	Cotton or seed flues, wooden, KD
28270	Cotton receivers or separators
28275	Cotton distributors, noibn, KD
[fol. 1584]	
28290	Cotton gin feeders
28295	Cotton gin, gin feeder or lint condenser parts, noibn
28300	Cotton gin presses, KD, or parts thereof, noibn
28302	Cotton gin press trampers (cotton packers), or parts thereof, noibn
28315	Cotton gins
28325	Cotton lint condensers, with or without bottoms
28395	Crushers, breakers or grinders, coal, ore or stone, or coal or stone crushers and elevators combined
28460	Die sets (die holders), stamping or punching machine, iron
28463	Dies, antimonial lead or zinc alloy
Sup. 21	
28485	Dipper handles, dredge or power shovel
28590	Elevator buckets, iron or steel
28600	Elevator legs, iron, steel or wood, KD
28620	Flights, chain and steel, conveyor, assembled
28635	Gravity chute conveyors, steel, KD
28640	Gravity roller conveyors, KD, or in flat sections
28650	Box ends (through ends), gates or spirals (flights mounted on pipe or shaft), steel, spiral screw conveyor
28765-A	Filter parts, cast stone or tripoli
Sup. 21	
28775	Heads or ends, stands or legs, or side bars or beams, iron or steel, filter press
28780	Plates or cake frames, iron or steel, filter press
28805	Filters, gas, cast iron
28845	Forms, layouts or assembly jigs, wooden or wood and metal combined
28895	Fuel wood saw frames or tables, KD, with or without saw blades
28960	Gas house purifier grids or trays, wooden
29000	Glue heaters (glue pots), other than self-heating
29030	Discs, road grader
[fol. 1585]	
29035	Graders or levelers, drag
29050	Road graders, wheeled, KD
29055	Road scraper bails
29065	Rollers, road, other than self-propelling
29085	Scarifiers, road
29105	Scrapers, noibn, horse drawn, wheeled
29110	Scrapers, noibn, horse drawn, other than wheeled
29115-A	Scrapers, noibn, tractor drawn
Sup. 40	

EXHIBIT No. 2—Continued

Item No.	Commodity
29120	Steering poles or guides, grader
29122	Tractor excavators or grader attachments, completely KD
29215	Heat exchanger sections or elbow, inlet or outlet fittings, therefor, cast iron
29230	Heaters, oil treating, cast iron, with gas burning equipment
29300	Accumulators, distillers, purifiers, receivers or regenerators, gas or liquid, ice making or refrigerating
29315	Cans, ice
29330	Condensers, equalizers or exchangers, gas or liquid, iron or steel, without fins; or coolers, brine or water, iron or steel, shell type
29335	Condensers, equalizers or exchangers, gas or liquid, iron or steel, without fins; or coolers, brine or water, iron or steel, pipe type
29350	Group frames, ice can, steel, SU
29355	Headers, gas or liquid
29415	Refrigerating sections, cooling room, cast iron
29460	Kettles, canning (boilers or retorts), iron
29480	Kettles, noibn, steam jacketed, iron or steel
29490	Kilns, brick drying or hardening, cylinder sections, SU, other parts SU or KD
29495	Kilns, china firing
29520	Ladles, foundry, open hearth or blast furnace, iron or steel, without trucks

[fol. 1586]

Item No.	Commodity
29680	Mandrels, forge or rolling, tube or pipe mill, steel
29685	Masts or towers, contractors' building material hoisting, KD, with or without necessary equipment of hoisting platforms, hoisting buckets or chutes and gin poles
29700	Mills, cane
29740	Mine or quarry drilling machine augers, bits, bit shanks or thread bars
29780	Cages, mine, KD
29810	Landing dogs
29825	Ore roasting or smelting furnaces
29840	Pots, forehearth or settling
29850	Scrappers, drag
29875	Smelting furnace water jackets, KD
29905	Nigger bars, saw mill
29915	Oil condensing sections, cast iron
29935	Cake formers or packers, oil mill, KD
29940	Cake presses or seed crushers, oil mill, KD
29960	Oil cake press boxes or plates, iron or steel
29975	Seed delinters
29980	Seed hullers, KD
29985	Paper makers' felt, old, used
30020	Paper mill beater rolls or grinding plugs, worn out

EXHIBIT No. 2—Continued

Item No.	Commodity
30030	Paper mill cylinder molds, wire covering damaged or worn out
30070	Pile driver frames, wooden, KD
30080	Pile drivers, noibn, KD
30105	Pile driving caps, iron or steel
30180	Press parts, printing, wooden, flat
30190	Presses, baling, noibn, KD
30205	Presses, hydraulic wheel, KD
[fol. 1587]	
30220	Presses, noibn, filter, KD
30235	Pressure relief valves
30240	Printers' roller cores (printers' roller stocks), steel
30250	Propellers (propeller wheels) or propeller blades, or propeller wheel hubs, noibn, steel
30285	Buckets, chain pump, iron or steel and rubber combined
30290	Buckets, elevator pump, iron or steel
30300	Swivel spouts, pump, water conductor
30325	Pump parts, noibn, for hand or windmill pumps, iron or steel
30345	Pump working barrels (well pump cylinders), iron or steel, lined with brass or enamel, with or without fittings
30350	Pump working barrels (well pump cylinders), iron or steel, lined with iron or steel or not lined, with or without fittings
30360	Pumping jacks, noibn, other than oil well pumping jacks, KD
30405	Pumps, suction, wooden
30425	Pumps, hand or windmill, noibn, iron or steel, cast, SU or KD
30435	Pumps, hand or windmill, noibn, iron or steel, sheet and cast combined
30555	Rollers, printers', elastic composition covered, old, worn out
30570	Rollers, composition, leather or rubber covered, noibn, old, worn out
30600	Rolls, cane mill
30610	Rolls, engraved or etched, brass, bronze or copper, old, worn out
30620	Rolls, engraved or etched, iron or steel, old, worn out
30625	Rolls, garnett, old, worn out
30630	Rolls, grain grinding, iron or steel
30655	Rolls, paper mill, not engraved nor etched, iron or steel, covered, old, worn out
30670	Rolls, paper mill, not engraved nor etched, iron or steel, not covered
30680	Rolls, paper mill, noibn
30715	Rolls, noibn, iron or steel

[fol. 1588]

Exhibit No. 2—Continued

Item No.	Commodity
30725	Rolls, noibn, wooden, with iron or steel cores, solid
30735	Rubbing bed plates, noibn, cast iron
30740	Sand or gravel power pump parts, steel, consisting of cutter heads, impellers, shells, side plates or liners
30780	Scale beam boxes, wooden
30785	Scale or steelyard weights, iron or steel
30825	Scales, factory or warehouse, other than automatic, KD
30830	Scales, live stock, railroad track or vehicle, KD
30835	Scale beams or steelyards, steel
30885	Screening machines, coal, gravel, ore, sand or stone, revolving, KD, screen sections taken apart
30900	Screen cylinders, perforated iron or steel
30905	Screen plates or segments, perforated iron or steel, or steel wire cloth, flat, flanged or curved
31010	Pinions or racks, steam shovel, iron or steel
31050	Slag pots, mounted on wheels
31060	Snow plow attachments for automobiles or tractors
31115	Steam traps, other than tilting
31130	Stokers, mechanical
31140	Stone puller and carrier combined, KD
31165	Stump pullers
31240	Driers, hosiery or fabric, KD
31280	Textile beam or spool heads, other than cast iron or steel
31295	Card clothing, textile machine, old, worn out
31310	Cores, yarn winding, spiral, iron or steel
31395	Rollers, fluted, iron or steel, old, worn out
31415	Skewers, textile, wooden
31435	Treadle blocks, wooden
31440	Warp beams, without heads or with heads of 2-ply wood not less than 1¾ inches thick, or 3-ply hardwood glued together cross grained, or reinforced pressed steel, new

[fol. 1589]

Item No.	Commodity
31445	Warp beams, noibn, including beams with cast iron heads, new
31450	Tire benders, setters, shrinkers or upsetters
31455	Tire extensions, traction engine wheel
31485	Tractor axle shafts
31495	Tractor axles, without external or internal attachments or movable parts
31500	Tractor brake drums, without attachments finished
31515	Tractor exhaust pipes, steel, straight or bent, further processed than cut to length, with or without attachments
31550	Tractor hubs, iron or steel, with bearings
31565-B Sup. 37	Tractor or traction engine parts, tractor engines, or tractor treads or bogie or idler wheels, old, used, having value for reconditioning
31575-B Sup. 40	Tractor seats, iron or steel, with seat springs or brackets

Exhibit No. 2—Continued

Item No.	Commodity
31580	Tractor tread pins, steel
31590	Tractor treads, noibn
31620	Tree diggers, KD
31640	Trolleys, overhead track, iron, with or without gear wheels
31730	Ventilating apparatus, factory or greenhouse (fixtures for operating windows in series), iron or steel, KD
31835	Wheels, balance or fly, iron
31840	Wheels, stone grinding or polishing, iron or steel
31850	Windmills, KD, or windmill parts
31920	Machine, machinery, army tractor tank, traction engine or tractor parts, noibn, wooden, flat or KD flat
32015	Marbles, iron, hollow
32022	Masts, radio broadcasting, tubular, steel, in sections
32030	Mats, blasting or bowling pit, rope
32035	Mats or pads, stove or table, metal and asbestos or fibreboard combined
32150	Sausage, cooked, cured or preserved, noibn
[fol. 1590]	
32220	Metal annealing or tempering compounds, noibn
32225	Metal cutting, drawing or drilling lubricants or compounds, liquid or paste, noibn
32257	Bar or rod, zinc alloy
32280	Cable, scrap, lead covered copper, consisting of lead covered copper cable worn out or otherwise rendered unfit for use, having value only for remelting purposes
32365	Dross or sludge, cadmium
32405	Jewelers' sweepings
32435	Moldings, zinc alloy
32485	Silicon (silicon metal)
32490	Silicon copper
32510	Solder, braziers', noibn
32530	Terne metal (alloy of lead and tin), bars, pigs, slabs or scraps
32535	Tubes, noibn, lead alloy, flat
32565	Zirconium-manganese-silicon
32595	Meters, gas, noibn, cast iron
32640	Mica, ground or pulverized
32725	Moldings, electric wire, steel
32735	Moldings, mirror or picture frame, wooden, in the white
32750	Molding and mounting strips, rubber stamp, wooden, unfinished
32760	Molds, block or brick, hand
32765	Molds, bottle or glassware, cast iron
32770	Molds, bullion, iron
32775	Molds, burial vault
32782	Molds, carbon electrode, iron or steel, finished
Sup. 21	
32790	Molds, cigar

EXHIBIT NO. 2—Continued

Item No.	Commodity
32795	Molds, concrete post, iron or steel, without frames or trucks
32800	Molds, concrete post, iron or steel, with frames or trucks, KD
[fol. 1591]	
32815	Molds, metal molding, noibn, iron
32820	Molds, pipe, centrifugal, steel
32825	Molds, pipe, iron, consisting of chill plates, core bars and flasks
32830	Molds, plaster of Paris
32850	Molds, rubber, iron or steel
32855	Molds, terra cotta architectural work, plaster
32860	Tobacco molds, retainers or shapes, noibn
32865	Monuments, cast bronze or enameled steel shells, filled with concrete or tar aggregate, or insulation
32885	Moss, noibn, in machine pressed bales
32895	Mucilage
32900	Muffles, clay
32905	Mushroom spawn
33000	Organ or piano hardware, noibn, iron or steel
33025	Piano case backs, in the white
33050	Piano pedals
33055	Piano plates, iron or steel
33060	Piano sounding boards, in the white
33065	Piano tuning pins
33120	Myrobalans
33135	Neatsfoot stock
33200	Nickel matte
33220	Nickel scrap
33305	Nickel-copper scrap
33390	Blanks (unfinished shapes), noibn, nickel-silver
33415	Moldings, nickel-silver
33420	Plate, sheet or sheet strips, nickel-silver
33430	Rods, nickel-silver
[fol. 1592]	
33435	Scrap, nickel-silver
33445	Wire, nickel-silver
33446	Nitrocellulose (colloided), non-fibrous, granular or flake, wet with alcohol or solvent or not less than 20% of water
33447	Nitro-cellulose (collodion cotton, fibrous), wet, with not less than 20% of water or 30% of alcohol or solvent
33448	Nitro-starch, wet, with not less than 20% of water
33449	Nitro-starch, wet, with not less than 30% of solvent
33495	Cranberry vines
33525	Nutgalls
33535	Black walnuts, in shell
33555	Hickory nuts, in shell
33580	Peanuts, in shell, raw
33585	Peanuts, in shell, roasted
33600	Pecans, in shell

EXHIBIT No. 2—Continued

Item No.	Commodity
33602	Pinon (Indian nuts)
33605	Nuts, tung oil
33607	Nuts or kernels, oil bearing palm, noibn, including babassu, cohune, murumuru, ouricury, aouara, tucum or ocohuna
33630	Addressing machine plates, plain
33631	Boards, clip, wooden, without fixtures
33632	Boards, typewriter base
33660	Holders, cellulose tape, cast and sheet iron combined
33688	Typewriter copy holders, folded
33707	Oil filter shells or bases, iron
33735	Adjusters and boards, oil well
33750	Bits, drilling, rotary, other than disc, reamer or roller type, or other than rotary
33755	Blocks, casing, well
33800	Castings, swing post, well

[fol. 1593]

Item No.	Commodity
33810	Clamps, disconnecting, well
33815	Clamps, drilling, drive or gas packing, well
33825	Covers, thief hole, iron
33830	Derrick cranes, well, KD
33835	Derricks, steel or wooden, well, including necessary equipment of ladders
33845	Elevators, pipe or sucker rod, well
33865	Heads, casing control, well
33875	Heads, drive pipe, well
33880	Hooks, casing, sucker rod, throw-off or tubing, well
33890	Jacks, tool, oil well
33910	Links, well
33950	Plugs, cementing, wood and rubber, or wood, rubber and leather combined
33955	Plugs, dry hole, iron or lead, or iron or lead combined, or wooden
33995	Rig irons, noibn, iron, steel or wood, including necessary quantity of nails
34000	Rings and wedges, well
34005	Rods, polished or valve, oil, water or gas well
34010	Saddles, jack, oil, water or gas well
34020	Savers, oil
34025	Spiders, liners or slips, well
34030	Spudding shoes and rings, well
34035	Stirrups, disconnecting, well
34060	Tongs, pipe, oil, water or gas well
34065	Tools, drilling, noibn, oil, water or gas well
34080	Tug pulleys, iron, wooden or wood and iron combined
34090	Wagons, casing or bit, oil, water or gas well
34100	Well points or well strainers, iron or steel

[fol. 1594]

EXHIBIT No. 2—Continued

Item No.	Commodity
34105	Well points or well strainers, iron or steel and brass or bronze combined
34115	Well throw-offs
34120	Wheels, band, oil, water or gas well
34125	Wheels, bull, oil, water or gas well
34130	Wheels, calf, oil, water or gas well
34135	Wobblers, oil, water or gas well
34140	Wrenches, drive clamp
34145	Wrenches, sucker rod
34155	Wrenches, tool, oil, water or gas well
34165	Oil, andiroba
34170	Oil, aniline
34175	Oil, apricot or peach kernel
34180-A Sup. 21	Babassu; cocoanut; copra; cohune; coquito; dende nut; monilla (monea) seed; murumuru; ouricury (urucury); palm; palm kernel; sheanut; tucum nut; or urucuriiba oils
34205	Oil, chinawood (tung nut oil)
34210	Coal tar or gas drips, crude, noibn, including crude coal tar naphtha or crude light oil of coal tar
34215	Corn oil, liquid or sulphurized
34220	Corn oil, vulcanized
34225	Cottonseed oil, liquid
34230	Creosote oil (dead oil of coal tar or wood tar)
34237	Fatty acid esters of vegetable, fish or animal oils, noibn
34240	Fatty acids of vegetable, fish or sea animal oils, noibn, inedible
34245	Fish liver oil, edible or medicinal
34250	Fish or sea animal oil, noibn, liquid
34260	Harness oil, noibn
34265	Hemp seed oil
34270	Kapok oil
[fol. 1595]	
34275	Oil, lard or inedible grease
34285	Oil, lubricating, noibn
34290	Oil, mustard seed
34295	Oil, neatsfoot, noibn
34310	Oil, oiticica
34325	Peanut oil, liquid
34330	Oil, perilla
34335	Petroleum tar oil, noibn
34345	Oil, raisin seed
34350	Oil, rape seed
34355	Oil, red, from animal or vegetable fats
34360	Oil, rice or rice bran
34365	Oil, rosin
34370	Oil, rubber nut kernel
34375	Oil, safflower seed

Item No.	Commodity
34380	Oil, sesame
34385	Soluble cutting oil base
34395	Oil, sunflower seed
34415	Tall oil, esterified
34420	Tallow oil
34425	Tanners' oil, noibn
34430	Teaseed oil (teanut)
34435	Ucuuba (ucuhuba)
34440	Oil, walnut
34445	Oil, wheat
34450	Oleo stock
34477	Bomb fin assemblies
34497	Cartridge clips, or ammunition links, cannon or machine gun, steel
[fol. 1596]	
34555	Gun platforms, wood and steel combined, wheels off
34590	Mine water sweeping kites, iron or wood and iron combined, KD or folded flat
34595	Mortars, pyrotechnic bomb
34620	Projectile bands, brass, bronze or copper
34630	Projectile parts, noibn, iron or steel, empty, rough machined but not further finished
34655-A Sup. 21	Shell containers (paper tubes with metal tops and bottoms)
34775	Bridge builders', contractors' or graders' outfits, noibn, without live stock
34816	Outfits, cobblers'
35020-A Sup. 21	Packing cushions or packing pads, excelsior, grass, hay, straw, or shredded or macerated paper
35023 Sup. 21	Packing cushions, or packing pads, indented chipboard wrapped in paper sleeves, flat
35190	Blackboard coating (liquid slating)
35215	Enamel, other than watch dial
35230	Enamel whitening compound, noibn
35370	Rust preventive pipe line coating, asphaltum, coal tar or pitch base, other than asphaltum or coal tar paint or varnish
35425 Sup. 37	Pallets, platforms or skids, for lift trucks, without bodies, enclosures, standing ends, sides, stakes or standards

ALTERNATIVE APPLICATION OF COMBINATION RATES

(a) (Not applicable in connection with Joint Motor-Rail Routes.) The following rules apply only after the charge from point of origin to destination has been determined under the provisions of Sections 1,1A,2, 2A,3,4 and 4A of this tariff.

If the charge based on the aggregate of intermediate local, joint or proportional rates named in tariffs lawfully on file with the Interstate Commerce Commission over any route via which the through rates named in this tariff,as amended,apply,is lower than the charge accruing under the through rates published in tariff,from origin to destination,such lower charge will be the legal charge to apply via the route over which said lower aggregate of intermediate rates is applicable.

(b) (Applicable only in connection with Joint Motor-Rail Routes.) Charges resulting from the application of rates published in tariff,for application via Joint Motor-Rail routes are the applicable charges via such routes,notwithstanding that they may be higher than the aggregate charges under the separately established rates of the respective motor and rail carriers to and from the junction where the freight is received from or delivered to motor carrier.

Departure from the terms of Rules 4(h), 4(i) and 7(b), of Tariff Circular No. 20 is authorized under permission of the Interstate Commerce Commission No. 164[illegible] of October [illegible], 1937, as amended.

SECTION 4

MINIMUM CHARGES

The rates named in this section apply only where applicable rating is published in Section 2 of the EXCEPTIONS TO OFFICIAL CLASSIFICATION Agent W.S. Curlett's Tariff No. 141-A (See Item 620), subject to applicable rules and other provisions in Exceptions to Official Classification and to applicable rules and other provisions, except ratings, in Official Classification, EXCEPT that:

These Rates will ALSO apply:

On traffic routed from, to or via the American Barge Line Company in connection with Ratings, Rules and other provisions in Official Classification.

The minimum charges provided for in this section will only apply between points for which rates are provided in Sections 1 and 2.

If the charge accruing under Section 1 or Section 2, according to their application is higher than the charge accruing under this section, on the same shipment, the charge accruing under Section 1 or Section 2, according to their application will apply.

Where actual weight of shipment is in excess of minimum weight shown in connection with minimum charges, actual weight should be used in computing the charges obtained under the minimum rate provided in this section.

The rate base numbers shown on pages 406 to 438 of Tariff, as amended, will not apply:

1. On traffic moving via American Barge Line Co. as provided for on pages 439 to 445 of Tariff.
2. On Fish and Oysters as provided for on pages 446 to 453 of Tariff.
3. On Asphalt as provided for on page 486 of Tariff.
4. On Gypsum Lath as provided for on page 486 of Tariff.

∅NON-APPLICATION OF MINIMUM CHARGES

Minimum charges provided in this section will not apply on shipments of Cotton Linters or Regins and Cottonseed Hull Fibre or Shavings from Southern Stations to Northern Stations as described in Item No. 46610 of W.S. Curlett, Agent, Tariff No. 141-A (See Item 620).

Minimum charges provided in this section will not apply on shipments of Naval Stores, as described in Item No. 33132♦ of W.S. Curlett, Agent, Tariff No. 141-A (See Item 620).

Minimum charges provided in this section will not apply on shipments of Cottonseed, Pitch and/or Tar, as described in Item No. 46625 of W.S. Curlett, Agent, Tariff No. 141-A (See Item 620), from Southern Stations to Northern Stations.

♦ Increase.

∅ The non-application of Minimum Charges on shipments moving at less carload or any quantity rates is hereby cancelled. (♦Provisions of Tariff, as amended, will apply.)

ALL RATES RESULTING FROM THE USE OF THE RATE BASE NUMBERS IN THIS SECTION ARE INCREASES

Add to Page 486 of Tariff:

SECTION 4A

MINIMUM CHARGES

The rates named in this Section apply only where applicable rating is published in OFFICIAL CLASSIFICATION, subject to applicable rules and other provisions in Official Classification and to applicable rules and other provisions, except ratings, in Section 2 of the Exceptions to Official Classification, Agent W.J. Curlett's Tariff No. 141-A (See Item 620), EXCEPT that:

These rates will NOT apply:

On traffic routed from, to or via the American Barge Line Company in connection with Ratings Rules and other provisions in Official Classification. Section 4 Rate Basis Numbers will apply.

The minimum charges provided for in this section will only apply between points for which rates are provided in Sections 1A and 2A.

If the charge accruing under Section 1A or Section 2A, according to their application is higher than the charge accruing under this section, on the same shipment, the charge accruing under Section 1A or Section 2A, according to their application will apply.

Where actual weight of shipment is in excess of minimum weight shown in connection with minimum charges, actual weight should be used in computing the charges obtained under the minimum rate provided this section.

Rates resulting from the use of Rate Base Numbers in this Section are issued in compliance with Order of the Interstate Commerce Commission in Docket No. 28300 of May 15, 1945, as amended.

FREIGHT NOT ACCEPTED FOR SHIPMENT VIA FEDERAL BARGE LINES

The following commodities will not be accepted for handling under this publication, except as specifially provided in tariff, as amended:

Articles having an offensive odor which are liable by their nature to injure or impregnate other freight.
Automobiles, except for dock delivery (Note B).
Boats, as described in Items 4575 through 4785 of Consolidated Freight Classification No. 16, I.C.C. Nos. 92 and 29 of Agents E.H. Dulaney and R.C. Fyfe, respectively, and I.C.C.-O.C. No. 8 of Agent A.H. Greenly, when in excess of 4,000 pounds each.
Bulk or loose freight (Note A and Exceptions 1 and 2).
Liquid Freight in bulk (except in packages as provided in tariff, as amended).
Live Stock.
Perishable Freight.
Scrap rubber or old rubber tires (Exception 3).
Stoves and Ranges (Exception 4).

NOTE A - Bulk or loose freight includes such commodities as are loose or in mass and must be shoveled, scooped or forked in the handling, and that which is neither in packages nor in units of sufficient size to admit of being readily handled piece by piece.

NOTE B - Rates will not include absorption of switching or carloading expense.

EXCEPTION 1 - Shipments of sheet iron or sheet steel will be accepted loose when so specifically stated in tariff, as amended, only when individual pieces weight 75 pounds or more. Individual pieces weighing less than 75 pounds will be accepted only when in boxes or crates or clamped together in bundles weighing not less than 75 pounds per package.

EXCEPTION 2 - Shipments of iron or steel articles (except sheet iron or sheet steel) will be accepted loose when so specifically stated in tariff, as amended, only when weighing 25 pounds or over each piece or when wired together in bundles weighing 25 pounds or over each bundle.

EXCEPTION 3 - Shipments of scrap rubber or old rubber tires will be accepted only when tendered in machine-pressed or compact bales or bundles.

EXCEPTION 4 - Shipments of stoves and ranges will be accepted only when in boxes or crates.

SECTION 2

If the charge accruing under Sections 4 or 4A of Tariff, as amended, according to their application is higher than the charge accruing under this Section, on the same shipment, the charge accruing under Sections 4 or 4A of Tariff, as amended, will apply.

The Rate Base Numbers named in this Section apply only where applicable rating is published in EXCEPTIONS TO SOUTHERN CLASSIFICATION, to the extent provided for in Item 5 of Tariff, subject to applicable rules and other provisions in Exceptions to Southern Classification and to applicable rules and other provisions, except ratings, in Southern Classification, EXCEPT that:

These Rate Base Numbers will ALSO apply:

1. In connection with provisions of Interstate Commerce Commission Fourth Section Order No. 9800 and Fourth Section Order No. 12272, as amended, in arriving at class rates referred to therein, under ratings in Southern Classification.

2. In connection with commodity rate columns to the extent provided for on pages 198 to 201 of Tariff as amended.

Rates resulting from the use of Rate Base Numbers in this Section are issued in compliance with order of the Interstate Commerce Commission in Dockets Nos. 26488, 21373, 21373 (Sub.-No. 1), 21665 and 21665 (Sub.-No. 1), and are permitted by authority of the Interstate Commerce Commission Fourth Section Order Nos. 12370 and 12516, except to or from points in the State of Kentucky rates are permitted by authority of Interstate Commerce Commission Supplemental Fourth Section Order No. 11200. (File N-1697)

ALL CHANGES RESULTING FROM THE USE OF RATE BASE NUMBERS IN THIS SECTION ARE REDUCTIONS

SECTION 4

MINIMUM CHARGES

The rates named in this section apply only where applicable rating is published in Section 2 of the EXCEPTIONS TO OFFICIAL CLASSIFICATION Agent W.S. Curlett's Tariff No. 141-A (See Item 620), subject to applicable rules and other provisions in Exceptions to Official Classification and to applicable rules and other provisions, except ratings, in Official Classification.

The minimum charges provided for in this section will only apply between points for which rates are provided in Sections 1, 1A, 2 or 2A.

If the charge accruing under Sections 1, 1A, 2 or 2A, according to their application is higher than the charge accruing under this section, on the same shipment, the charge accruing under Sections 1, 1A, 2, or 2A, according to their application will apply.

Where actual weight of shipment is in excess of minimum weight shown in connection with minimum charges, actual weight should be used in computing the charges obtained under the minimum rate provided in this section.

The rate base numbers shown on pages 406 to 438 of Tariff, as amended, will not apply:

1. On traffic moving via American Barge Line Co. for which rate basis numbers are provided for on pages 439 to 445 of Tariff.
2. On Fish and Oysters as provided for on pages 446 to 453 of Tariff.
3. On Asphalt as provided for on page 486 of Tariff.
4. On Gypsum Lath as provided for on page 486 of Tariff.

øNON-APPLICATION OF MINIMUM CHARGES

Minimum charges provided in this section will not apply on shipments of Cotton Linters or Regins and Cottonseed Hull Fibre or Shavings from Southern Stations to Northern Stations as described in Item No. 46610 of W.S. Curlett, Agent, Tariff No. 141-A (See Item 620).

Minimum charges provided in this section will not apply on shipments of Naval Stores, as described in Item No. 33132 of W.S. Curlett, Agent, Tariff No. 141-A (See Item 620).

Minimum charges provided in this section will not apply on shipments of Cottonseed, Pitch and/or Tar, as described in Item No. 46625 of W.S. Curlett, Agent, Tariff No. 141-A (See Item 620), from Southern Stations to Northern Stations.

ALL RATES RESULTING FROM THE USE OF THE RATE BASE NUMBERS IN THIS SECTION ARE INCREASES

SECTION 4A

MINIMUM CHARGES

The rates named in this Section apply only where applicable rating is published in OFFICIAL CLASSIFICATION, subject to applicable rules and other provisions in Official Classification and to applicable rules and other provisions, except ratings, in Section 2 of the Exceptions to Official Classification, Agent W.S. Curlett's Tariff No. 141-A (See Item 620).

The minimum charges provided for in this section will only apply between points for which rates are provided in Sections 1, 1A, 2 or 2A.

If the charge accruing under Sections 1, 1A, 2 or 2A, according to their application is higher than the charge accruing under this section, on the same shipment, the charge accruing under Sections 1, 1A, 2 or 2A, according to their application will apply.

Where actual weight of shipment is in excess of minimum weight shown in connection with minimum charges, actual weight should be used in computing the charges obtained under the minimum rate provided in this section.

The rate base numbers shown on pages 486 of Tariff and Pages 144 to 177 of Supplement No. 30 will not apply on traffic moving via American Barge Line Co. for which rate basis numbers are provided for on Pages 18 to 24 of this Supplement.

Rates resulting from the use of Rate Base Numbers in this Section are issued in compliance with Order of the Interstate Commerce Commission in Docket No. 28300 of May 15, 1945, as amended.

♦ Increase.

ø The non-application of Minimum Charges on shipments moving at less carload or any quantity rates is hereby cancelled. (♦Provisions of Tariff, as amended, will apply).

Rates in Sections Nos. 1 and 2 will also apply:

1. Where the applicable rating is published in the governing classification and the applicable carload minimum weight is published in Exceptions to the Governing Classification.

2. Rates in Sections 1 and 2 will also apply, subject to governing Classification and governing Exceptions to Classification, where reference is made to this tariff in tariffs naming commodity rates for alternation of such commodity rates with class rates named in this tariff.

Rates in Sections 1 and 2 will also apply, subject to governing Classification, when tariffs naming Exceptions to Classification provide for alternation of ratings therein with ratings in governing Classification.

3 (Applicable to all western stations, except stations on the SooRy.) Rates in Section 2 will also apply subject to Governing Classification and governing Exceptions to Classification.

Note E.—Where reference is made to this note rates in Sections Nos. 1½ and 2½ will apply only where applicable rating is published in the governing classification, subject to applicable rules and other provisions in the governing classification and to applicable rules and other provisions, **except ratings**, in Exceptions to Governing Classification, except that:

Rates in Sections Nos. 1½ and 2½ will NOT apply:

1. Where the applicable rating is published in the governing classification and the applicable carload minimum weight is published in Exceptions to the Governing Classification. Rates in Sections Nos. 1 and 2 will apply.

2. Rates named in Sections 1½ and 2½ do not alternate with commodity rates published in other tariffs nor with class rates determined by ratings published in other tariffs as Exceptions to Classifications. Any provisions for alternation of such rates or ratings with class rates in this tariff will not apply in connection with rates in Sections 1½ or 2½ (see Sections 1 or 2 for class rates to apply for alternative purposes).

Application for Special Permission

T. L. T. B. No. 977

To the Interstate Commerce Commission,
Washington 25, D. C.:

W. S. Curlett, for and on behalf of all Agents and carriers in Official and Illinois Territories, respondents in Class Rate Investigation, 1939, Docket No. 28,300, and Consolidated Freight Classification, Docket No. 28,310, for and on behalf of such respondents and other carriers participating in the rates published pursuant to and in relation to the Interstate Commerce Commission's decision and order in the above entitled proceedings, hereby make application to the Commission for authority to postpone indefinitely the effective date of the tariffs establishing such rates now published to become effective January 1, 1946.

These tariffs were filed under compulsion of the Commission's orders in the Class Rate Investigation, 1939, Docket No. 28,300. They supersede tariffs publishing rates prescribed by the Commission and still required to be maintained by outstanding orders in the Eastern Class Rate Investigation and other class rate cases specifically referred to at great length in the Commission's report in Class Rate Investigation, 1939.

There is attached hereto a copy of an Interlocutory Injunction issued by the District Court of the United States for the Northern District of New York on December 20, 1945, filed in the office of the Clerk on December 21, 1945, copy of which has just been made available to petitioners. This Interlocutory Injunction enjoins and suspends until the further order of the Court the orders of the Commission of May 15, 1945, and October 30, 1945, in Docket No. 28,300, and the Commission and the United States are enjoined from taking any action to enforce compliance with said orders.

The Court found that the present class rates in all territories were prescribed by orders of the Commission in various proceedings as maximum reasonable rates and these orders would be operative to maintain the present rates if the orders attacked in the suit should be suspended. It further found that greater disturbance and confusion will result if the changed rates ordered by the Commission should be permitted to go into effect and the Commission's orders should thereafter be held to be invalid and en- [fol. 1967] joined.

As a conclusion of law the Court found that the fact that the railroads under compulsion of the Commission's orders have already filed tariff schedules providing rates in conformity therewith to take effect January 1, 1946, did not render the suit moot or deprive the Court of power to grant effective relief by interlocutory injunction.

A further conclusion of law is that "There is greater justification for continuing in effect temporarily the present class rates which the Commission has prescribed and under which business has been done for a number of years than for permitting a sudden change in rates required by new orders, the validity of which is open to question."

And, finally, as a conclusion of law the Court found that "Considering the doubt as to the validity of the Commission's reports and orders, and balancing the conveniences and equities of the situation, the Court in its discretion should issue an interlocutory injunction enjoining and suspending the enforcement of the Commission's orders pending final determination herein."

It is obvious, therefore, that in order to meet the findings of fact and conclusions of law incorporated by the Court in its decree of December 20, 1945, it is necessary that the tariffs already filed by the petitioning carriers pursuant to the terms of the Commission's orders in the Class Rate Investigation, 1939, should be postponed pending the final determination of the Court.

Practically all of the State Commissions in the states embraced within Official Territory, pursuant to their statutory powers, have suspended the intrastate rates which were filed by petitioners to conform with the interstate rates prescribed by the Interstate Commerce Commission.

This application is filed in keeping with and upon the understanding this order of the Court contemplates that the rates ordered in by the Commission, including rates related thereto and collateral revisions should not at this time be made effective.

Wherefore, petitioners respectfully request that pursuant to Section 6 (3) of the Interstate Commerce Act the Commission grant them authority to file on one day's notice supplements indefinitely postponing the effective date of all the tariffs which have been filed in compliance with the Commission's order in the Class Rate Investigation, 1939.

W. S. Curlett, Agent. 143 Liberty Street
C. W. Boin, Alternate Agent. New York 6, N. Y.
December 26, 1945

W. S. Curlett, for and on behalf of all Agents and carriers under the jurisdiction of your Commission, respondents in Interstate Commerce Commission Class Rate Investigation, 1939, Docket No. 28,300, and Consolidated Freight Classification, Docket No. 28,310, for and on behalf of such respondents and other carriers participating in the rates published pursuant to and in relation to the Interstate Commerce Commission's decision and order in the above entitled proceedings, hereby make application to your Commission for authority to postpone indefinitely the effective date of the tariffs establishing such rates on *intrastate traffic* now published to become effective January 1, 1946.

These tariffs were filed under compulsion of the Interstate Commerce Commission's orders in their Class Rate Investigation, 1939, Docket No. 28,300. They supersede tariffs publishing rates prescribed by the Interstate Commerce Commission and still required to be maintained by outstanding orders in the Eastern Class Rate Investigation and other class rate cases specifically referred to at great length in the Interstate Commerce Commission's report in Class Rate Investigation, 1939.

There is attached hereto a copy of an Interlocutory Injunction issued by the District Court of the United States for the Northern District of New York on December 20, 1945, filed in the office of the Clerk on December 21, 1945, copy of which has just been made available to petitioners. This Interlocutory Injunction enjoins and suspends until the further order of the Court the orders of the Interstate Commerce Commission of May 15, 1945, and October 30, 1945, in Docket No. 28,300, and the Interstate Commerce Commission and the United States are enjoined from taking any action to enforce compliance with said orders.

The Court found that the present class rates in all territories were prescribed by orders of the Interstate Commerce Commission in various proceedings as maximum reasonable rates and these orders would be operative to maintain the present rates if the orders attacked in the suit should be suspended. It further found that greater disturbance and confusion will result if the changed rates ordered by the Interstate Commerce Commission should be permitted to go into effect and the Interstate Commerce Commission's [fol. 1969] orders should thereafter be held to be invalid and enjoined.

As a conclusion of law the Court found that the fact that the railroads under compulsion of the Interstate Commerce Commission's orders have already filed tariff schedules providing rates in conformity therewith to take effect January 1, 1946, did not render the suit moot or deprive the Court of power to grant effective relief by interlocutory injunction.

A further conclusion of law is that "There is greater justification for continuing in effect temporarily the present class rates which the Interstate Commerce Commission has prescribed and under which business has been done for a number of years than for permitting a sudden change in rates required by new orders, the validity of which is open to question."

And, finally, as a conclusion of law the Court found that "Considering the doubt as to the validity of the Interstate Commerce Commission's reports and orders, and balancing the conveniences and equities of the situation, the Court in its discretion should issue an interlocutory injunction enjoining and suspending the enforcement of the Interstate Commerce Commission's orders pending final determination herein."

It is obvious, therefore, that in order to meet the findings of fact and conclusions of law incorporated by the Court in its decree of December 20, 1945, it is necessary that the tariffs already filed by the petitioning carriers pursuant to the terms of the Interstate Commerce Commission's orders in their Class Rate Investigation, 1939, should be postponed pending the final determination of the Court.

Wherefore, petitioners respectfully request that your Commission grant authority to file on one day's notice supplements indefinitely postponing the effective date of all the tariffs which have been filed with your Commission applicable on *intrastate traffic* in compliance with the Interstate Commerce Commission's orders in their Class Rate Investigation, 1939.

[fol. 1970] IN THE DISTRICT COURT OF THE UNITED STATES FOR THE NORTHERN DISTRICT OF NEW YORK

Civil No. 2311

THE STATES OF NEW YORK, DELAWARE, INDIANA, MARYLAND, MICHIGAN, NEW JERSEY, OHIO, WISCONSIN and THE COMMONWEALTH OF PENNSYLVANIA, Plaintiffs,

against

THE UNITED STATES OF AMERICA, Defendant

INTERLOCUTORY INJUNCTION

The States of New York, Delaware, Indiana, Maryland, Michigan, New Jersey, Ohio, Wisconsin and the Commonwealth of Pennsylvania, having filed their verified petition in this Court praying a permanent injunction forever annulling and enjoining enforcement of certain orders of the Interstate Commerce Commission in a proceeding before it entitled Class Rate Investigation, 1939, Docket No. 28300, and praying also an interlocutory injunction enjoining the enforcement of said order pending final determination of its petition; and service of said petition having been made as required by law upon the Attorney General of the United States and the Interstate Commerce Commission; and the Interstate Commerce Commission having intervened as a defendant herein; and the Governors of the New England States and various Western railroads having intervened in this proceeding as additional parties plaintiff; the States of Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Kansas, Oklahoma, [fol. 1971] Arkansas, Texas, Nebraska, North Dakota and South Dakota, and other parties having intervened as defendants; and the Honorable Harrie B. Chase, Circuit Judge, and the Honorable John C. Knox, District Judge, having been called to the aid of Honorable Stephen W. Brennan, Judge of this District, as required by Title 28, U. S. Code, Section 47; and an order to show cause having issued and been served upon the Attorney General of the United States and the Interstate Commerce Commission requiring them to show cause before this Court so constituted at a hearing to be held in Room 110, United States Court House in the City of New York, N. Y., on December 13, 1945, at 2:00 P. M., why the interlocutory injunction prayed for by plaintiffs should not issue; and at least five days' notice of said hearing having been given as required by law; and said hearing having been had, the Court sitting in New York City for the convenience of and with the consent and by stipulation of all parties; and plaintiffs and intervening plaintiffs having been heard by counsel and having filed various affidavits with the Court; and the United States having been heard by its Assistant Attorney General, and having filed affidavits with the Court, the Interstate Commerce Commission by its Chief Counsel, and other interveners by their respective counsel; and the Court having considered the verified petition and the affidavits presented to it and the arguments of counsel, the undersigned as such Court now make the following findings of fact and conclusions of law:

[fol. 1972] Findings of Fact

1. This is a suit brought under the provisions of Title 28, U. S. Code, Sections 41 and 43 to 48 inclusive, seeking an injunction annulling and enjoining orders of the Interstate Commerce Commission in a proceeding entitled *Class Rate Investigation, 1939,* Docket Nos. 28300 and 28310 on the Commission's docket.

2. Plaintiffs are sovereign states and bring this action both as shippers and receivers of freight, on which rates affected by the Commission's orders are charged, and also in their sovereign capacities on behalf of their citizens

and communities because of the effect of the Commission's orders upon the states, their citizens and communities.

3. The orders of the Interstate Commerce Commission sought to be enjoined would require, effective January 1, 1946, an increase of ten per cent in the class rates charged by the railroads for the transportation of class rate freight within Official Territory and a reduction of ten per cent in the class rates charged by the railroads for the transportation of such freight as moves under class rates within Southern, Southwestern and Western territories and between the several territories.

4. The class rates are charged by the railroads in Official Classification Territory for the transportation by them of a large variety of manufactured articles, products of industry and agricultural products. The report of the Interstate Commerce Commission dated May 15, 1945 indicated [fol. 1973] that 5.8 per cent of all carload freight transported in Official Territory moves at class rates. A ten per cent increase in these class rates would impose upon industry, shippers and receivers of freight transported within Official Territory an increased freight-cost of many million dollars a year.

5. The ten per cent increase if required and permitted to be charged by the railroads for transportation within Official Classification Territory pending final determination of this suit would subject industries, shippers and receivers of freight, and the citizens and communities of the states in Official Territory to great injury, for which they will have no redress in the event the Commission's orders should finally be held invalid and permanently enjoined, in that the increased charges on shipments at class rates will increase the cost to industries of shipping and receiving their products, will increase the cost of products to consumers, will discourage production and conversion to peacetime operation, and will tend to cause unemployment and consequent local distress.

6. The present class rates in Official Territory which would be continued in effect if an interlocutory injunction should issue suspending the effect of the Commission's orders were prescribed by the Interstate Commerce Commission in 1930, and there has been no complaint in the proceedings before the Commission against these rates and no

demand by any shipper, receiver, community or state that these rates be increased.

7. The injury which would be suffered by the industries, shippers, receivers, communities and citizens in Official [fol. 1974] Territory would greatly exceed any injury to shippers and communities or states in other sections of the country from withholding the reductions in rates ordered by the Commission, pending final determination herein, for the reason that a much greater volume of freight is transported by the railroads within Official territory upon which the class rates are charged, which would be increased ten per cent, than the volume of freight upon which the Commission's orders would require a reduction in the freight rates. The Commission found that the class rates are charged on 5.8 per cent of the carload freight transported within Official Territory, on only 1.8 per cent of the carload freight transported in Southern Territory, .6 per cent of the freight transported in Western Trunk Line Territory, .9 per cent of the freight transported from Southern to Official Territory, and 3.1 per cent of the freight transported from Western Trunk Line to Official Territory. In addition to this, the higher percentage in Official Territory is to be applied to a much greater volume of freight. The Commission found that in a period of two days the carload freight transported within Official Territory aggregated 111,914 carloads, while the carload movement within Southern Territory was only 23,512 carloads, and within Western Trunk Line Territory was only 32,889 carloads. The movement from Southern to Official Territory amounted to only 15,989 carloads and from Western Trunk Line to Official Territory to 12,120 carloads. Computations contained in affidavits presented to the Court indicate that the ten per cent increase in the class rates for transportation within Official Territory of both carload and less-carload freight [fol. 1975] would cause an increase in freight charges to shippers and receivers of freight in that territory of over $15,000,000 annually, as compared with reductions in the charges for shippers in Southern territory of not more than one-tenth of this figure.

8. Greater disturbance and confusion would result if the changed rates ordered by the Commission should be permitted to go into effect and the Commission's orders should thereafter be held to be invalid and enjoined.

9. The reduced rates ordered by the Commission with respect to freight transported by the Western railroads would cause a very substantial reduction in their revenues, which they would have no means of recouping, if the Commission's orders should finally be held to be invalid and permanently enjoined.

10. The present class rates in all territories were prescribed by orders of the Commission in various proceedings as maximum reasonable rates and these orders would be operative to maintain the present rates in effect if the orders attacked in this suit should be suspended.

11. Although tariff schedules have already been filed with the Commission by the railroads providing rates to become effective January 1, 1946, in conformity with the Commission's orders sought to be enjoined, the Official Classification railroads and the Western railroads by their counsel have advised the Court that such tariff schedules [fol. 1976] have been filed only under compulsion of the Commission's orders and that if such compulsion is removed by the suspension and enjoining of said orders, they will take appropriate steps to continue in effect their present class rates.

Conclusions of Law

1. Plaintiffs have capacity to maintain this suit both as shippers and receivers of freight, the rates on which would be affected by the Commission's orders sought to be enjoined. The question as to whether plaintiffs in their sovereign capacities are otherwise proper parties hereto is not now decided.

2. The fact that the railroads under compulsion of the orders have already filed tariff schedules providing rates in conformity therewith, to take effect on January 1, 1946, does not render this suit moot or deprive this Court of power to grant effective relief by interlocutory injunction.

3. There are reasonable grounds for believing that the reports and orders of the Commission may be erroneous, contrary to and without adequate support in the evidence, and should be permanently annulled and their enforcement enjoined. This cannot, however, be determined until final hearing herein and upon examination of the evidence before the Commission which will then be before the court.

4. There is greater justification for continuing in effect temporarily the present class rates which the Commission [fol. 1977] has prescribed and under which business has been done for a number of years than for permitting a sudden change in rates required by new orders, the validity of which is open to question.

5. Considering the doubt as to the validity of the Commission's reports and orders, and balancing the conveniences and equities of the situation, the Court in its discretion should issue an interlocutory injunction enjoining and suspending the enforcement of the Commission's orders pending final determination herein.

Wherefore, good cause appearing therefor, it is Ordered, Adjudged and Decreed that an interloutory injunction be and it is hereby granted enjoining and suspending until further order of this Court the order of the Interstate Commerce Commission dated May 15, 1945 as amended, and its order dated October 30, 1945, in its Docket Nos. 28300 and 28310; and until further order of this Court, said orders of the Interstate Commerce Commission are hereby enjoined and suspended and shall have no force or effect.

And It Is Further Ordered that the United States and the Interstate Commerce Commission and their several officials, agents, servants and attorneys be and they are hereby enjoined from taking any action to enforce compliance with said orders of the Interstate Commerce Commission or [fol. 1978] prosecuting any alleged violation thereof pending further order of this Court.

Let plaintiffs file a stipulation for costs in the sum of $5,000.

Harrie B. Chase, U. S. D. J.; John C. Knox, U. S. D. J.; Stephen W. Brennan, U. S. D. J.

At a General Session of the Interstate Commerce Commission held at its office in Washington, D. C., this 27th day of December, 1945.

In the Matter of APPLICATION FOR SPECIAL PERMISSION T. L. T. B. No. 977 of W. S. Curlett, Agent, No. 396 of L. E. Kipp, Agent and No. 3282 of R. H. Hoke and W. P. Emerson, Agents

Postponement of effective date of rates and provisions published in purported compliance with Dockets Nos. 28300 and 28310.

Waiver of Statutory Notice and Tariff Publishing Rules.

It is ordered, That under the applications for special permission dated December 24, 1945 and December 26, 1945 (T. L. T. B. No. 977), (No. 396), and (No. 3282), filed by W. S. Curlett, L. E. Kipp, R. H. Hoke and W. P. Emerson, respectively, Agents, for and on behalf of carriers and their tariff-publishing agents who have filed rates and provisions in purported compliance with the Commission's orders in Dockets Nos. 28300 and 28310 and rates and provisions related thereto, the said carriers and publishing agents are hereby authorized to publish and file with the Commission consecutively numbered supplements or revised pages to tariffs, such supplements or pages to postpone or suspend until the further order of the Commission the effective date of rates and provisions published in purported compliance with the Commission's orders in Dockets Nos. 28300 and 28310, and rates and provisions related thereto, upon not less than one day's notice to the Commission and the general public by posting and filing in the manner required by law.

It is further ordered, That the said carriers and their tariff-publishing agents are hereby authorized to provide for the postponement or suspension of rates and provisions by short form method of publication and to depart from the Commission's tariff-publishing rules to the extent necessary.

It is further ordered, That supplements issued hereunder shall be exempt from the terms of Rule 9(e) of Tariff Circular No. 20 or similar rules of other tariff circulars during their effectiveness.

It is further ordered, That supplements or revised pages issued hereunder shall bear the notation:

Issued on one day's notice under permission of the Interstate Commerce Commission, No. 27460 of December 27, 1945.

[fol. 1980] and supplements issued hereunder departing from the tariff-publishing rules shall bear the further notation:

The form of this publication is authorized by permission of the Interstate Commerce Commission No. 27460 of December 27, 1945.

And it is further ordered, That except as otherwise provided, this permission does not modify any outstanding formal orders of the Commission, nor waive any of the requirements of its published rules relative to the construction and filing of tariff publications, nor modify any of the provisions of the Interstate Commerce Act, except as to the notice to be given. This permission is granted responsive to the order of the District Court of the United States for the Northern District of New York in Cause Civil No. 2311, the States of New York, Delaware, et al., vs. the United States of America, filed in the office of the clerk of that court on December 21, 1945.

By the Commission.

W. P. Bartel, Secretary. (Seal.)

To: Mr. W. S. Curlett, Agent, 143 Liberty Street, New York 6, N. Y.

Mr. R. H. Hoke, Agent, 101 Marietta Street, Atlanta 3, Georgia.

Mr. L. E. Kipp, Agent, 516 West Jackson Boulevard, Chicago 6, Illinois.

Mr. W. P. Emerson, Jr., Agent, 305 Baronne Street, New Orleans, Louisiana.

Ratio of out-of-pocket plus solely related expenses to revenues on less-carload class rate traffic—Western District, Interstate Commerce Commission, Docket 28300

Section A. Ratio of out-of-pocket expenses[1] to revenues for all L.C.L. Western Territory traffic (262 ICC 447, 585)

1. Out-of-pocket costs, all L.C.L. traffic, 1939[2]	$115,038,109
2. Revenues, all L.C.L., 1939	88,797,938
3. Ratio of costs to revenues	$\frac{130 \text{ (exp.)}}{100 \text{ (rev.)}}$
4. Approximate increased revenues reflecting increase of minimum charge per shipment from 55 cents to 75 cents[3]	$3,000,000
5. Adjusted revenues (line 2 plus line 4)	91,797,938
6. Adjusted ratio of cost to revenues (line 1 ÷ line 5)	$\frac{125 \text{ (exp.)}}{100 \text{ (rev.)}}$

---

[1] All out-of-pocket costs referred to herein include the constant expenses solely related to L.C.L. traffic.

[2] The term out-of-pocket costs as used herein includes the solely related constant costs chargeable to less-carload traffic.

[3] Computed as follows: The ratio of the revenues from minimum-charge shipments to revenues from total L.C.L. shipments computed by territories from the A.A.R. one-week study made in September 1939, was applied to the total territorial L.C.L. revenues. The estimated annual revenue from minimum-charge shipments thus obtained was increased in the proportion that the proposed 75-cent minimum charge bears to the present 55-cent minimum charge. Result in Western Territory is $3,358,765 increase. The round figure of $3,000,000 is used.

[fol. 1982] Section B. Percent of first class at which all L.C.L. traffic moves (Exhibit 135, p. 28)

Type of traffic (1)	Distribution in pounds excluding duplications 1/ (millions) (2)	Percent of first-class rate (3)
7. Class rate	122.4	[2] 70.67
8. Exceptions	34.7	[3] 66.07
9. Commodity	57.3	[4] 43.67
10. Total	214.4	[5] 6271
11. Percent by which level of the rate per 100 pounds on class rate traffic exceeds level of the rate for all L.C.L. traffic ((70.67 ÷ 62.71) — 100)		13%

---

[1] Computed from Exhibit 135, page 28. Sum of intraterritorial traffic, plus interterritorial. Interterritorial originated computed by deducting from total pounds originated the total intraterritorial pounds. Interterritorial terminated computed by deducting from total pounds terminated the intraterritorial pounds.

[2] Average of rate level for traffic moving at the regular stated classification ratings, i.e., 100, 85, 70, 55, 50, 40, and 30. Also includes all traffic rated over 100 percent of first class.

[3] Average rate level for traffic moving at rates above or between the regular stated classes, but in no instance including traffic moving at rates over 99 percent of first class.

[4] Computed by dividing average revenue per 100 pounds for intraterritorial commodity traffic by average revenue per 100 pounds for intraterritorial traffic moving at first class. From L.C.L. analysis prepared by Association of American Railroads.

[5] Weighted average computed by multiplying entries in column (2) by corresponding entries in column (3) and dividing the sum of the products by the total pounds (column (2)).

[fol. 1983] Section C. Adjustment of ratio of expenses to revenues to reflect the higher than average level of the revenues on class rate traffic compared to all L.C.L. traffic, i.e. 13%, plus the 10% decrease under the ad interim order

12. Ratio of out-of-pocket expenses to revenues, all L.C.L. traffic from line 6	125 (exp.) 100 (rev.)
13. Adjustment of revenues to reflect first, a rate level on class rate traffic which is 13 percent higher than the average on all L.C.L. traffic, and second, the 10 percent decrease under the ad interim decision (i.e., the expenses remain unchanged but the relative level of the revenues is increased by 13 percent, or from 100 to 113, and this latter figure is then decreased by 10 percent or from 113 to 102	125 (exp.) 102 (rev.)
14. New ratio of expenses to revenues for class rate traffic (125 ÷ 102)	123%

Section D. Adjustment of costs to reflect 8-ton load per car in lieu of the load of 4.3 tons experienced in 1939 and on which the costs were based

15. Ratio of out-of-pocket expenses to revenues for class rate traffic from line 13	125 (exp.) 102 (rev.)
16. Decrease in average out-of-pocket L.C.L. costs based on change from 4.3-ton load to an 8.0-ton load	[1] 26%
17. New ratio of out-of-pocket expenses to revenues to reflect decreased cost based on an 8-ton load (the figure for revenues of 102 from line 15 remains unchanged but the expenses figure of 125 from line 15 is reduced by 26 percent)	93 (exp.) 102 (rev.)
18. Adjusted ratio of out-of-pocket costs to revenues for class rate traffic (93 ÷ 102)	91%

---

[1] L.C.L. cost from Exhibit 196, Western Territory, for 4.3-ton load, 500-mile haul, is 107.8 cents per 100 pounds, and for an 8-ton load 80.2 cents. The decrease is 26 percent.

[fol. 1984] Section E. Adjustment of out-of-pocket costs for an 8-ton load to reflect a rate of return of 2.47 percent in lieu of 4 percent actually used in compiling costs

19. Ratio of out-of-pocket cost to revenues for class rate traffic when costs are reduced to reflect a rate of return of 2.47 percent (which was experienced by the carriers in 1939, Western Territory) in lieu of the figure of 4 percent actually used in compiling the cost (relative cost figure of 93 from line 17 would be decreased 3 percent.[1] Revenue figure of 102 from line 15 remains unchanged.) . . . . 90 (exp.) / 102 (rev.)

20. Adjusted ratio of out-of-pocket costs to revenues for class rate traffic based on an 8-ton load and 2.47 percent return (90 ÷ 102) 88%

Section F. Adjustment of out-of-pocket costs to reflect a 10-ton load[2] in lieu of the load of 4.3 tons experienced in 1939 and on which the costs were based

21. Decrease in average out-of-pocket L.C.L based on change from a 4.3-ton load to a 10.0-ton load . . . . [3] 32%

22. New ratio of out-of-pocket expenses to revenues for class rate traffic to reflect decreased cost based on a 10-ton load (the figure for revenue of 102 from line 13 remains unchanged but the expense figure of 125 (line 13) is reduced by 32 percent) 85.0 (exp.) / 102.0 (rev.)

---

[1] Cost for an 8-ton load, 500 mile haul, and 4-percent return is 80.2 cents per 100 pounds. Cost based on 2.47-percent return is 78.0 cents or a decrease of 3 percent.

[2] Average L.C.L. loading in October 1942 was 10.6 tons (262 ICC 447, 584). Order No. 1 of the Office of Defense Transportation (still in effect) requires with certain exceptions, a minimum load of 10 tons of less-than-carload freight.

[3] L.C.L. costs from Exhibit 196 for 4.3-ton load, 500-mile haul, are 107.8 cents per 100 pounds and for a 10-ton are 73.8 cents per 100 pounds. The decrease is 32 percent.

23. Adjusted ratio of expenses to revenues for class rate traffic based on a 10-ton load (85 ÷ 102) 83%

[fol. 1985] Section G. Adjustment of out-of-pocket costs for a 10-ton load to reflect a rate of return of 2.47 percent in lieu of 4 percent actually used in compiling costs

24. Ratio of out-of-pocket costs to revenues for class rate traffic when costs are reduced to reflect a rate of return of 2.47 percent (which was experienced by carriers in 1939, Western Territory) in lieu of the figure of 4 percent actually used in compiling the costs. Relative cost figure of 85 from line 22 would be decreased 2 percent.[1] Revenue figure of 102 from line 22 remains unchanged .... 83 (exp.) / 102 (rev.)

25. Adjusted ratio of out-of-pocket costs to revenues for class rate traffic based on 10-ton load and 2.47-percent return (83 ÷ 102) 81%

[fol. 1986] EXTRACT FROM MINUTES OF HEARING

Feb. 20, 1946.

Mr. Miller: Then there is one more point I would like to make to the Court, and that is, I don't think it is necessarily conclusive that this class rate traffic on less carloads is going to result in the terrible possible loss to the carriers which they are so concerned about. I would like to take just a moment, if the Court please, by handing up this computation which is made from the record.

I would like to go over a part of it, if I may, directing the Court's attention to certain things in it.

---

[1] L.C.L. cost for 10-ton load, 500-mile haul, and 4-percent return are 73.8 cents per 100 pounds. Costs based on 2.47-percent return are 72.0 cents per 100 pounds or a decrease of 2 percent.

[fol. 1987] (Mr. Miller hands document to Mr. Smith.)

Feb. 21, 1946.

Mr. Miller: That is the revised one I have just handed to you.

Mr. Smith: Have you handed it to the Court?

Mr. Miller: No. I was going to.

Justice Chase: Why don't we take that. This is a good time now.

Mr. Miller: That is the latest one. The last three pages have been changed.

Mr. Smith: I cannot look at this one quickly enough to see just — has been done. But I think I can explain the other one.

Mr. Miller: If you will excuse me a second, Mr. Smith, I might advise the Court, as I understand it, the only change made in it is to take the 10% reduction into account that necessitated recomputing the last three pages.

STATEMENT AND FINDINGS OF FACT BY THE COURT

These two suits put in issue the validity of the same orders of the Interstate Commerce Commission and were consolidated for hearing before a court of three judges constituted in accordance with provisions of the Urgent Deficiencies Act, 38 Stat. 29.

The first was brought against the United States by the States of New York, Delaware, Indiana, Maryland, Michigan, New Jersey, Ohio, Wisconsin, and The Commonwealth of Pennsylvania to enjoin, set aside, annul and suspend orders of the Interstate Commerce Commission requiring an increase of ten per cent in what are called the class rates charged by the railroads for transporting freight in the so-called Official Territory and a decrease of ten per cent in the class rates charged by railroads for transporting freight in the so-called Southern Territory, Western Trunk Line Territory and Southwestern Territory and corresponding [fol. 1994] changes in the in-territorial rates. Parties in interest were permitted to intervene[1] and, after hearing, an injunction pendente lite was granted.

[1] Horace A. Hildreth, Governor of Maine; Charles M. Dale, Governor of New Hampshire; Mortimer R. Proctor, Governor of Vermont; Maurice J. Tobin, Governor of Massachusetts; John A. Pastore, Governor of Rhode Island; Raymond E. Baldwin, Governor of Connecticut. (Referred to as the New England Governors.) Intervening Plaintiffs.

The Atchison, Topeka and Sante Fe Railway Company; Beaver, Meade and Englewood Railroad Company; Chicago, Burlington & Quincy Railroad Company; Chicago Great Western Railway Company; Chicago, Milwaukee, St. Paul and Pacific Railroad Company; Chicago and North Western Railway Company; The Chicago, Rock Island and Pacific Railway Company; and Joseph B. Fleming and Aaron

Thereafter the Atchison, Topeka and Sante Fe Railway Company and others which will be referred to as the Western Lines,[2] brought another petition against the United States in which the same relief was sought in respect to the same orders. Interested parties were allowed to intervene.[3]

The Western States and their respective Commissions; The Southeastern Association of Railroad and Utilities Commissioners, Defendant Intervenors.

[fol. 1996] These two suits were heard as a consolidated action, all questions relating to venue having been waived.

In order to understand the issues here presented, as well as the action of the Commission and the relevancy of the facts found by it, some preliminary statement of what was in 1939 apparently the prevailing situation in this country in respect to freight classifications and freight rates is necessary.

For the purpose of fixing freight rates the country was, and now is, divided into the four territories already mentioned and one other which is called Mountain-Pacific Territory, and which is not involved in these suits. It covers the States of Montana, New Mexico, the western portions

The other territories, which are all involved in these suits, may be roughly described as follows: Western Trunk Line Territory includes the States east of Mountain-Pacific Territory, north of Oklahoma and Arkansas, and west of the Mississippi River and the greater part of Wisconsin and the northwestern portion of Michigan. Southwestern Territory includes the country south of Western Trunk Line Territory and west of the Mississippi River. Southern Territory consists of the country lying east of the Mississippi and south of the Ohio and Potomac rivers. Official Territory comprises the remainder of the country lying north

of the Ohio and Potomac rivers and east of the western boundary of Lake Michigan and a line drawn diagonally therefrom to the western bank of the Mississippi River opposite Illinois. Official Territory has two subdivisions one of which includes all of New England and the other of which, known as Zone C, takes in the northern part of Michigan [fol. 1997] and a small part of Wisconsin. In the Southern Territory the greater part of Florida is a subdivision and in Western Trunk Line Territory there are Zones I, II, III, and IV. In each of these subdivisions rate differentials are applicable which vary the class rates from those in force elsewhere in the territories.

There are different freight rates in all the territories and these are known as class rates, exceptions to class rates, column rates and commodity rates. Only the class rates are involved in these suits. They are rates based on published classifications which are lists of commodities by name grouped in designated classes. To compute a freight charge under class rates it is necessary to know the classification, the rate for that classification and then take into account factors like weight of the shipment and distance to be carried. The basic rate so fixed for Class I is applicable percentagewise to the other classes, the rates for them being higher or lower than for Class I as the case may be. Commodity rates are special rates which have been fixed for designated commodities transported between specified points regardless of the class rates; column rates are special rates for certain named commodities which are based upon a given percentage of the class rates; and exception rates are, as their name implies, variations from the class rates. There are also key rates which apply to certain so-called key points. These differing rates, of which all but the class rates will hereafter be called for convenience special rates, have come into being because of various considerations among which have been competition between the railroads themselves, between railroads and carriers by water and by motor truck, orders issued by the Interstate Commerce Commission, which will hereafter be called the Commission, composition and amount of traffic available for [fol. 1998] carriage, cost of operation and other like relevant factors. The result is more or less of a hodge podge at least so far as class rates are concerned and various efforts have been made to secure greater uniformity and simplicity in rate making ever since the Commission was created. Despite the efforts of the Commission and the cooperation of the railroads these efforts have heretofore been mainly fruitful only in respect to improving conditions in regard to intraterritorial rates.

Not only have the class rates varied among the territories but the classifications published for the several territories have been so different that like articles were, and are, often classified in one class in one territory and in a different class in the others or in one of them. All this has brought about a most complex system of class rate fixing which has, generally speaking, produced lower class rates for Official Territory than for the others though that appears not to hold true in respect to special rates. Another result has been that a greater proportion of all freight in Official Territory moves on class rates than in the others where exception, column and commodity rates have become more prevalent, though it has come about that in all the territories only a comparatively small percentage of the entire freight carried has been on class rates. What is so carried moves both in carload, and in less-than-carload, lots and the cost of its transportation varies accordingly throughout the territories and also varies somewhat because of dissimilar conditions affecting cost of operation.

Although the products of farm, mine and forest are by no means negligible within Official Territory, that portion [fol. 1999] of the country does in some respects stand apart from the remainder because it is there that the greatest concentration of industrial plants, population, and buying power is found. The larger and better markets which producers in general wish to reach are found there and the prevailing lack of uniformity in classifications and in class rates, in so far as they directly bear upon the cost of transportation by freight within Official Territory and interterritorially between it and the other territories, and indirectly through the special rates, was thought by many to be on the whole more favorable to Official Territory, and to shippers and receivers of freight therein, than to the other territories and their shippers and receivers of freight.

It was against this general background that the Commission determined to institute two investigations and on July 29, 1939, issued orders which, as later modified, resulted in prolonged hearings by Division 2 of the Commission upon due notice to all parties in interest, as to the lawfulness of the classifications and of the class rates in each of the territories now involved. These investigations known as Docket No. 28300 which dealt with the rates and Docket No. 28310 which dealt with the classifications were so related that they were conducted simultaneously. The cooperation of the state commissions was sought in accordance with Par. 13 of the Interstate Commerce Act (49 U. S. C. A. Par. 13), and a committee representing such commissions sat with the Division. The investigation became extremely comprehensive and a large amount of evidence was received which was reviewed by the full Commission. It filed a [fol. 2000] proposed report in No. 28310 providing for the creation of a uniform classification for all the territories, including that part which is now subject to what is called the Illinois classification which has some interstate application in a border area between Official Territory and Western Territory but has no interterritorial effect, to be compiled by the Commission or by the railroads for the approval of the Commission provided the railroads were willing to undertake the task. The railroads indicated their willingness to do so and the classification is now being made. That will require an enormous amount of work and will take a considerable time, perhaps years. No issues respecting that classification which is dealt with in Part I of the Report are raised now.

Without serving a proposed report in No. 28300, the Commission filed a comprehensive report dealing with class rates to become effective when the classification is prepared and approved. This report contained numerous findings as to the characteristics of the existing rate structures, the importance of interterritorial traffic, the relative levels of class rates in each territory and the indirect results of the proposed revision. Evidence afforded by intricate and detailed cost studies made by employees of the Commission to show the relative cost of the carriage of freight in the several territories was also received and considered following revisions of the studies made in response to criticisms by interested parties. Findings were made as to interterritorial class rates, the relative levels of revenue from all freight in the Southern and Official Territories, the effect of applying the Official Territory level of all freight rates to all freight moved in Southern Territory, the relative costs and composition of all freight moved in South- [fol. 2001] ern Territory, and the rates of return. The Commission also made findings as to the effect of the class rates on shippers in Southern Territory, the relative costs and composition of the traffic, the rates of return and their effect on the economic development of that territory. Findings on similar or kindred subjects were made respecting the other territories and the interterritorial freight movement among them. The costs of carload and less-than-carload service were considered and findings made as to each. Findings were made as to the effect of motor truck and water-borne freight competition, as to the effect of the special rates on movement of freight taking class rates, and of the discrepancies in the existing class rates on the attainment of uniformity in classification. There is an area geographically within Official Territory which is served by the so-called Pocahontas lines, which are predominantly coal carrying roads, that is for statistical purposes at times treated separately from the remainder of Official Territory because, though those railroads do carry freight at class rates, the bulk of their freight, being coal, is quite different in respect to the means and cost of carriage from the kinds of freight which characterize the carriage elsewhere in the territory. For like reasons Kentucky in the Southern territory was at times likewise treated separately from the remainder of Southern territory in the Report.

The Commission then found as follows:

> "1. That the intraterritorial class rates (except as they apply to rail-and-water coastal service or relate to short- or weak-line arbitraries) applicable within official, Illinois, southern, southwestern, and western trunk-line territories, are, and for the future will be, unjust and unreasonable, in violation of section 1 (4) and (5) of the act.
>
> "2. That the interterritorial class rates in issue in this proceeding applicable between official, Illinois, southern, southwestern, and western trunk-line territories are, and for the future will be, unjust and unreasonable, in violation of section 1 (4) and (5) (a) of the act.
>
> [fol. 2002] "3. That the relation between the interterritorial class rates applicable from southern, southwestern, and western trunk-line territories to official and Illinois territories, on the one hand, and the intraterritorial class rates applicable within official and

Illinois territories, on the other hand, makes, gives, or causes, and for the future will make, give, or cause, undue and unreasonable preference and advantage to official and Illinois territories as a whole and the shippers and receivers of freight located therein, and subjects and for the future will subject, southwestern, and western trunk-line territories as a whole and the shippers and receivers of freight located therein to undue and unreasonable prejudice and disadvantage, in violation of section 3 (1) of the act.

"4. That a just and reasonable basis of class rates, not unjustly discriminatory or unduly preferential or prejudicial, to be observed by the respondents with respect to the traffic described in findings 1, 2, and 3 immediately preceding, will be the following:

(a) The application as a maximum for class 1 (class 100) of the scale of rates shown in appendix 10.

(b) The rates herein prescribed are to — applied to the distances over the shortest possible rail routes by which carload traffic can be interchanged between carriers without transfer of lading.

(c) That the scales of class rates for each class, other than class 1 (class 100), shall bear the percentage relations, to class 1 (class 100) rates found in part I hereof to be just, fair, and reasonable for the classes in the uniform classification. Appendix M to *Western Trunk Line Class Rates,* 164 I. C. C. 1,282 contains a table which shows the percentages of class 100, below 100, herein found reasonable; and shows the rates which will result from applying these percentages to any given rate from 30 cents to $4. The rates shown in this table should be applied in establishing the rates for classes below 100. For classes above 100, fractions of a cent should be disposed of by dropping those less than one-half and by increasing those of one-half cent or more to the next whole cent.

(d) Key-point class rates based on the scale herein found reasonable may be established subject to our approval between points where such rates were prescribed by us in the prior general class rate revisions.

> (e) That such class rates shall apply to the ratings of commodities taking class rates as the same shall be rated in the uniform classification found to be just, fair, and reasonable in part I hereof.
>
> (f) That such revised uniform class rates and classification ratings shall be made applicable simultaneously."

[fol. 2003] No order putting the class rates found to be just and reasonable for the future has been, or will be, made until the new classification becomes effective and no issue is now directly raised as to such rates with which the Commission dealt, but not unanimously, in Part II of its Report.

What the Commission, also not unanimously, did which is now attacked was to provide in Part III of its Report for an ad interim class rate revision which with certain designated minima class I rates provides in general for a 10 per cent increase in class rates in Official Territory and for a 10 per cent decrease in such rates in the other territories involved herein with corresponding changes in interterritorial class rates as already mentioned. The Commission said in part:

> "In parts I and II of this report we have found the classification ratings and class rates involved in this proceeding to be an unjust and unreasonable, and unduly and unreasonably preferential and advantageous, as well as unduly and unreasonably prejudicial and disadvantageous in certain respects for the reasons therein stated. It is our duty under Section 15 (1) of the act to determine and prescribe what will be the just and reasonable rates and charges, and what classification will be just, fair, and reasonable, to be hereafter followed.
>
> "The record herein is extensive, but from the very nature of these proceedings the comprehensive basis of just and reasonable rates cannot at this time be established in connection with a uniform classification such as we have found to be required as just, fair, and reasonable, until that classification is brought into being. The comprehensive rate revision and classification, unification and revision should be accomplished simultaneously, if possible. From our prior expe-

rience with extensive rate readjustments and classification proceedings, and from the record in this proceeding, we know that necessarily considerable time must elapse before the respondents can formulate and tender for our approval a classification which will conform to our findings with respect to justness, fairness, and reasonableness. The many complexities inherent in a task of such character and magnitude are inevitable. The shipping public and rate-making authorities of the States should be afforded opportunity for participation in the undertaking as far as their interests are con- [fol. 2004] cerned. And as shown by the record, and as within our common knowledge, there is at the present time a shortage of men who may be devoted to such task by the respondent carriers, public authorities, including this Commission, and by shippers and their organizations. This latter condition is a direct consequence of the withdrawal of such experts from their former employment for active participation in the war.

"We find, however, that in the circumstances it is possible and practicable to make certain readjustments in the existing basis of class rates, predicated upon the continued application of the existing classifications, which will be just and reasonable, which will have the effect of bringing to the minimum the preferences and prejudices which we have found to be unlawful, as completely as it is practicable now to eliminate such violations. This finding is based upon the peculiar circumstances of the present time, largely the result of the war, and because time will be needed to effectuate a classification revision and application of a scale or scales of class rates as our findings in part I and part II hereof contemplate. The adoption of the simple and direct method of rate revision which we are about to outline will conserve time, and will obviate many tariff publishing difficulties without complete revision of the classifications before us and the determination and prescription of new scales of rates based thereon.

"Our general conclusions and findings heretofore made have emphasized the importance and desirability of bringing the several intraterritorial freight-rate structures under consideration closer together in level and more upon the same pattern or scheme. We have also emphasized the importance and desirability of removing as many differences as possible between the interterritorial rates of the respondents and the intraterritorial rates which they maintain. The basis which we shall not outline is in harmony with that objective, and will approach, as a preliminary step, the uniformity of class rate structure which we have previously found will be just, fair, and reasonable.

"We find and determine that the basis hereinafter outlined will result in rates which, until a complete revision in harmony with our previous findings is possible, will be just and reasonable.

"We find and determine that on and after the effective date of the order to be entered herein, the existing and current interstate class rates applicable to freight traffic moving at the classification ratings within southern, southwestern, and western trunk-line territories as those territories have heretofore been described in this report, and interritorially between those territories, and also between those territories, and official territory, as hereinbefore described, will be unjust and un- [fol. 2005] reasonable unless reduced 10 percent, subject to the class 1 scale shown at the end of this paragraph as minima for class 1 rates, and subject to the qualifications hereinafter indicated. This reduction is to be made by using the present current applicable class 1 rates as a base, and reducing them 10 percent, subject to observance of the rates in the distance scale set out hereinafter as minima. The rates on all the other classes in each class-rate system are to be correspondingly reduced by observing the same percentage relations to the class 1 rates thus reduced that such classes bear to the currently applied class 1 rates. No changes in existing exception rates or column rates are contemplated by this finding. No increase in any existing class rates is to be made under this finding within the southern, southwestern, and western trunk-line territories, and interterritorially between those territories, and also between those territories and official territory. In determining resulting rates, fractions of a cent should be disposed of by dropping those of less than one-half cent and by increasing those of one-half cent or more to the next whole cent. We do not contemplate that groupings in connection with the present class rates shall be changed as a result of this finding. In applying the scale of minimum rates, the distances between groups or blocks of stations upon which the present class rates are based are to be observed, rather than the actual distances to or from such station, when differing therefrom. (The table of rates included at this point in the report is here omitted.)

"We find and determine that simultaneously as a part of the adjustment hereinbefore outlined, the existing applicable interstate class rates for freight traffic moving at classification ratings within official territory (including Illinois territory) should be increased 10 percent as maximum scales, superseding the intraterritorial official class-rate scale heretofore prescribed or authorized by us, subject to the qualifications hereinafter indicated, and that as so increased those scales will be just and reasonable as maxima. The increase of maximum class rates applicable within official territory is to be made by using the present current applicable class I rates as a base, and increasing them 10 percent. The rates on the other classes should be correspondingly increased by observing the same percentage relations to the maximum class I rates as thus increased that such classes bear to the currently applied class I rates. No changes in existing exception rates or column rates are contemplated by this finding. The same provision with respect to disposition of fractions of a cent, as to groupings, and as to the ascertainment of distance hereinbefore stated with respect to the reductions within and between other territories and between those territories and official territory, shall in like manner apply to the increases in the maximum [fol. 2006] class-rate charge without additional charge therefor. We also find and determine that such pick up and delivery service has been extended in scope largely since our findings and orders in the various proceedings hereinbefore recited which prescribed or approved the class rates in issue in this proceeding. We find and determine from the evidence of record in this proceeding, that when such service is performed the applicable class rate with the existing minimum charge as stated does not yield the out-of-pocket costs incident to the transportation service which it purports to cover. We further find that to the extent the minimum charge per shipment is less than 75 cents, it is below a just and reasonable minimum rate and charge. Upon the record as it stands, and predicated upon the adjustments for the interim period hereinbefore found to be just and reasonable, we determine and find that the minimum charge per shipment, whether pick-up and delivery service is afforded or not, whenever such charge is below 75 cents, is below the minimum of a just and reasonable rate and charge and that 75 cents is and will be a just and reasonable minimum charge to be made.

"The foregoing findings and determinations are made as of the date when the order to be entered herein becomes effective. Inasmuch as these proceedings will necessarily be held open upon our docket, and as our power to suspend, modify, or set aside our orders is recognized by the act, we do not now prescribe a specified period of time during which these findings as to the interim adjustment shall continue in force, but make them as continuing until our further order.

"In certain States the applicable intrastate class rates are held to a basis prescribed by us in orders entered in proceedings under section 13 (3) and (4) of the act. No special consideration has been given to such intrastate rates in this proceeding. If any modification of our outstanding orders seems necessary, it should be sought by appropriate action as contemplated by our general rules of practice.

"Our outstanding orders will be modified to the extent necessary to enable the carriers which are bound thereby to publish and file schedules embodying such increases and decreases; and authority will be given by appropriate order under section 6 of the act for the publication of simple forms of supplements to existing schedules to effectuate such increases and decreases. If carriers need relief under the provision of section 4 of the act, we will give prompt consideration to applications therefor."

And order was entered making this ad interim revision effective as of January 1, 1946 but was suspended pendente lite by order of this Court.

[fol. 2007] We find that the facts found by the Commission are supported by substantial evidence and adopt them as our findings. Their inclusion herein by reference to the Commission's Report is to be understood.

The Western Lines were allowed at the final hearing in this court, over the objection of the defendant, to introduce some evidence on the question of the confiscatory character of the ad interim order as to them. This was received subject to a motion to strike on which decision was reserved at the close of the hearing. The motion to strike is now denied on the authority of Baltimore & Ohio R. R. v. United States, 298 U. S. 349 and we make the following findings on the evidence thus received.

A very large number of different commodities are carried at one time or another in less-than-carload lots by the so-called Western Lines within the rate territories here involved west of the Mississippi River. Some of this traffic, though what percentage was not definitely shown, moves on exception rates and some on commodity rates but a substantial amount of it is carried on class rates. The average loading per cars of this traffic for the year 1939 was 4.3 tons and that is close to what it had been for some six years previously, though on the whole the year 1939 showed a little decline mainly due to competition by carriers by motor truck and to the greater combining of shipments into carload lots. Because of an order of the Office of Defense Transportation issued in 1942 the minimum per car loading of the less-than-carload traffic was set at 10 tons and that more than doubled the previous average loading per car. That order was still in effect at the time of the hear- [fol. 2008] ing. When it is rescinded the railroads intend to return to pre-order practices and may have to cut the average loading to move the freight more quickly though that will depend upon the impact of competition and the volume offered for such carriage. There are some items in what is known as Consolidated Freight Classification No. 16, and the supplements thereto, which are rated fourth class, column 55, to which no commodity or exception ratings are applicable in less-than-carload lots. That is also true in respect to some third class ratings, column 70. There is a substantial movement of such commodities in Southwestern Territory and there is no major railroad, other than the so-called Burlington Lines, which relies for its revenues exclusively on its operations within the Western Trunk Line and Southwestern Territories which has not been in some sort of a receivership or bankruptcy proceeding within the last five years. The raising of rates, other than class rates, for less-than-carload lots as suggested by the Commission in its report for consideration by the railroads has not been done since that has not been thought feasible in view of the probable loss of traffic it would cause.

There was evidence indicating that the carriage of the commodities above referred to which are not carried by the railroads within Western Trunk Line and Southwestern Territories other than on class rates in less-than-carload lots will not produce enough revenue to pay the cost of their carriage when the ad interim reduction in class rates becomes effective but we are unable to find that to be a fact proved. The statistical evidence to support that contention was based on the assumption that the average car [fol. 2009] loadings would be as low as 4.3 tons, which was a low point average, and apparently did not take into account that part of the Commission's order which requires a minimum charge of 75 cents per shipment less-than-carload instead of the 55 cent minimum charge heretofore. We have not sufficient confidence in that type of evidence to be satisfied that it proves that deficit carriage is required by the ad interim order, though we find from the evidence that costs of the carriage have for some time been increasing and will probably show additional increases.

Chase, Circuit Judge:

The Commission acted, in making the investigations and the resulting orders, pursuant to its conception of its duties as the agency created to administer the Interstate Commerce Act (49 U. S. C. A. Par 1), which will hereinafter be called the Act. Its action was taken particularly with reference to Par. 1 (4) which imposes upon every railroad which is a common carrier in interstate commerce the duty

"to provide and furnish transportation upon reasonable request therefor, and to establish * * * just and reasonable rates, fares, charges and classifications applicable thereto; * * *".

And to Par. 1 (5) (a) which provides that:

"All charges made for any service rendered or to be rendered in the transportation of passengers or property, * * * or in connection therewith, shall be just and reasonable, and every unjust and unreasonable charge for such service or any part thereof is prohibited and declared to be unlawful."

Also to Par. 3 (1), which, as amended by the Transportation Act of 1940 (49 U. S. C. A. (Supp.) Par. 3 (1), provides that it shall be unlawful:

[fol. 2010] "For any common carrier * * * to make, give, or cause any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, association, locality, port, port district, gateway, transit point, region, district, territory, or any particular description of traffic, in any respect whatsoever; or to subject any particular person, company, firm, corporation, association, locality, port, port district, gateway, transit point, region, district, territory, or any particular description of traffic to any undue or unreasonable prejudice or disadvantage in any respect whatsoever; * * * ."

"That whenever, after full hearing, upon a complaint made as provided in section 13 of this part, or after full hearing under an order for investigation and hearing made by the Commission on its own initiative, either in extension of any pending complaint or without any complaint whatever, the Commission shall be of opinion that any individual or joint rate, fare, or charge whatsoever demanded, charged, or collected by any common carrier or carriers subject to this part for the transportation of persons or property as defined in the first section of this part, or that any individual or joint classification, regulation or practice whatsoever of such carrier or carriers subject to the provisions of this part, is or will be unjust or unreasonable or unjustly discriminatory or unduly preferential or prejudicial, or otherwise in violation of any of the provisions of this part, the Commission is hereby authorized and empowered to determine and prescribe what will be the just and reasonable individual or joint rate, fare, or charge, or rates, fares, or charges, to be thereafter observed in such case, or the maximum or minimum, or maximum and minimum, to be charged, and what individual or joint classi- [fol. 2011] fication, regulation or practice is or will be just, fair and reasonable, to be thereafter followed, and to make an order that the carrier or carriers shall cease and desist from such violation to the extent to which the Commission finds that the same does or will exist, and shall not thereafter publish, demand, or collect any rate, fare, or charge for such transportation other than the rate, fare, or charge so prescribed, or in excess of the maximum or less than the minimum so prescribed, as the case may be, and shall adopt the classification and shall conform to and observe the regulation or practice so prescribed."

The inquiries were commenced, the reports filed, and the order made as provided in Pars. 13 (2), 14 (1) and 15 (1) of the Act.

In the first of the two suits which were brought the plaintiffs and the intervenors who support them attack the ad interim order on the grounds that it is an attempt to regulate industrial conditions by means of rate making; that it is the result of political agitation; that findings essential to support the order are lacking and that the evidence does not support the findings made, in that there is no proof of facts to support so-called ultimate findings above quoted to keep them from being merely arbitrary and capricious. These so-called preliminary findings which are lacking and of which proof is also lacking are said to be that there is no finding of a threatened rate war which would jeopardize the revenues of the railroads in Official Territory; or that the existing class rates are not fully compensatory to railroads in Official Territory for the transportation services for which they are charged; or that they are so low as to cast an undue burden upon other traffic. Also it is argued that the finding of undue prejudice [fol. 2012] and preference created as between territories by the present class rates is arbitrary because not based upon preliminary findings made on proof by means of substantial evidence to the effect that the class rates published are the rates at which the freight moves; because findings and proof of a competitive relationship between the party preferred and the party prejudiced are lacking; because findings and proof of substantial injury to the party found to be prejudiced and of substantial benefit to the party found to be preferred are lacking; because findings and proof that the same carrier or carriers are responsible for or control both the preferential and prejudicial rates are lacking; because findings and proof that the carriers charge existing class rates on the same kinds of freight moved into Official Territory which is carried at class rates within Official Territory are lacking; because findings and proof that similar freight is carried under similar conditions in each territory are lacking; and perhaps there are other grounds of similar nature. The suit brought by the Western Lines and supported by the intervenors aligned with them adds the ground that the ad interim reduction in the class rates in the West is confiscatory.

The potency of much of the argument in support of the ground relied on by the plaintiffs depends upon the effect to be given the before mentioned amendment to Par. 3(1) of the Act by the Transportation Act of 1940 and to Par. 5 (b) of the latter. The change thus made in Par. 3(1) of the Act was the addition of the words "region", district, territory" following "transit point" in the enumeration of the persons, places and traffic as to which preference and [fol. 2013] prejudice was expressly made unlawful and prohibited. In accordance with what has become a somewhat common practice, the Transportation Act of 1940 contains a declaration of policy which in part is "to encourage the establishment and maintenance of reasonable charges for transportation service without unjust discriminations, undue preferences or advantages or unfair or destructive competitive practices." And in Par. 5 (b) is found what is known as the Ramspeck Resolution where it is provided that:

> "The Interstate Commerce Commission is authorized and directed to institute an investigaton into the rates on manufactured products, agricultural commodities, and raw materials, between points in one classification territory, and points in another such territory, and into like rates within any of such territories, maintained by common carriers by rail or water subject to part I of the Interstate Commerce Act, as amended, for the purpose of determining whether said rates are unjust and unreasonable or unlawful in any other respect in and of themselves or in their relation to each other, and to enter such orders as may be appropriate for the removal of any unlawfulness which may be found to exist: * * *."

The Commission undertook to carry out the mandate of this statute by means of the investigations it had already initiated as above set forth. It found, however, that, because of conditions largely attributable to the war, it was advisable to confine its investigation and orders to classifications and class rates established and maintained by common carriers by rail and accordingly did so.

But it is earnestly argued by the plaintiff, especially by the Western Lines, that the Commission misinterpreted [fol. 2014] the above changes in the statute to amount to a mandate requiring it to bring about an equalization and uniformity of rates for like kinds and amounts of commodities mile for mile among the various rate territories of the country and to increase its powers so to do. It is recalled that the Commission had previously mistakenly construed the so-called Hoch-Smith Resolution to give it added powers to correct what it found to be unjust discriminations "as between the various localities and parts of the country." And it is pointed out that if such a mistaken interpretation has been made the order which is the result of it is erroneous and must be set aside. Ann Arbor R. R. v. United States, 281 [illegible]. S. 658; Atchison, T., & S. F. Ry. v. United States, 284 U. S. 248, 262. That the same mistake has been made is thought to be apparent because the words "parts of the country" in the above quotation from the Hoch-Smith Resolution are as broad and comprehensive as "regions, districts, territories" added by the 1940 Amendment to Par. 3 (1). Yet even if this premise be true, it does not follow that the same mistake has now been made. It does not appear that the Commission has herein acted upon any assumption that the 1940 changes altered the basic principles governing its action. On the contrary, it appears that in determining the existence of discriminatory rates it has construed the changes in the statute to mean that where it is found that class rates are different in the different territories, and interterritorially, and those differences cannot be justified under recognized principles of rate making by proof of sufficient differences in costs of transportation, composition and amount of traffic, competition by common carriers other than railroads, and the like, those rates may [fol. 2015] be found unjustly preferential or prejudicial because unduly discriminatory and consequently unlawful as between regions, districts and territories.

We think this interpretation of Par. 3 (1) of the Act as amended is supported by the legislative history. The original Interstate Commerce Act was primarily aimed at the elimination of unjust discriminations of various kinds. Louisville & Nashville R. R. v. United States, 282 U. S. 740, 749-50. Yet it did not until the amendment of Par. 3 (1) in 1940 expressly prohibit unjust discriminations against any region, district or territory as such. "Territory" had become a word of art denoting the several rate territories which had grown up and, by adding region and district, parts of such territories were included to amplify the words "locality, port, port district, gateway, transit point" which had previously been the only designation of what might be called geographical units in the specific reference in the statute to a person, company, firm, corporation, association, * * *, or particularly description of traffic" as to which unjust preference and prejudice and discrimination were made unlawful. These words had proved to be, in their effect upon geographical designation as such, of somewhat restricted application as was shown by Texas & Pacific Ry. v. United States, 289 U. S.

This amendment to Par. 3(1) appeared in S. 2009. In the report made by the Senate Committee on Interstate Commerce[5] it was said as to Par. 3(1), "There has been [fol. 2016] no substantial change therein, except that the words 'region, district and territory' appearing in lines 20 and 23 on page 26 have been inserted." And the chairman of the committee said in part in explanation of the amendment, "The previous provision with regard to 'discrimination' simply referred to discrimination as to 'locality, port, port districts, gateway, transit point' without specifying the region, district or territory. So, we felt that by broadening the language we would at least take away that excuse, and we would provide expressly that the Commission should not discriminate in its rate structures."[6] In the discussion of the bill in the Senate the chairman of the committee in charge of it was asked if he thought the proposed amendment of Par. 3(1) would make toward the equalization of rates in the various regions. And he replied, "I do not [fol. 2017] think there is any doubt about it at all, because that is the purpose of the bill; it is the intention of the bill."[7] We think Par. 3(1) as thus amended does add new factors to be taken into account by the Commission in determining, under the old and well recognized principles which were before guides to decision in such matters, whether existing rates are unlawful. These new factors are whether such rates are unjustly preferential, prejudicial and discriminatory as between regions, districts or territories; and, in our opinion, Par. 3(1) now empowers the Commission to find such rates unlawful even though they would have been lawful in the light of all relevant considerations before the amendment. We may, indeed, take it for granted that they were lawful previous to the amendment since they had been in the main the result of comparatively recent investigations and orders of the Commission. That the Commission correctly interpreted its powers and duties after the amendment appears to be shown by the following quotation from its report: "By the amendment to the substantive antidiscrimination provisions of section 3(1) all discriminations in the form of undue or unreasonable preference or advantage, or undue or unreasonable prejudice or disadvantage, as between regions, districts, or territories, viewed as separate entities, were brought directly within the purview of the act along with all the other inhibitions previously included. We were then authorized and directed by the other provisions mentioned to remove any such discriminations found to exist in a proper proceeding. This means that such discriminations as those mentioned which result from differences in the methods of distributing the general rate burden in the several rate-making territories, or from any other cause, if not justified upon proper consideration of recognized elements of rate making applied in the light of the amended law are unlawful and should be corrected."

[7] Cong. Rec., Vol. 84, part 6, p. 6072.

[fol. 2018] We, therefore, hold that the Commission correctly decided that the ad interim order under review was within the scope of its statutory power and proceed to determine whether the order was erroneous in any respect on the other grounds advanced for setting it aside.

First, there should be a brief allusion to the contention that the plaintiff States have no standing to sue as parens patriae but only as shippers and receivers of freight. This point has become more or less academic since there are states who are parties plaintiff who plainly may sue as freight shippers and consignees directly affected by the order. But all the States who are parties are political entities which are also regions or districts within the rate-making territories involved and they are directly affected as such and have an interest in behalf of their citizens and communities above and apart from the rights of any particular shipper or receiver of freight to a continuance of existing rates or the maintenance of others. This we think distinguishes such cases as Oklahoma v. Atchison, T., & S. F. Ry., 220 U. S. 277, 286; Sprunt & Son, Inc. v. United States, 281 U. S. 249; and Alabama Power Co. v. Ickes, 302 U. S. 464, and gives these States standing to sue as parens patriae to preserve or enhance the welfare of their citizens by securing to them the proper administration of federal laws under the principles applied in Georgia v. Pennsylvania R. R., 324 U. S. 439, 446-52.

Our review of orders made by the Commission within the scope of its authority is limited to the following broad considerations and matters incidental thereto: (1) Whether the order is based upon adequate findings; (2) Whether there is substantial evidence in the record to support the findings made; and, (3) Whether the record was made as the result of adequate hearings of which due notice was given to all interested parties and at which those who appeared were fairly permitted to present their evidence and be heard in argument. Board of Trade v. United States, 314 [fol. 2019] U. S. 534; Rochester Telephone Corp. v. United States, 307 U. S. 125, 140; Atchison, T., & S. F. Ry. v. United States, 284 U. S. 248; Merchants Warehouse Co. v. United States, 283 U. S. 501.

We may dispose of the last of these quickly. It is apparent that the Commission did give due notice to all interested parties; that it did conduct numerous and lengthy hearing in various parts of the country involved; and that it did admit into the record and give proper consideration to, after giving a fair opportunity for argument, such relevant evidence as was offered.

In considering the second we are limited to a search for substantial evidence to support such findings as were made. There is such evidence. While it is not uncontradicted, the over-all weight of the evidence cannot be determined by us but is for the sole consideration of the Commission. Questions pertaining to the effect of rates and to rate making are extremely involved and highly technical matters and have to be decided after evaluating intricate evidence which is often based in part upon assumptions. Persons unskilled in those matters are much handicapped in dealing with such subjects and the well established rule is that the expert knowledge of the Commission and its experience, when resorted to and given effect in sufficiently supported findings which are the result of adequate and properly conducted proceedings, should be left undisturbed by the courts under the doctrine of administrative finality. Rochester Telephone Corp. v. United States, supra; Interstate Commerce Commission v. Illinois C. R. R., 215 U. S. 452; Chicago, St. P., M. & O. Ry. v. United States, 322 U. S. 1; Gregg Cartage & S. Co. v. United States, 316 U. S. 74.

In considering the first, we must decide whether the so-called primary findings and proof to support them are indispensable to establish the kind of unlawfulness here found by the Commission in the light of the above-mentioned [fol. 2020] amendment of the Act.

Such primary findings need not be listed again. We now refer to them as set forth in the above statement. They relate in one way or another to what have been held essential to be proved to establish a basis for findings of preference, or prejudice or discrimination as to rates before the amendment of 1940 to Par. 3(1) of the Act. They are matters which are still pertinent and if evidence to support findings to supply the lack pointed out as to this record had, or could have been, offered it would undoubtedly have been admissible and findings in accord with it would have given added support to the order made. But it is quite another thing to say that all such findings are needed to support the so-called ultimate findings made and the ad interim order based on them. For instance, it has been argued that there can be no increase in class rates in Official Territory unless there is first a so-called primary finding, supported by substantial evidence that the present rates are not compensatory. While that fact, if proved, would have been of much significance the failure to prove it and the consequent lack of a finding that present rates are confiscatory does not leave the Commission's finding that the rates are unlawful unsupported by substantial evidence. It weighed all the evidence and found that it tipped the scales in favor of its ultimate finding that the present rates were unlawful. That basic conclusion if supported sufficiently by other evidence, was enough to justify the exercise of the Commission's statutory power to alter the rates as needed to make them lawful for the future. Pennsylvania R. Co. v. United States, 323 U. S. 588; Chicago, B. & Q. R. R. v. United States, 60 F. Supp. 580; Scandrett v. United States, 32 F. Supp. 995, aff'd. 312, U. S. 661; Jefferson Island Salt Mining Co. v. [fol. 2021] United States, 6 F. (2) 315. We think enough was proved and found to warrant such basic conclusion.

There was ample evidence on which the Commission found that the class rates in the various territories involved and the interterritorial class rates among those territories were on different levels within the existing classification as well as based upon differing classifications. The Commission found on substantial evidence many so-called primary facts, which need not be enumerated here but which appear in its report, showing transportation costs, composition of traffic, kinds of markets, natural resources, commodities produced or manufactured in the various territories and the parts thereof, and found preference, prejudice, and discrimination as above set forth. Having found the basic facts as pointed out, the Commission was under the duty to exercise its judgment and discretion in determining their effect upon the territories. We may not agree with its decision and we may not agree with the wisdom of the ad interim order but we have no power to set the order aside because of any such disagreement and substitute our own judgment for that of the Commission. Norfolk & Western Ry. v. United States, 287 U. S. 134. For instance, it would be unlawful because discriminatory to try to equalize clearly inherently unequal business conditions, not due to existing freight [fol. 2022] rates in the various territories or any regions or districts therein, by manipulating rates. Anchor Coal Co. v. United States, 25 F. (2d) 462. We might think that the probable import of this order, but we are bound by the Commission's action in justifiably finding facts to give another, and a lawful, basis for it. Again it is well known that there is a zone of reasonableness between the maxima and minima in rate making in which a carrier may usually set the rates it charges. United States v. Chicago, M., St. P. & P. R. R., 294 U. S. 499. We might think these existing class rates are within such a zone, but again we may not interfere with the order for that reason. Nor can other like considerations prevail to brush aside the statutory control over rates which has been confided to the Commission.

It has been earnestly argued that the investigations and order under review are the result of political agitation having for its ultimate object the dislocation of industry from Official territory and its establishment in the other territories, principally in the Southern, and that does appear plausible. Yet such a question is not within the bounds of judicial cognizance but relates to matters of legislative policy. Whether such policy is wise or the opposite is not for us to determine. We can only be concerned with decision as to whether or not the Commission's action was within its power properly exercised under statutory authority which does not go beyond Constitutional limitations. Chicago, B. & Q. R. R. v. McGuire, 219 U. S. 549; Rochester Telephone Corp v. United States, supra.

The contention that the order should be set aside as to the Western Lines because confiscatory as to them raises a question of Constitutional limitation under the Fifth Amendment upon the statutory authority which can be conferred upon the Commission. The railroads in Southern territory make no such contention and it would seem that the Western Lines came somewhat late to rely upon any violation of Constitutional safeguards as to them.

[fol. 2023] From the cost studies relied upon by the Commission after it decided what weight should be given them, the Commission found that what is called less-than-carload traffic is not, when war-time loading is excluded, "yielding, on the average, its out-of-pocket costs plus constant expenses solely related to this traffic, plus the cost of collection and delivery, in any territory except possibly in the southern where the margin of difference between revenues and these expenses is slight." It is, therefore, argued that the confiscatory nature of the ordered reduction in class rates moving in less-than-carload lots is self-evident and that as it does not produce its out-of-pocket costs no trial period is necessary to determine the unlawfulness of the order since an increase in traffic brought about by the lowered rates would obviously but increase the out-of-pocket costs and increase the deficit.

It will be remembered that the Western Lines carry only .6 of one per cent of their total freight at rates affected by this order. We don't suggest that even that is less than enough to entitle them to relief if they can show that they will be compelled to carry it in the future for less than actual cost. But this less-than-carload traffic to which the cost studies relate is not by any means wholly carried on class rates and in its supplemental report of October 30, 1945 the Commission correctly said:

"The cost data on less-than-carload traffic relates to such traffic as a whole and not solely to that which moves on class rates. In appraising the figures it must be borne in mind that much of this traffic does not move on class rates, but on exception and commodity rates. Obviously, the class-[fol. 2023a] rate traffic bears the highest rates. Consequently, even if under present condition less-than-carload traffic, as a whole, in the West and South is not paying its proper share of the costs, it is possible that such a result is due in large measure to the maintenance of exception and commodity rates. In any event, data based only on averages for all this traffic do not necessarily demonstrate the impropriety of reductions in the highest level of rates. Even as to class rates on less-than-carload traffic, the record shows that in western trunk-line and southwestern territories many intrastate class rates are maintained which are lower than the corresponding reduced interstate class rates required by our interim order.''

The attempt in this court by the Western Lines to break down less-than-carload lot carriage into parts carried wholly on class rates and parts as to which the above finding of the Commission is correct, and to show that the part carried wholly on class rates would not pay its way under the ad interim order has failed in our judgment to measure up to the required standard of certainty by way of proof as to transportation costs for particular commodities. Compare, Baltimore & Ohio R. R. v. United States, supra. There is too much assumption and opinion involved in such evidence to justify definite findings, in advance of a trial period, to the effect that the ad interim rates will be confiscatory. See St. Joseph Stock Yards Co. v. United States, 298 U. S. 38; Minnesota Rate Cases, 230 U. S. 352; Willcox v. Consolidated Gas Co., 212 U. S. 19; City of Knoxville v. Knoxville Water Co., 212 U. S. 1.

[fol. 2024] Nor is the order erroneous because the carriers were not allowed any alternative method for the removal of the discriminations which make the present class rates unlawful. This was a rate order made under Par. 15 and not an order under Par. 3 in which an alternative must be provided as held in Texas & Pacific Ry. v. United States, supra.

The denial by the Commission of the application to reopen the proceedings and receive additional evidence especially as to conditions subsequent to 1939 was not an abuse of its discretion. It is inevitable in such matters that an order by the Commission cannot be based on strictly up-to-the-minute proof. There must be unusual circumstances, not here present, to justify the reversal of an order such as this on the ground that it was based on a stale record. Interstate Commerce Commission v. City of Jersey City, 322 U. S. 503. But see, Atchinson T. & S. F. Ry. v. United States, 284 U. S. 248 as limited by United States v. Northern Pacific Ry., 288 U. S. 490.

A decree will be entered dismissing the petitions in each case but the dismissal of the petition by the Western Lines will be without prejudice to another suit to restrain the enforcement of the ad interim rates if they are found, after a fair test, to be confiscatory. See, Darnell v. Edwards, 244 U. S. 564.

If any of the parties desire findings of fact in addition to those made, proposed findings may be submitted to the court within fifteen days.

NOTICE—Filed May 18, 1946

To Counsel for all Parties:

Please Take Notice that the plaintiffs in Civil Action No. 2311, of whom the States of New York and Ohio are also interveners in Civil Action No. 2337, by their counsel, will petition the Court at a session to be held in Room 1705, United States Court House, Foley Square, New York, N. Y., on Thursday, May 23, 1946, at 12:30 P. M., Honorable Harrie B. Chase, Circuit Judge, and Honorable John C. Knox and Honorable Stephen W. Brennan, District Judges, sitting, or as soon thereafter as counsel can be heard, for continuance of the interlocutory injunction heretofore granted, or if such interlocutory injunction [fol. 2030] shall be dissolved by order of the Court then for an order reinstating the interlocutory injunction or an order staying the orders of the Interstate Commerce Commission, dated May 15, 1945 and October 30, 1945, pending the perfecting by petitioners of an appeal to the United States Supreme Court or until the expiration of the time involved for the filing of such an appeal, and if such an appeal shall be taken and perfected within the time allowed then pending final determination of the appeal by the United States Supreme Court and the entry of order pursuant thereto. A copy of plaintiffs' petition is attached hereto.

Dated: May 17, 1946.

PETITION FOR CONTINUANCE OR REINSTATEMENT OF INTERLOCUTORY INJUNCTION OR FOR STAY PENDING APPEAL—Filed May 18, 1946

To the Honorable Harrie B. Chase, Circuit Judge, Honorable John C. Knox and Stephen W. Brennan, District Judges, sitting as a statutory court for the Northern District of New York:

Now come petitioners, plaintiffs in Civil Action No. 2311 of whom the States of New York and Ohio are also interveners in Civil Action No. 2337, by their counsel and respectfully represent:

1. On May 9, 1946 this Court filed its opinion in these suits, wherein it held that the petitions should be dismissed and the interlocutory injunction heretofore granted by order of this Court dated December 20, 1945 should be dissolved.

[fol. 2032] 2. Under the provisions of the Judicial Code, U. S. Code Annotated, Title 28, Section 47a, an appeal lies from the decision and order of this Court to the United States Supreme Court, provided such appeal be taken and perfected within sixty days after entry of the final judgment or decree of this Court. Petitioners believing that the decision and opinion of this Court were in error in various respects and that petitioners and their citizens will be greatly injured thereby, intend to take an appeal within sixty days after the entry of the final order or decree of this Court.

3. If the orders of the Interstate Commerce Commission whose lawfulness is in issue in this suit are not enjoined and their enforcement stayed pending appeal and final determination thereon, the Commission will be at liberty to demand compliance with its orders on the part of the railroads, defendants in the proceeding before it, and as a result the railroads in Official territory, so-called, contrary to their wishes expressed in this Court and solely by reason of compulsion of the Commission's orders will be required to file and make effective tariff schedules increasing by 10 per cent their class rates charged by them for the transportation of class rate freight between points in Official territory, including points in plaintiff States, and to join in the establishment of class rates from points in other territories to destinations in Official territory 10 per cent less than the class rates now maintained.

4. Petitioners believe and allege that if the orders of the Commission are not so enjoined and their enforcement stayed pending appeal and final determination thereon and if the railroads under the compulsion of said orders [fol. 2033] establish and thereafter charge rates in compliance therewith, great and irreparable injury will be done to plaintiffs as shippers and receivers of freight upon which increased class rates will be charged and to the citizens, communities and industries in plaintiff States, who will be compelled to pay increased charges without any reasonable means of securing redress or refund if, as the result of the appeal, the orders of the Commission are determined to be unlawful and invalid. On the contrary, in the event that the decision of this court should be affirmed and the orders of the Commission upheld on appeal, nevertheless little injury would be done to Southern

and Western States and shippers located therein by enjoining and staying the Commission's orders pending appeal. This is so, first, because in contrast with the situation in Official territory, where a very large volume of freight is subject to the class rates which would be increased, there is a negligible volume of freight transported in the South and West and from the South and West to Official territory upon which class rates are charged, the railroads having provided commodity or exception rates for a large proportion of the traffic in these territories, which in Official territory is subject to class rates. It is so, second, because to the small extent that the existing class rates would be charged on any shipments transported within the South and West or from the South and West into Official territory, shippers paying such present rates would be entitled to demand and receive reparation in the form of the difference between the rates charged and the rates pursuant to the Commission's orders and a simple procedure is available for the presentation and payment of their claims if the Commission's orders shall ultimately [fol. 2034] be held lawful and valid. These orders would constitute a determination that the present class rates within these territories and from these territories to Official territory are unreasonable to the extent that they exceed rates 10 per cent less. Moreover, petitioners believe and allege that much greater business disturbance and dislocation would be caused if the rates required by the Commission's orders should be made effective at once and if the orders should thereafter be held to be invalid than would result if the present rates are continued for the limited period necessary to prosecute an appeal herein and if thereafter the Commission's orders should be upheld.

Wherefore, petitioners pray that this Court, recognizing the great injury to plaintiffs and their citizens and communities and recognizing also that reasonable doubt exists as to the correctness of the decision herein, may, after hearing on this petition, order and decree that the interlocutory injunction heretofore granted by its order of December 20, 1945 shall be and is continued in effect for a period of sixty days from the date of its final order and decree herein and that if within such sixty days an appeal to the United States Supreme Court from the decision and order of this Court shall have been taken and perfected, the said interlocutory injunction shall be further continued pending such appeal and until determination therein and order pursuant thereto or until further order of this Court or of the United States Supreme Court. Or if this Court shall by its final order and decree herein dissolve the interlocutory injunction heretofore granted then petitioners pray that this Court may by order reinstate such interlocutory injunction or may by new order stay the enforcement of the orders of the Interstate Commerce [fol. 2035] Commission dated May 15, 1945 and October 30, 1945, as amended, for a period of sixty days from the date of its final order and decree herein and if during that time an appeal to the United States Supreme Court shall have been taken and perfected, than pending such appeal and determination therein and until final order pursuant thereto or until further order of this Court or the United States Supreme Court. And petitioners pray for such other and further relief as in the premises may be proper.

Dated: May 17, 1946.

Respectfully submitted, Parker McCollester, Frank J. Clark, Kennett L. Sater, of Counsel for Plaintiffs in Civil Action No. 2311.

MOTION TO STAY ENFORCEMENT AND TO CONTINUE INTERLOCUTORY INJUNCTION—Filed May 20, 1946

Come now Horace A. Hildreth, Governor of the State of Maine, Charles M. Dale, Governor of the State of New Hampshire, Mortimer R. Proctor, Governor of the State of Vermont, Maurice J. Tobin, Governor of The Commonwealth of Massachusetts, John O. Pastore, Governor of the State of Rhode Island, and Raymond E. Baldwin, Governor of the State of Connecticut, plaintiffs-interveners in the above-captioned consolidated cause, and move the Court for an order staying the operation and effect of the orders of the Interstate Commerce Commission dated May 15, 1945, as amended, and dated October 30, 1945, made in its Docket Nos. 28300 and 28310, and continuing the interlocutory injunction issued by this Court on December 20, 1945, pending [fol. 2039] the hearing and determination of the appeal by the aforesaid plaintiffs-interveners to the Supreme Court of the United States of America from the judgment to be entered upon the findings of fact and conclusions of law filed by this Court on May 9, 1946, and as grounds therefor respectfully represent to this Honorable Court as follows:

1. Important questions of law are involved in this proceeding, as this Court recognized at the time of granting the interlocutory injunction in this cause.

2. If the orders of the Commission are not stayed and their enforcement not enjoined by this Court, your petitioners believe that upon the entry of this Court's judgment in this cause, the Interstate Commerce Commission will cancel its permission to postpone compliance with its orders contested in this proceeding, and the railroads in Official Territory will be required to increase their class rate charges prior to the final determination of this cause.

3. As this Court found at the time of granting the interlocutory injunction in this cause, the injury which would be suffered by the industries, shippers, receivers, communities and citizens in Official Territory, should the Commission's orders be permitted to go into operation and effect, would greatly exceed any injury to shippers and communities or states in other sections of the country from withholding the reductions in rates ordered by the Commission, pending final determination of this cause. The Commission's order increasing the class rates in Official Territory would cause an estimated increase in freight charges to shippers and receivers of freight in that territory of over $15,000,000 annually, whereas reductions in the charges for shippers in the Southern Territory would not amount to more than one tenth of this figure.

4. As this Court found at the time of granting the interlocutory injunction in this cause, the directed increase if [fol. 2040] required and permitted to be charged by railroads for transportation within Official Territory pending final determination of this suit would subject industries, shippers and receivers of freight, and the citizens and communities of the states in Official Territory to great injury, for which they will have no redress in the event the Commission's orders should finally be held invalid and permanently enjoined.

5. As this Court found at the time of granting the interlocutory injunction in this cause, greate disturbance and confusion would result if the changed rates ordered by the Commission should be permitted to go into effect and the Commission's orders should thereafter be held to be invalid and permanently enjoined.

Dated this 18th day of May, 1946.

Respectfully submitted, Henry E. Foley, 10 Post Office Square, Boston 9, Massachusetts, Counsel for Horace A. Hildreth, Governor of the State of Maine; Charles M. Dale, Governor of the State of New Hampshire; Mortimer R. Proctor, Governor of the State of Vermont; Maurice J. Tobin, Governor of the Commonwealth of Massachusetts; John O. FINAL DECREE AND ORDER CONTINUING INTERLOCUTORY INJUNCTION—Fileed May 27, 1946

This cause coming on to be heard before the undersigned sitting as a specially constituted court of three judges pursuant to the Urgent Deficiencies Act, 28 U.S.C., Sections 41, 43-48, and full hearing having been had; the pleadings and evidence having been considered and the parties having been heard by counsel in argument and the cause having been submitted for final decree, and this Court having been fully advised in the premises and having filed its opinion, [fol. 2044] findings of fact and conclusions of law, it is ordered, adjudged and decreed:

(1) The petitions of the plaintiffs herein be and they are hereby dismissed.

(2) Dismissal of the petition filed by the plaintiff railroads in Civil Action No. 2337 is without prejudice to another suit to restrain enforcement of the ad interim rates prescribed in the Commission's orders if those rates are found to be confiscatory after a fair test.

And the parties having further been heard upon petition and motions of the plaintiffs and of certain intervenors for continuance of the interlocutory injunction granted by this

Court on December 20, 1945 pending the perfecting and final determination of appeals to the United States Supreme Court and the motion of defendants that said interlocutory injunction be dissolved, the Court hereby makes the following findings of fact and conclusions of law:

Findings of Fact

1. The Court hereby reaffirms and adopts the findings of fact made by it in the order entered herein on December 20, 1945, granting the said interlocutory injunction, as fully as if the said findings of fact were restated herein.

2. If the said interlocutory injunction is not continued pending the perfecting and final determination of the appeals from the final order of the Court herein, the carriers in Official Territory, contrary to their wishes expressed in this Court and solely by reason of the compulsion of the Commission's orders, will be required to file and make effective tariff schedules increasing by ten per cent their class rates charged by them for the transportation of class rate [fol. 2045] freight between points in Official Territory, including points in plaintiff States, and the Western Lines will be required to file and make effective tariff schedules reducing by ten per cent their class rates charged by them for the transportation of class rate freight between points in Western Trunk Line Territory and in Southwestern Territory, and to join with the carriers in Official Territory and Southern Territory in reducing by ten per cent their class rates charged by them for the transportation of interterritorial class rate freight.

3. The relative levels of the class rates in the several rate territories affected by the orders of the Interstate Commerce Commission in this proceeding were established by orders of the Interstate Commerce Commission and have been in effect for many years. If the said interlocutory injunction is not continued pending the perfecting and final determination of the appeals from the final order of this Court, the long established class rate relationships among the rate territories would be materially changed, and if the final order of this Court is thereafter reversed by the United States Supreme Court, the disturbance and disruption of business throughout the country would be of serious proportions. Such disruption would cause more hardship to

business and to the shippers, receivers, and carriers of freight, than would be caused by the continuance of the long established rate relationships pending the final determination of the appeal from the final order of this Court herein.

4. The Commission's orders, if presently enforced with respect to class rates charged on freight transported by the Western Lines, would cause a very substantial reduction in the revenues of the railroads, which they would have no means of recouping if the Commission's orders should [fol. 2046] finally be held to be invalid and permanently enjoined.

5. Great and irreparable injury would be done to plaintiffs, their citizens and communities and to the Western Lines, if on appeal the orders of the Interstate Commerce Commission are held invalid and if pending appeal their enforcement shall not have been stayed and enjoined and such injury appears greater than any injury which defendants or intervening defendants might suffer if the Commission's orders are stayed pending appeal and should finally be held valid.

Conclusions of Law

1. The decision of these consolidated causes necessarily involves the determination of novel questions of law of great importance to the shippers, the carriers, and the public of this country. There are reasonable and serious doubts as to the determination of these novel and important questions.

2. Considering the reasonable doubts as to the validity of the orders of the Interstate Commerce Commission herein, the novel character of the questions of law to be determined, the fact that the present class rates were established by the Interstate Commerce Commission itself and have been in effect for many years, and considering the equities of the shippers, the carriers, and the public, the Court in its discretion should continue the interlocutory injunction pending the perfecting and final determination of any and all appeals from the final order of the Court herein.

[fol. 2047] And, all facts considered, the Court being of opinion and finding that the enforcement of the Commission's orders should be stayed pending appeal from the decisions of this Court, now, therefore, it is

Ordered, adjudged and decreed that the motion of the United States and the Interstate Commerce Commission to dissolve the interlocutory injunction granted by the decree of this Court dated December 20, 1945, be and it is hereby denied and that the said interlocutory injunction be and it hereby is continued for a period of sixty days from the date hereof, and if during said period plaintiffs or any of them perfect an appeal to the Supreme Court of the United States, said interlocutory injunction be further continued pending such appeal and until final determination on appeal and order pursuant thereto unless and until otherwise ordered by this Court or by the Supreme Court of the United States. If before the expiration of sixty days from the date hereof no appeal shall have been taken and perfected from the final decree and order of this Court dismissing the petitions, the interlocutory injunction shall thereupon be dissolved and shall thereafter be of no effect.

PETITION OF THE STATES OF NEW YORK, DELAWARE, INDIANA, MARYLAND, MICHIGAN, NEW JERSEY, OHIO, WISCONSIN AND OTHERS FOR APPEAL TO THE SUPREME COURT OF THE UNITED STATES—Filed June 25, 1946

To the Honorable the Judges of the District Court of the United States for the Northern District of New York:

Now come Petitioners, the States of New York, Delaware, Indiana, Maryland, Michigan, New Jersey, Ohio, Wisconsin and the Commonwealth of Pennsylvania, plaintiffs in Civil No. 2311, and the States of New York and Ohio, intervening plaintiffs in Civil No. 2337, and considering themselves aggrieved by the final decree and order of this Court, en- [fol. 2049] tered herein on the 27th day of May, 1946, hereby pray that an appeal may be allowed to the Supreme Court of the United States from so much of said final decree and order as dismisses the petition of plaintiffs and intervening plaintiffs in said actions.

Pursuant to paragraph 1 of Rule 12 of the Rules of the Supreme Court of the United States, your petitioners present to this Court herewith a statement disclosing the basis of the jurisdiction of the Supreme Court of the United States upon appeal to review said final decree and order.

The particulars wherein your petitioners consider said final decree and order erroneous are set forth in the Assignment of Errors and Prayer for Reversal filed herewith.

Wherefore said plaintiffs, your petitioners, pray that their appeal to the Supreme Court of the United States may be allowed and a citation be issued as provided by law, and that a transcript of the record, proceedings and documents upon which said decree and order were based, duly authenticated, be transmitted to the Supreme Court of the United States under the rules of said Court in such cases made and provided.

Respectfully submitted, Nathaniel L. Goldstein, Attorney General, Albany, New York; Parker McCollester, Frank J. Clark, Special Assistant Attorneys General, 25 Broadway, New York 4, N. ASSIGNMENT OF ERRORS AND PRAYER FOR REVERSAL—Filed June 25, 1946

Now come the States of New York, Delaware, Indiana, Maryland, Michigan, New Jersey, Ohio, Wisconsin and the Commonwealth of Pennsylvania, plaintiffs in Civil No. 2311, and the States of New York and Ohio, intervening plaintiffs in Civil No. 2337, by their respective counsel, and in connection with their appeals file the following assignment of errors upon which they will rely in the prosecution of their appeals to the Supreme Court of the United States from that part of the final order and decree of this Court entered May 27, 1946 dismissing plaintiffs' petitions.

The District Court erred:

[fol. 2053] 1. In making and entering so much of the order and final decree as dismissed plaintiffs' petitions.

2. In deciding that the orders of the Interstate Commerce Commission in Docket No. 28300, *Class Rate Inves-*

tigation, 1939, dated May 15, 1945 and October 30, 1945, were lawful and valid.

3. In failing to decide that the Commission's orders should be annulled, set aside and enjoined for any one or all of the reasons set forth in plaintiffs' petitions.

4. In failing to decide that the Commission's orders are invalid because they rest upon an erroneous interpretation and application of the provisions of Section 3 of the Interstate Commerce Act and of the 1940 amendment thereto.

5. In failing to decide that the Commission's orders are invalid because in making them the Commission was influenced by an erroneous view of the purpose and effect of Section 5(b) of the Transportation Act, 1940, and of its authority and duty thereunder.

6. In failing to decide (page 23) that in making its orders and in relying upon the 1940 amendment of Section 3 of the Interstate Commerce Act as the statutory basis thereof, the Commission has made the same sort of error and its orders are invalid for reasons similar to those which led the Supreme Court in *Ann Arbor R. R.* v. *United States,* 281 U. S. 658, and *Atchison, T. & S. F. Ry.* v. *United States,* 284 U. S. 248, to hold invalid the orders of the Commission involved in those cases.

7. In failing to decide that the Commission's orders were invalid because based upon error of law by the Commission in that the Commission conceived that class rates are made unlawful because not uniform throughout the several [fol. 2054] territories of the country, and that the Commission is empowered to prescribe uniform class rates, notwithstanding differences in other rates or differences in factors theretofore recognized as justifying and requiring differences in rates.

8. In deciding:

> "That the Commission correctly interpreted its powers and duties after the amendment appears to be shown by the following quotation from its report: 'By the amendment to the substantive antidiscrimination provisions of section 3(1) all discriminations in the form of undue or unreasonable preference or advantage,

or undue or unreasonable prejudice or disadvantage, as between regions, districts, or territories, viewed as separate entities, were brought directly within the purview of the act along with all the other inhibitions previously included. We were then authorized and directed by the other provisions mentioned to remove any such discriminations found to exist in a proper proceeding. This means that such discriminations as those mentioned which result from differences in the methods of distributing the general rate burden in the several rate-making territories, or from any other cause, if not justified upon proper consideration of recognized elements of rate making applied in the light of the amended law are unlawful and should be corrected.' " (page 26.)

9. In holding (page 27):

> "We, therefore, hold that the Commission correctly decided that the ad interim order under review was within the scope of its statutory power * * *."

10. In failing to decide that the Commission's orders were invalid because they and the ultimate findings and conclusions of the Commission were without support in preliminary findings of fact essential to sustain the ultimate findings, conclusions and orders.

[fol. 2055] 11. In failing to decide that the Commission's orders and ultimate findings were arbitrary and invalid because in conflict with such preliminary findings as the Commission did make.

12. In failing to decide that the Commission's orders were invalid in that they were the result of an arbitrary disregard by the Commission of its own preliminary findings and of the evidence that the long established differences in the levels of the class rates were and are justified by the differences in the rate structures as a whole in the several territories, by the differences in the volumes, compositions, densities and consists of the traffic and the revenue requirements of the carriers in the several territories, and by the differences in rates other than class rates; of the Commission's disregard of its own prior decisions prescribing different levels of class rates in

the light of such differences in factors affecting rates, and of the complete absence of any finding or evidence that such factors have changed since the present class rates were prescribed.

13. In concluding (page 29) that the absence of preliminary findings of the primary facts listed on pages 20 and 21 did not render the Commission's orders invalid:

14. In disregarding the absence of preliminary findings by the Commission as to facts essential to sustain its orders and in relying upon evidence from which the Commission failed to make such findings.

15. In finding and concluding that there was "substantial evidence to support such findings as were made" (page 28).

[fol. 2056] 16. In finding (page 16)

> "that the facts found by the Commission are supported by substantial evidence"

and in adopting such finding as the findings of the District Court.

17. In finding and concluding (page 30) that:

> "There was ample evidence on which the Commission found that the class rates in the various territories involved and the interterritorial class rates among those territories were on different levels within the existing classification as well as based upon differing classifications. The Commission found on substantial evidence many so-called primary facts, which need not be enumerated here but which appear in its report, showing transportation costs, composition of traffic, kinds of markets, natural resources, commodities produced or manufactured in the various territories and the parts thereof, and found preference, prejudice, and discrimination as above set forth."

18. In finding and concluding that the foregoing considerations sustained and rendered valid the ultimate findings and orders of the Commission.

19. In failing to decide that the Commission's orders, in so far as they would require an increase in the class

rates for transportation between points in Official territory, were invalid and should be set aside, annulled and enjoined because not supported by preliminary findings essential to sustain the Commission's ultimate findings and such orders and because there was no evidence before the Commission to justify such preliminary findings.

20. In finding and concluding (pages 29 and 30):

> "For instance, it has been argued that there can be no increase in class rates in Official Territory unless there is first a so-called primary finding, supported by substantial evidence that the present rates are not [fol. 2057] compensatory. While that fact, if proved, would have been of much significance the failure to prove it and the consequent lack of a finding that present rates are confiscatory does not leave the Commission's finding that the rates are unlawful unsupported by substantial evidence. It weighed all the evidence and found that it tipped the scales in favor of its ultimate finding that the present rates were unlawful. That basic conclusion if supported sufficiently by other evidence, was enough to justify the exercise of the Commission's statutory power to alter the rates as needed to make them lawful for the future. Pennsylvania R. Co. v. United States, 323 U. S. 588; Chicago, B. & Q. R. R. v. United States, 60 F. Supp. 580; Scandrett v. United States, 32 F. Supp. 995, aff'd. 312 U. S. 661; Jefferson Island Salt Mining Co. v. United States, 6 F. (2) 315. We think enough was proved and found to warrant such basic conclusion."

21. In failing to decide that the Commission's orders, in so far as they would require a ten per cent increase in the class rates for transportation between points in Official territory embracing plaintiff states were arbitrary, invalid and unlawful because, although the Commission made a pro forma ultimate finding that the present class rates were less than minimum reasonable rates, there was no preliminary finding and no evidence that the present rates are not fully compensatory for this transportation or that the continued maintenance of these rates, which were prescribed a short time ago by the Commission as *maximum* reasonable rates, threatens or is likely to induce

a rate war or will otherwise destroy or impair the financial ability of any carrier to provide efficient transportation service, whereas there were findings and evidence that the present class rates for transportation within Official territory are highly profitable to the carriers in that territory for the transportation for which they are charged.

[fol. 2058] 22. In failing to decide that whereas the Commission attempted to rest its orders requiring a ten per cent increase in the class rates for transportation between points in Official territory upon an ultimate finding regarding the comparative rates of return of the carriers in the several territories upon their respective property investments, there was no preliminary finding and no evidence to support a finding that the relative rates of return of the carriers in the several territories were due to the levels of their class rates or that an increase in class rates would increase the rate of return of the railroads in Official territory.

23. In failing to decide that the Commission's orders requiring that the class rates for transportation between points in Official territory be increased ten per cent were arbitrary, unlawful and beyond the jurisdiction of the Commission in that they constitute an attempt to require the shippers and receivers of freight in Official territory to pay increased rates for the sake of bringing about uniformity of rates without thereby impairing the revenues of the railroads in other territories.

24. In failing to decide that to the extent that the Commission's orders rest upon an ultimate finding of undue prejudice and preference, in violation of Section 3 of the Interstate Commerece Act, or upon a purpose to bring about uniformity of freight charges, its orders are invalid because without support in any preliminary finding that the class rates are charged for the transportation of freight of the same kinds, or of freight of competing shippers in the several territories, because there is no evidence to support such preliminary findings, and because, on the contrary, the evidence shows and the commission found that while the class rates to be increased in Official territory are charged [fol. 2059] on a large volume of freight, there is little freight in the South and West or from those territories on which class rates are charged for the reason that the

railroads have established commodity or exception rates lower than the class rates.

25. In failing to decide that in so far as the Commission's orders would require an increase in the class rates for transportation within Official territory for the supposed purpose of removing undue prejudice and preference, in violation of Section 3, the orders are invalid because there is no finding and no evidence to justify a finding that the differences in the levels of the class rates for transportation between points within Official territory and for transportation from points in the South and West into Official territory represent or result in differences in the freight rates actually charged, or that the differences in levels of the class rates have been or are the cause of substantial or any injury to the South or West as "territories" or to shippers therein.

26. In failing to decide that in so far as the Commission's orders rest upon an ultimate finding of undue prejudice and preference in violation of Section 3 of the Interstate Commerce Act, they are invalid because there is no finding that the same carriers control or are responsible for the levels of the rates in the several territories.

27. In deciding:

> "Nor is the order erroneous because the carriers were not allowed any alternative method for the removal of the discriminations which make the present [fol. 2060] class rates unlawful. This was a rate order under Par. 3 in which an alternative must be provided as held in Texas & Pacific Ry. v. United States, supra." (page 34)

28. In failing to decide that in so far as the Commission's orders rest upon supposed relative costs of transportation, they are lacking in support in the evidence and in necessary preliminary findings because there is no evidence and the Commission made no finding as to the relative costs of transporting freight on which the class rates affected by its orders are charged in the several territories.

29. In failing to find that in so far as the Commission rested its orders upon the evidence and findings as to relative average costs of transportation in the several

territories, the orders are arbitrary, inconsistent and invalid in requiring a ten per cent increase of the class rates in Official territory for the purpose of equalizing such rates with the class rates in Western territory, since the Commission found and the evidence shows that the average costs of transportation are substantially less in Official territory than in Western territory.

30. In failing to decide that the Commission's orders requiring an increase in the present class rates in Official territory, which the evidence shows to be profitable, are inconsistent with and violate the requirements of Section 15a(2); that the Commission, in the exercise of its power to order just and reasonable rates shall "give due consideration to the need, in the public interest, of adequate and efficient railway transportation service at the lowest cost consistent with the furnishing of such service;"

[fol. 2061] 31. In finding (page 10):

> "The Commission also made findings as to the effect of the class rates on shippers in Southern Territory, the relative costs * * * of the traffic [if by that is intended the cost of transporting freight upon which class rates are charged] * * * and their effect on the economic development of that [Southern] territory."

and in finding (page 10):

> "Findings on similar or kindred subjects were made respecting the other territories and the interterritorial freight movement among them."

in that the Commission did not make findings as to the "effect" of the class rates on either shippers or territories.

32. In finding (page 10) with respect to the so-called Pocahontas lines that

> "the bulk of their freight, being coal, is quite different in respect to the means and cost of carriage from the kinds of freight which characterize the carriage elsewhere in the territory."

33. In upholding the Commission's orders in the absence of the preliminary finding and evidence previously dis-

cussed while at the same time finding or concluding (page 23):

> "It does not appear that the Commission has herein acted upon any assumption that the 1940 changes altered the basic principles governing its action."

34. In inconsistently concluding that the Commission's interpretation of the statute as described by the Court, which represents a radical departure from previously established and recognized principles, "is supported by the legislative history" (page 24).

[fol. 2062] 35. In inconsistently deciding further (page 26):

> "We think Par. 3(1) as thus amended does add new factors to be taken into account by the Commission in determining, under the old and well recognized principles which were before guides to decision in such matters, whether existing rates are unlawful. These new factors are whether such rates are unjustly preferential, prejudicial and discriminatory as between regions, districts or territories; and, in our opinion, Par. 3(1) now empowers the Commission to find such rates unlawful even though they would have been lawful in the light of all relevant considerations before the amendment."

36. In deciding that the Commission's orders are lawful notwithstanding, as found by the Court (page 26) that:

> "We may, indeed, take it for granted that they [class rates] were lawful previous to the amendment since they had been in the main the result of comparatively recent investigations and orders of the Commission."

37. In failing to decide that the Commission's orders were invalid and beyond the authority of the Commission as an attempt under the guise of regulating rates to regulate economic and industrial conditions and influence the location of business.

38. In deciding that whether the Commission's orders

> "are the result of political agitation having for its ultimate object the dislocation of industry from Official

> territory and its establishment in the other territories, principally in the Southern"

which the Court found "does appear plausible", is not within the bounds of judicial cognizance (page 31).

[fol. 2063] 39. In not taking judicial notice of the changed conditions caused by the war and reconversion, and in failing to conclude, in the light of such changed conditions, that the Commission's orders, which are to take effect in the post-war period, are invalid because based upon an obsolete record.

40. In deciding that (page 34):

> "The denial by the Commission of the application to reopen the proceedings and receive additional evidence especially as to conditions subsequent to 1939 was not an abuse of its discretion."

Wherefore petitioners pray that the order and decree of the District Court, entered May 27, 1946, in so far as it dismissed plaintiffs' petitions herein, be reversed; and petitioners pray for such other relief as in the premises may be proper.

ASSIGNMENT OF ERRORS AND PRAYER FOR REVERSAL—Filed June 25, 1946

The Honorable Horace A. Hildreth, Governor of the State of Maine; The Honorable Charles M. Dale, Governor of the State of New Hampshire; The Honorable Mortimer R. Proctor, Governor of the State of Vermont; The Honorable Maurice J. Tobin, Governor of The Commonwealth of Massachusetts; The Honorable John O. Pastore, Governor of the State of Rhode Island; and The Honorable Raymond E. Baldwin, Governor of the State of Connecticut (hereinafter called your petitioners), interveners in the above-entitled consolidated proceedings, in connection with their petition for appeal to the Supreme Court of the United States from a portion of the final decree and order entitled —Final Decree and Order Continuing Interlocutory Injunction—made and entered in said proceedings on May 27, 1946 by the District Court of the United States for the Northern District of New York (hereinafter called the Dis-[fol. 2179] trict Court), hereby assign error to the record and proceedings herein and to the entry of that portion of said final decree and order which dismissed the petitions of the plaintiffs in said proceedings and state that, in the entry of said final decree and order said District Court committed error to the prejudice of your petitioners in the following particulars:

1. The District Court erred in dismissing the petitions of the plaintiffs in said proceedings.

2. The District Court erred in ruling that the ad interim order of the Interstate Commerce Commission (hereinafter called the Commission) entered May 15, 1945, as amended by the order of the Commission entered October 30, 1945, in the proceeding entitled—Class Rate Investigation, 1939 —and numbered 28,300 in the dockets of the Commission

(said order entered May 15, 1945, as so amended, being hereinafter called the order of the Commission), is lawful and valid.

3. The District Court erred in holding

> "that the Commission correctly decided that the ad interim order under review was within the scope of its statutory power." (P. 27)

4. The District Court erred in failing to rule that the order of the Commission, in so far as it directed an increase in Official Territory intraterritorial class rates, is unlawful and invalid (a) in that such order lacks the support of necessary and adequate preliminary findings of fact, (b) in that the subsidiary findings of fact which the Commission has made are contrary to the ultimate conclusions of the Commission and preclude the making of the preliminary findings of fact which would be necessary to support the order of the Commission, and (c) in that the evidence would not have permitted or supported the making of such necessary and adequate preliminary findings of fact.

[fol. 2180] 5. The District Court erred in ruling implicitly, (a) that the lack of adequate and necessary preliminary findings does not render the order of the Commission invalid, and (b) that the only test of the validity of said order is whether it is supported by substantial evidence.

6. The District Court erred in finding that the facts found by the Commission are supported by substantial evidence, in adopting such findings of fact as findings of the District Court, and in finding that there was substantial evidence to support such findings as the Commission made.

7. The District Court erred in failing to rule that the order of the Commission, in so far as it directs an increase in Official Territory intraterritorial class rates, which the evidence and the preliminary findings of the Commission show to be profitable, is inconsistent with and violative of Section 15a (2) of the Interstate Commerce Act, which requires the Commission, in determining just and reasonable rates, to give due consideration to the need, in the public interest of adequate and efficient railway transportation service at the lowest cost consistent with the furnishing of such service.

8. The District Court erred in failing to rule that the order of the Commission, in so far as it directs an increase in Official Territory intraterritorial class rates, cannot be sustained as a valid order remedying a Section 1 violation.

9. The District Court erred in ruling that it might not properly set aside an order of the Commission requiring increases in rates which are within the so-called zone of reasonableness between reasonable minimum and reasonable maximum rates.

10. The District Court erred in failing to rule that the [fol. 2181] Commission's finding that intraterritorial class rates within Official Territory are unjust and unreasonable in violation of Sections 1 (4) and 1 (5) of the Interstate Commerce Act is not a valid and proper finding, but a mere conclusion which not only is lacking the support of necessary and adequate preliminary findings but is in fact inconsistent with and contrary to the findings which the Commission has made and to the evidence before the Commission.

11. The District Court erred in failing to rule that a finding that rates are unjustly and unreasonably low, in violation of Section 1 of the Act, must, to be valid, be based upon a subsidiary finding, supported by evidence, either that such rates are noncompensatory and so low as to burden other traffic, or that the continuance of such rates will be likely to result in a rate war or otherwise be harmful, from a revenue standpoint, to the carrier publishing the rates or to other and competing carriers.

12. The District Court erred in failing to rule that an order of the Commission, directing increases in rates by reason of a conclusion of a violation of Section 1 of the Act, must be based not only upon a valid finding that such rates are unjustly and unreasonably low but also upon a finding, supported by evidence, that rates lower than the rates required to be established pursuant to the Commission's order either would be noncompensatory and so low as to burden other traffic or would be likely to result in a rate war or otherwise be harmful, from a revenue standpoint, to the carrier publishing the rates or to other and competing carriers.

13. The District Court erred in failing to find that the Commission has not made, and that the evidence would

[fol. 2182] not support any of the preliminary findings of fact required to support a finding that Official Territory intraterritorial class rates are unjustly and unreasonably low in violation of Section 1 of the Act, but that it has, on the contrary, made particular findings of fact which are inconsistent with and contrary to its ultimate finding as aforesaid.

14. The District Court erred in failing to rule that the order of the Commission, in so far as it directs an increase in Official Territory intraterritorial class rates, cannot be sustained as a valid order remedying a Section 3 violation.

15. The District Court erred in failing to rule that the provisions of the Transportation Act of 1940 effect no change in the substantive law with respect to the elements of proof of undue preference and prejudice, and that preliminary findings of fact which were essential to the validity of an ultimate finding of undue preference of and prejudice against an entity entitled to protection against prejudice, prior to the enactment of said 1940 Act, continue to be essential to the validity of such an ultimate finding.

16. The District Court erred in ruling that the absence of the preliminary findings which the Court finds to have been held essential to be proved to establish a basis for findings of preference or prejudice or discrimination as to rates before the 1940 amendment of Section 3(1) of the Act, does not now invalidate a finding of preference and prejudice.

17. The District Court erred in failing to rule that the Commission's finding that Official Territory intraterritorial class rates and class rates into Official Territory from other territories are unduly preferential of Official Territory as a whole and of the shippers and receivers of freight located therein and unduly prejudicial to Southern, Southwestern and Western Territories as a whole and [fol. 2183] shippers and receivers of freight located therein, in violation of Section 3 of the Act, is not a valid and proper finding, but a mere conclusion which not only is lacking the support of adequate preliminary findings, but is in fact inconsistent with and contrary to the findings

which the Commission has made and is not supported by the evidence.

18. The District Court erred in failing to rule that the order of the Commission is invalid and unlawful, in so far as it rests upon the Commission's ultimate finding of undue preference and prejudice (a) in that such an ultimate finding must be based upon a preliminary finding that the allegedly unlawful rates are charged on the same types of freight or the freight of competing shippers, (b) in that the Commission has not made, and the evidence will not support such a finding and (c) in that other preliminary findings which the Commission has made preclude the making of such preliminary finding which is necessary to the validity of its ultimate finding and therefore its order.

19. The District Court erred in failing to rule that the order of the Commission is invalid and unlawful, in so far as it rests upon the Commission's ultimate finding of undue preference and prejudice (a) in that such an ultimate finding must be based upon a preliminary finding that injury results or will result to the allegedly prejudiced territories or the shippers and receivers of freight therein, by reason of the continued maintenance of the allegedly unlawful rates, (b) in that the Commission has not made, and the evidence will not support such a finding and (c) in that other preliminary findings which the Commission has made preclude the making of such preliminary finding which is necessary to the validity of its ultimate finding and therefore its order.

[fol. 2184] 20. The District Court erred in failing to rule that the order of the Commission is invalid and unlawful, in so far as it rests upon the Commission's ultimate finding of undue preference and prejudice arising from lack of territorial class rate uniformity (a) in that such an ultimate finding must be based upon a preliminary finding that transportation conditions do not justify any differences between said allegedly unlawful rates, (b) in that the Commission has not made, and the evidence will not support such a finding and (c) in that other preliminary findings which the Commission has made preclude the making of such preliminary finding which is necessary to the validity of its ultimate finding and therefore its order.

21. The District Court erred in ruling that the Commission's order is not improper and beyond the power and authority of the Commission because of the failure of the order to afford the carriers alternative methods of removing the allegedly found discrimination.

Wherefore, your petitioners pray that said final decree and order of the District Court entered May 27, 1946, in so far as it dismissed the petitions of the plaintiffs in said above-entitled proceedings be reversed, and for such other and appropriate further relief as to the Court may seem just and proper.

ASSIGNMENT OF ERRORS AND PRAYER FOR REVERSAL—Filed June 25, 1946

I

The Atchison, Topeka and Santa Fe Railway Company; Beaver, Meade and Englewood Railroad Company; Chicago, Burlington & Quincy Railroad Company; Chicago Great Western Railway Company; Chicago, Milwaukee, St. Paul and Pacific Railroad Company; Chicago and North Western Railway Company; The Chicago, Rock Island and Pacific Railway Company, and Joseph B. Moines & Southern Railway Company; Fort Worth and Denver City Railway Company; Great Northern Railway Company; Green Bay and Western Railroad Company; Gulf, Colorado and Santa Fe Railway Company; The Kansas City Southern Railway Company; Midland Valley Railroad Company; The Minneapolis & St. Louis Railway Company; Minneapolis, St. Paul & Sault Ste. Marie Railroad Company; Missouri and Arkansas Railway Company; Missouri-Kansas-Texas Railroad Company; Missouri-Kansas-Texas Railroad Company of Texas; Guy A. Thompson, Trustee, Missouri Pacific Railroad Company, Debtor; Northern Pacific Railway Company; Panhandle and Santa Fe Railway Company; St. Louis Southwestern Railway Company; Southern Pacific Company; Texas and New Orleans Railroad Company; The Texas and Pacific Railway Company; Union Pacific Railroad Company; The Wichita Valley Railway Company, intervenors in Civil No. 2311, and plaintiffs in Civil No. 2337, entitled above, in connection with their petition for an appeal to the Supreme Court of the United States, hereby assign error to the record and proceedings and to the entry of so much of the final decree and order of the said District Court entered on May 27, 1946, in the said consolidated causes as dismissed the petitions of the plaintiffs herein, and say that in the entry of the said final decree and order the said District Court committed error to the prejudice of the said The Atchison, Topeka and Santa Fe Railway Company, et al., in the following particulars:

1. The District Court erred in dismissing the petition of The Atchison, Topeka and Santa Fe Railway Company, et al., in Civil No. 2337 and the intervening petition of The Atchison, Topeka and Santa Fe Railway Company, et al., in Civil No. 2311.

2. The District Court erred in failing to set aside and [fol. 2275] perpetually enjoin the enforcement of the order of the Interstate Commerce Commission dated May 15, 1945, as amended, and the order of the Commission dated October 30, 1945, in *Class Rate Investigation*, 1939, Docket No. 28300 on the Commission's docket.

3. The District Court erred in failing to set aside said orders of the Commission on the ground that said orders are not adequately supported by evidence.

4. The District Court erred in failing to set aside said orders of the Commission on the ground that said orders are not adequately supported by findings of the Commission.

5. The District Court erred in failing to hold that the said orders of the Commission were arbitrary and without support in the evidence before the Commission and without support of adequate findings by the Commission.

6. The District Court erred in failing to find that the said orders were invalid on the ground that the Commission, in making its finding that all interstate class rates throughout the nation east of the Rocky Mountains were unlawful, had arbitrarily disregarded the evidence and its own findings to the effect that the costs of transporting such traffic in Western Trunk Line and Southwestern territories were and are far higher in those territories than in Official Territory, Illinois Territory, or Southern Territory, and to the effect that the traffic and transportation conditions in the several rate territories involved are substantially different, one from the other, and because such different conditions prove the legality of the present rates and render unlawful the said orders of the Commission.

[fol. 2276] 7. The District Court erred in failing to find that the said orders were invalid on the ground that the Commission, in holding that the relation between interterritorial class rates from points in Western Trunk Line and Southwestern Territories to points in Official Territory and Illinois Territory and the intraterritorial class rates in Official Territory and Illinois Territory is unlawful, had arbitrarily disregarded the evidence and its own findings to the effect that the costs of transporting such interterritorial traffic were and are substantially higher than the costs of transporting such intraterritorial traffic, and that all the governing traffic and transportation conditions in the several territories were and are substantially unlike.

8. The Court erred in failing to find that the said orders were invalid on the ground that the Commission had arbitrarily disregarded the evidence and its own preliminary findings that the long-established differences in class rates in Official and Illinois Territories, and in Western Trunk Line and Southwestern Territories were and are

justified, under the recognized principles of rate making, by the differences in costs of transportation, composition and consist of traffic, density of traffic, and the revenue needs of the carriers.

9. The District Court erred in failing to hold that the said orders were invalid on the ground that the Commission had misconstrued the Interstate Commerce Act and the Transportation Act of 1940, including the so-called Ramspeck Resolution contained therein, and had based its said orders upon such mistake of law.

10. The District Court erred in failing to hold that the said orders were invalid on the ground that the Commission had misconstrued the Transportation Act of 1940, [fol. 2277] including the so-called Ramspeck Resolution contained therein, to be a mandate and authority to the Commission to establish uniform freight rates in the several rate territories notwithstanding substantial differences in the governing traffic and transportation conditions in the several territories, including the substantial differences found by the Commission in costs of transportation, composition and consist of traffic, density of traffic, and revenue needs of the carriers.

11. The District Court erred in failing to hold that the said orders were invalid on the ground that the Commission had misconstrued the Transportation Act of 1940 as making unlawful the class rates which were prescribed by the Commission itself prior to the enactment of that Act and which were lawful prior to the enactment of that Act.

12. The District Court erred in holding that the class rates which it found "were lawful previous to the amendment since they had been in the main the result of comparatively recent investigations and orders of the Commission" were made unlawful by the amendment to Section 3(1) of the Interstate Commerce Act (49 U.S.C.A. Sec. 3(1)) contained in the Transportation Act of 1940, and in holding that the said amendment empowered the Commission to find such rates unlawful.

13. The District Court erred in failing to hold that the Commission had acted arbitrarily in finding the class rates to be unjust and unreasonable under Section 1(4) and Section 1(5)(a) of the Interstate Commerce Act notwithstand-

ing (a) that the Commission itself had prescribed such rates, (b) that such rates were lawful and held by the District Court to be lawful prior to the Transportation Act of 1940, (c) that there had been no intervening change in said Section 1(4) and Section 1(5)(a), and (d) that there was no evidence and no finding of any intervening change in transportation conditions of such a nature as to support a finding that the said rates are unjust or unreasonable.

[fol. 2278] 14. The District Court erred in holding the said orders to be valid because the Commission had found facts to give a formal basis for the orders despite the finding by the District Court that the probable import of the orders was "to try to equalize clearly inherently unequal business conditions, not due to existing freight rates in the various territories or any regions or districts therein, by manipulating rates."

15. The District Court erred in holding that the statutory control over rates which has been confided to the Commission is sufficiently comprehensive to empower the Commission to hold rates unlawful solely because of the different levels of such rates, and despite substantial differences in transportation costs and other factors which constitute the lawful and governing standards of rate making.

16. The District Court erred in failing to hold that the class rates prescribed in the Commission's orders for less-than-carload traffic in Western Trunk Line and Southwestern Territories would be confiscatory in violation of the Fifth Amendment to the Constitution of the United States.

17. The District Court erred in holding that the class rates prescribed by the Commission for less-than-carload traffic in Western Trunk Line and Southwestern Territories should be placed in effect for a trial period notwithstanding the fact that the undisputed evidence before the Court proved such rates to be confiscatory in violation of the Fifth Amendment to the Constitution of the United States.

18. The District Court erred in adopting the facts found by the Commission as "ultimate findings" of the Commission and the facts found by the Commission in Part III of its report dated May 15, 1945 in its Docket No. 28300. (262 I. C. C. at 702-706)

[fol. 2279] 19. The District Court erred in failing to hold that the facts found by the Commission as ultimate findings of the Commission and the facts found by the Commission in Part III of its said report (262 I. C. C. at 702-706) were not adequately supported by evidence before the Commission.

20. The District Court erred in failing to hold that the said orders were invalid on the ground that the said orders did not leave the respondent carriers the alternative of removing any discrimination found to exist by increasing the rates found to be preferential or by decreasing the rates found to be prejudicial.

21. The District Court erred in failing to hold that the Commission's orders were invalid under Section 3(1) of the Interstate Commerce Act (49 U. S. C. A., Sec. 3(1)), on the ground that none of the carriers involved in the alleged discrimination has any common control over the interterritorial class rates from Western Trunk Line and Southwestern Territories into Official and Illinois Territories, and the intraterritorial class rates in Official and Illinois Territories.

Wherefore, the said The Atchison, Topeka and Santa Fe Railway Company, et al, respectfully pray that so much of the said final decree and order of the District Court entered May 27, 1946, as dismissed the said petitions of The Atchison, Topeka and Santa Fe Railway Company, et al, in the above entitled consolidated causes be reversed, and for such other and appropriate relief as to the Court may seem just and proper.
